picked to act. Most ebook files open on your computer using a

program you already have installed, but with your smartphone,

you have to have a specific e-reader app installed, which your

phone probably doesn't come with by default. Pearson Education

Chemistry Chapter 11 Answers 11.2 Types of Chemical Reactions >

13 A decomposition reaction is a chemical change in which a

single compound breaks down into two or more simpler products.

• Decomposition reactions involve only one reactant and two or

more products. • The products can be any combination of

elements and compounds. • Most decomposition reactions

require energy

Introduction to Chemistry Principles, Eleventh Edition focuses on

the most important topics - omitting organic and biochemistry
