Programs in Brief Fao

Much as in other locations around the world, civil uprising, particularly rooted in the activism of young people and students, plagued France during May of 1968. Massive strikes and occupations succeeded in paralyzing France's economy and bringing the country to the verge of a leftist revolution. This book studies the life trajectories of many ordinary protestors during the period, using statistics and personal narratives to analyze how this activism arose, its impact on people's personal and professional lives, and its transmission through familial generations.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work,

as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Deferred Maintenance Reporting for Federal Facilities Abbas Mirza

This Dictionary covers information and communication technology (ICT), including hardware and software; information networks, including the Internet and the World Wide Web; automatic control; and ICT-related computer-aided fields. The Dictionary also lists abbreviated names of relevant organizations, conferences, symposia and workshops. This reference is important for all practitioners and users in the areas mentioned above, and those who consult or write technical material. This Second Edition contains 10,000 new entries, for a total of 33,000.

Uniform Materiel Movement and Issue Priority System (Ummips) Springer Nature

Uncertainty surrounds the use of publicity as a means of controlling corporate crime. On the one hand, some agree with Justice Brandeis's dictum that light is "the best of disinfectants...the most

efficient policeman." On the other hand, many believe that corporations' internal affairs are effectively shrouded with a thick fog that prevents the light of public scrutiny from reaching them. The Impact of Publicity on Corporate Offenders is the first study to go beyond the rhetoric, through an examination of corporate experience. Fisse and Braithwaite have carried out a qualitative inquiry concerning 17 large corporations involved in publicity crises. Based mainly on interviews, the inquiry includes company employees and former employees, union officials, officers of government regulatory agencies, competitors, independent accountants, government prosecutors, public interest activists, judicial officers, stockbrokers, and other experts.

Fire Support Coordination in the Ground Combat Element DIANE Publishing

Based on the popular Artech House classic, Digital Communication Systems Engineering with Software-Defined Radio, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters,

as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.

The Chaos Scenario SUNY Press

Many industries have begun to recognize the potential support that unmanned aerial vehicles (UAVs) offer, and this is no less true for the commercial sector. Current research on this field is narrowly focused on technological development to improve the functionality of delivery and endurance of the drone delivery in logistics, as well as on regulatory challenges posed by such operations. There is a need for further attention to be applied to operational and integration challenges associated with UAVs. *Unmanned Aerial Vehicles in Civilian Logistics and Supply Chain Management* is a collection of innovative research that investigates the opportunities and challenges for the use of UAVs in logistics and supply chain management with a specific aim to focus on the multifaceted impact of drone delivery. While highlighting topics including non-military operations, public management, and safety culture, this book is ideally designed for government administrators, managers, industry professionals, researchers, and students.

Technical Information Release Legare Street Press

Evolutionary architecture attempts to evolve form and structure in emulation of the evolutionary processes of nature. It considers architecture as a form of artificial life. This approach has formed the basis for the author's teaching programme for AA Diploma Unit II.

What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it? In this fascinating, terrifying, instructive and often hilarious book, Bob Garfield of NPR and Ad Age, chronicles the disintegration of traditional media and marketing but also travels five continents to discover how business can survive--and thrive--in a digitally connected, Post-Media Age. He calls this the art and science of Listenomics. You should listen, too.

In 1996 the Federal Accounting Standards Advisory Board (FASAB) 1 enacted Standard Number 6, Accounting for Property, Plant, and Equipment (PP&E), the first government-wide initiative requiring federal agencies to report dollar amounts of deferred maintenance annually. The FASAB has identified four overall objectives in federal financial reporting: budgetary integrity, operating performance, stewardship, and systems and control. FASAB Standard Number 6, as amended, focuses on operating performance and stewardship. The FFC Standing Committee on Operations and Maintenance has prepared this report to identify potential issues that should be considered in any future amendments to the standard and to suggest approaches for resolving them. The committee's intent is to assist the CFO Council, federal agencies, the FASAB, and others as they consider how best to meet the objectives of federal financial reporting for facilities.

Shaping Political Generations Artech House

This book, as a part of a series of CERES publications, provides a multi-regional and cross-sectoral analysis of food and water security, especially in the era of climate risks, biodiversity loss, pressure on scarce resources, especially land and water, increasing global population, and changing dietary preferences. It includes both conceptual research and empirically-based studies, which provides context-specific analyses and recommendations based on a variety of case studies from Africa, Middle East, and Asia regarding the fostering of long-term resilience of food and water security. The core approach of the volume consists of: assessing the structural drivers affecting the vulnerability of food and water security, under the persistence of current trends; identifying the best solutions and practices to enhance the climate resilience for food and water security; and fostering climate adaptation and biodiversity protection for food and water security. Protest and Social Movements

One of the early set of reforms that South Africa embarked on after emerging from apartheid was in the water sector, following a remarkable, consultative process. The policy and legal reforms were comprehensive and covered almost all aspects of water management including revolutionary changes in defining and allocating rights to water, radical reforms in water management and supply institutions, the introduction of the protection of environmental flows, and major shifts in charging for water use and in the provision of free basic water. Over ten years of implementation of these policy and legislative changes mean that valuable lessons have already been learned and useful experiences gained in the challenge of effective water resources management and water services provision in a middle income country.

Unmanned Aerial Vehicles in Civilian Logistics and Supply Chain Management IGI Global

Control problems offer an industrially important application and a guide to understanding control systems for those working in Neural Networks. Neural Systems for Control represents the most up-to-date developments in the rapidly growing application area of neural networks and focuses on research in natural and artificial neural systems directly applicable to control or making use of modern control theory. The book covers such important new developments in control systems such as intelligent sensors in semiconductor wafer manufacturing; the relation between muscles and cerebral neurons in speech recognition; online compensation of reconfigurable control for spacecraft aircraft and other systems; applications to rolling mills, robotics and process control; the usage of past output data to identify nonlinear systems by neural networks; neural approximate optimal control; model-free nonlinear control; and neural control based on a regulation of physiological investigation/blood pressure control. All researchers and students dealing with control systems will find the fascinating Neural Systems for Control of immense interest and assistance. Focuses on research in natural and artificial neural systems directly applicable to control or making use of modern control theory Represents the most up-to-date developments in this rapidly growing application area of neural networks Takes a new and novel approach to system identification and synthesis

"TOPPERS' NOTES for CIVIL SERVICES EXAMINATION" by Abbas Mirza, coaching expert is a comprehensive yet concise book meant for all the stages of the Civil Services Examination conducted by UPSC and State PSCs. The book covers the complete new syllabus of Preliminary as well as Mains stages. It is often seen students not being able to finish the complete syllabus due to vastness of the syllabus as well as lack of time. Keeping this in mind the book is prepared with utmost care while selecting the important topics and making it concise at the same time so as to be grasped easily by the students within time. Because of the comprehensiveness of the Civil Services Syllabus, this book will also be found very useful for SSC, IBPS and all other competitive examinations. Wishing you good luck! The contents are: 1. INDIAN POLITY 2. INDIAN GEOGRAPHY 3. INDIAN ECONOMY 4. INDIAN HISTORY 5. WORLD HISTORY 6. INDIAN HERITAGE AND CULTURE 7. ENVIRONMENT, BIODIVERSITY, CLIMATE CHANGE AND DISASTER MANAGEMENT 8. INDIA: INTERNATIONAL RELATIONS 9. SCIENCE AND TECHNOLOGY IN INDIA 10. SECURITY ISSUES OF INDIA 11. ETHICS, INTEGRITY AND APTITUDE.

Essential tools and guidance for effective nonprofit financial management Financial Management for Nonprofit Organizations provides students, professionals, and board members with a

comprehensive reference for the field. Identifying key objectives and exploring current practices, this book offers practical guidance on all major aspects of nonprofit financial management. As nonprofit organizations fall under ever-increasing scrutiny and accountability, this book provides the essential knowledge and tools professional need to maintain a strong financial management system while serving the organization's stated mission. Financial management, cash flow, and financial sustainability are perennial issues, and this book highlights the concepts, skills, and tools that help organizations address those issues. Clear guidance on analytics, reporting, investing, risk management, and more comprise a singular reference that nonprofit finance and accounting professionals and board members should keep within arm's reach. Updated to reflect the post-recession reality and outlook for nonprofits, this new edition includes new examples, expanded tax-exempt financing material, and recession analysis that informs strategy going forward. Articulate the proper primary financial objective, target liquidity, and how it ensures financial health and sustainability Understand nonprofit financial practices, processes, and objectives Manage your organization's resources in the context of its mission Delve into smart investing and risk management best practices Manage liquidity, reporting, cash and operating budgets, debt and other liabilities, IP, legal risk, internal controls and more Craft appropriate financial policies Although the U.S. economy has recovered, recovery has not addressed the systemic and perpetual funding challenges nonprofits face year after year. Despite positive indicators, many organizations remain hampered by pursuit of the wrong primary financial objective, insufficient funding and a lack of investment in long-term sustainability; in this climate, financial managers must stay up-to-date with the latest tools, practices, and regulations in order to serve their organization's interests. Financial Management for Nonprofit Organizations provides clear, in-depth reference and strategy for navigating the expanding financial management function.

When a debt is seriously delinquent and the creditor sells the debt or refers the debt either to a collection agency or to an internal collection department, the collector or creditor can separately report the account to one or more of the three largest nationwide consumer reporting agencies (NCRAs) as an account in collections. The presence of a collections tradeline can have a negative impact on a consumer's credit score. There are currently an estimated 220 million consumers with a credit report at one or more of the NCRAs. Collections tradelines affect the reports of nearly one out of three of these consumers. Consumers are far more likely to dispute the accuracy of these tradelines than of other information contained on their credit reports. Roughly half of all collections tradelines that appear on credit reports are reported by debt collectors seeking to collect on medical bills claimed to be owed to hospitals and other medical providers. These medical debt collections tradelines affect the credit reports of nearly one-fifth of all consumers in the credit reporting system. This paper describes characteristics of the medical and non-medical collections tradelines on consumers' credit reports and the processes by which they appear and disappear. It draws on analysis of data contained in the Consumer Financial Protection Bureau's (CFPB) Consumer Credit Panel (CCP); consumer complaints to the CFPB about collections; and interviews with debt collection agencies, healthcare providers, and other observers of the healthcare billing and payment processes. The CFPB has not sought to verify original research introduced in this paper through its supervisory authorities. The paper does not draw upon supervisory information the CFPB has learned through examinations it has conducted, and does not make conclusions about whether any specific market participants are in compliance with particular statutes or rules pertaining to consumer reporting.
