## **HICKS KOCH**

---

The Student's Vocabulary  
Adapted to All Systems of  
Shorthand Writing  
Kessinger Publishing  
This volume contains paper  
selected for presentation at  
the 6th IAPR Workshop on  
Document Analysis  
Systems (DAS 2004) held

during September 8–10,  
2004 at the University of  
Florence, Italy. Several  
papers represent the  
state of the art in a broad  
range of “traditional”  
topics such as layout  
analysis, applications to  
graphics recognition, and  
handwritten documents.  
Other contributions  
address the description of  
complete working  
systems, which is one of

the strengths of this  
workshop. Some papers  
extend the application  
domains to other media,  
like the processing of  
Internet documents. The  
peculiarity of this 6th  
workshop was the large  
number of papers related  
to digital libraries and to  
the processing of  
historical documents, a  
task which frequently  
requires the analysis of

color documents. A total of 17 papers are associated with these topics, whereas two years ago (in DAS 2002) only a couple of papers dealt with these problems. In our view there are three main reasons for this new wave in the DAS community. From the scientific point of view, several research fields reached a thorough knowledge of techniques and problems that can be effectively solved, and this expertise can now be applied to new domains. Another incentive has

been provided by several research projects funded by the EC and the NSF on topics related to digital libraries.

### **The Phonographic Magazine**

Heinemann A shorthand outline for almost every word in the English language. The GREGG Shorthand Dictionary Simplified is divided into two parts: Part I contains 26,098 words most commonly used in notation with their official shorthand outlines. Also included are words that are frequently used in such fields as medicine,

law, engineering, chemistry, and many others. These words represent a large range of vocabulary, omitting derivatives that are not needed in shorthand. Part II contains 2,604 proper names and geographic expressions including a list of 72 commonly used abbreviations. This valuable reference should be part of the library of every shorthand writer. *The American Short-hand Writer* Legal Studies, to Wit Legal Studies, to Wit Thomson South-

 Scientific  
 This book presents 17  
 selected papers from the  
 4th International  
 Graphonomics Society  
 Conference, held at the

University of Trondheim (Norway) in July 1989. It focusses on different aspects of automatic processing of handwriting by computer. The book is divided into three sections. The first one surveys the research works done on automatic signature verification over the last 25 years. The second section deals with problems related to the design of on-line cursive script recognition and the implementation of this technology into an electronic pen pad. The third section focusses on

the integration of contextual knowledge in these systems.  
Notes on Abbreviations in Greek Manuscripts (1889)  
 McGraw-Hill Prof Med/Tech

A flexible course that includes both a text-workbook and audiocassettes and can be used in a variety of learning situations for all non-lawyer legal personnel, including court reports. This text is a well-organized presentation of common legal terms that uses the proven methods of teaching and learning

that were utilized in previous editions. Includes reference sections, including proofreaders' marks and a list of easily confused words for developing proofreading and transcribing skills. Comprised of 32 lessons including legal terms used in various areas of the law.

 CONTROL MARK THE  
 ENCYCLOPAEDIA... AND  
 DICTIONARY OF  
 EDUCATION SHORTHAND  
 (PITMAN'S), THE  
 TEACHING OP.?Pitman's  
 Shorthand, or  
 Phonography as it was  
 called when it was first  
 published, and as it is still  
 most generally known, is  
 a method of rapid writing,  
 invented by Sir Isaac  
 Pitman in 1837, and now

in general use throughout  
 the English-speaking  
 world. Pitman's shorthand  
 is both a science and an  
 art or craft. The system  
 has very considerable  
 educational value, since it  
 brings into constant  
 exercise the analytical  
 powers of the practitioner  
 and calls for his close  
 concentration upon the  
 subject matter of which  
 he is taking notes. The  
 practice of the art of  
 shorthand undoubtedly  
 and necessarily increases  
 the vocabulary of the  
 writer, and it is interesting  
 to note (at least as shown

in the experience of the  
 present writer) that the  
 shorthand writer is always  
 conscious of the fact  
 when he writes a word in  
 shorthand for the first  
 time. The mastery of  
 Pitman's shorthand can  
 easily be co-ordinated  
 with the study of English,  
 and with great advantage  
 to both subjects. As to its  
 utilitarian value it is  
 sufficient to say that  
 practically the whole of  
 the business  
 correspondence of the  
 world is in the first  
 instance dictated to  
 shorthand writers, and

afterwards transcribed from notes into typescript or into ordinary longhand writing. Pitman's shorthand is also in universal use by professional reporters in the Law Courts, the Houses of Parliament, and elsewhere. There are, besides, thousands of professional men and women who find a knowledge of the system

of immense service as a time-saver and as a means of taking very full notes of matters that would otherwise have to be memorized or noted but briefly. ...
