• The most comprehensive guide to natural, safe, and permanent cures for impotence. • One of Europe's leading sex therapists introduces psychological and sexual techniques that can help the more than 30 million men who suffer from impotence. • Emphasizes holistic cures that treat body, mind, and spirit, including herbal remedies, homeopathy, yoga, aromatherapy, and diet changes. For those men who wish to avoid the risks of Viagra, *The Viagra Alternative* offers the most up-to-date information on natural, safe, and long-term cures for impotence. Recognizing that a healthy sex life is impossible without physical, mental, and emotional well-being, Dr. Marc Bonnard focuses on healing the whole person with treatments ranging from herbs such as ginkgo, ginseng, saw palmetto, and yohimbe to homeopathy, acupuncture, diet, yoga

exercises, aromatherapy, and the introduction of new sexual techniques. Dr. Bonnard places special emphasis on relationship therapy, demonstrating that more often than not an enjoyable sex life can be restored without resorting to chemicals or supplements of any kind. By exploring the range of options outlined in *The Viagra Alternative*, men need no longer rely on a dangerous little pill to improve their sexual lives. *Homeopathy Cures Where Alopathy Fails* Routledge "Mucuna pruriens" is a bean that grows in the tropics. It is very rich in natural levodopa that is better tolerated and more potent than the synthetic levodopa in Sinemet or Stalevo. Two prestigious neurologists have patented extracts of mucuna seeds as a treatment for Parkinson's. Meanwhile, patients have recorded their positive experiences with mucuna; they buy it online (no prescription needed) and use it in secrecy without consulting their neurologist. Neither the patients nor the doctors (most of them) have clear ideas about this plant, its ingredients (not only levodopa), the proportions in which it is absorbed, or

how to manage it. "Mucuna versus Parkinson: Natural Levodopa Treatment" is so far the most complete and up-to-date monograph on the subject, it describes the theoretical and practical approaches to the use of this plant as a treatment option for Parkinson's disease. Also included are more than one hundred of references.

The widespread use of effective prescription drugs for erectile dysfunction has helped advance societys acceptance of talking about sexual dysfunction for both men and women. As the authors elegantly describe, sexual dysfunction and attempts at treating it have been around for as long as sexuality itself. Its no surprise that history is full of myths about

aphrodisiacs. Despite all the advances we have made in medicine, the myth of the aphrodisiacs is as powerful as ever. However, sexual dysfunction is very often a complex problem requiring careful, thoughtful and educated treatment. Rarely is there quick natural fix. Consumers need to do their homework before buying into the claims of companies selling natural aphrodisiacs. This book is an excellent resource for those seeking to educate themselves about the history, effectiveness, safety and future of natural aphrodisiacs. Nevertheless, the information contained within the text is also important and valuable for both sides of the patient-physician equation in the treatment of sexual dysfunction.

The authors have expressed very clearly the various merits and demerits of natural aphrodisiac products on the market. Discussion on the future prospects of plant used as aphrodisiacs is excellent information for the phytochemists

who are interested to pursue research limitations in the area of existing natural aphrodisiacs and their standardizations is consistent with the rising interest of global consumers in green environment. A special effort in creating the drawings of the natural products for enabling readers to identify the natural products is phenomenal. I recommend this book to the lovers of natural products without any hesitation. I hope that manufacturers, scholars and consumers of natural aphrodisiac products will take advantage of this document in years to come. Usha Chowdhary, Ph.D. Professor, Human Environmental Sciences Central Michigan University Mount Pleasant, MI 48859
The latest research on herbal aphrodisiacs cited by the authors is very impressive. The appropriate quotations at the beginning of each chapter are very fascinating. It is a comprehensive compendium on natural aphrodisiacs comprising their origin, myth, chemistry, pharmacology, risk and romance. Hand drawings of the plants are

excellent and depict their morphological characteristics that can be helpful in identifying them. The book is actually a ready reckoner for physicians, pharmacist, or herbalists for guiding the patients who are incorporating natural products in their daily regime. K. C. No two markets for voluntary health insurance (VHI) are identical. All differ in some way because they are

heavily shaped by the nature and performance of publicly financed health systems and by the contexts in which they have evolved. This volume contains short, structured profiles of markets for VHI in 34 countries in Europe. These are drawn from European Union member states plus Armenia, Iceland, Georgia, Norway, the Russian Federation, Switzerland and Ukraine. The book is aimed at policy-makers and researchers interested in knowing more about how VHI works in practice in a wide range of contexts. Each profile, written by one or more local experts, identifies gaps in publicly-financed health coverage, describes the role VHI plays, outlines the way in which the market for VHI operates, summarizes public policy towards VHI, including major developments over time, and highlights national debates and challenges. The book is part of a study on VHI in Europe prepared jointly by the European Observatory on Health Systems and Policies and the WHO Regional Office for Europe. A companion volume provides an analytical overview of VHI markets across the 34

countries.
