One of the primary reasons most often cited for the failure of a new venture is the entrepreneur's inability to identify and exploit the 'right idea'. This is directly connected to the concepts and principles of marketing, specifically: knowing what to produce and knowing what not to produce. Additionally, even if the entrepreneur has the right idea, many experts cite weak marketing efforts (marketing execution) as another reason for venture failure. Marketing for Entrepreneurs moves beyond the classic 4Ps and demonstrates the application of marketing in an entrepreneurial context. Traditional marketing texts are incapable of addressing marketing concepts directly applicable to the entrepreneur's

unique situation. Furthermore, general entrepreneurship books are also not applicable because they tend to focus on management teams or the development of business plans while failing to address critical marketing dimensions.

Selling Today: Partnering to Create Value, Global Edition AMACOM

This book, first appearing in German in 2004 under the title *Spezielle Relativitätstheorie für Studienanfänger*, offers access to the special theory of relativity for readers with a background in mathematics and physics comparable to a high school honors degree. All mathematical and physical competence required beyond that level is gradually developed through the book, as more advanced topics are introduced. The full tensor formalism, however, is dispensed

with as it would only be a burden for the problems to be dealt with. Eventually, a substantial and comprehensive treatise on special relativity emerges which, with its gray-shaded formulary, is an invaluable reference manual for students and scientists alike. Some crucial results are derived more than once with different approaches: the Lorentz transformation in one spatial direction three times, the Doppler formula four times, the Lorentz transformation in two directions twice; also twice the unification of electric and magnetic forces, the velocity addition formula, as well as the aberration formula. Beginners will be grateful to find several routes to the goal; moreover, for a theory like relativity, it is of fundamental importance to demonstrate that it is self-

contained and without contradictions. Author's website: www.relativity.ch.

Some say I am a lucky guy, because I figured it out before it was too late. I figured out what truly matters in life and I live my life by those principles. I almost missed out. I allowed myself to get caught up in life's spin cycle. Too much work, allowing things that ultimately meant nothing to consume my life, being too busy to savor the simple things in life, thinking net worth was the true goal...well, not anymore. As I look around, what amazes me is that everybody wants the same things: We want to be happy, get out of the rat race, enjoy life, have fun, persevere through adversity, maximize joy, take

risks, and be proud of who we are, what we have accomplished and the legacy we will leave. I know that because in my 30-year career as a sales executive, entrepreneur, public speaker, and faculty member at top companies and business schools, I have seen it with my own eyes. I have engaged with literally thousands of people of all ages, all over the world. They all want life worth. They want joy and contentment with their lives. They know they need it, they just don't know how to get it. I do. I did it. I am a lucky guy because I figured it out at an age when I could apply it. It wasn't too late. And it is also surprisingly simple, if you know the secrets. The purpose of this book is to share with people of all ages the secrets to achieving a high life worth at any age.

Life is too awesome to not be enjoyed every day in every way. It can be done. I know, because I am living it.
