AXEL FREEMAN

The Park and Recreation Professional's Handbook Jones & Bartlett Publishers
 This edition probes the importance of leadership in the recreation, parks, and leisure service industry. Integrating theory with practice, the book focuses on a number of interrelated elements that influence leadership in recreation, parks, and leisure service organizations such as theoretical and foundational information, leaders within groups, and leadership within a number of recreation, parks, and leisure service settings.--[book cover]
[A Preliminary Agenda for Recreation](#)

Recreational Sport provides readers with a foundation in the concepts of recreational sport. Based on current research and offering real-world applications, it will help readers understand how to design, deliver, and manage recreational sport programs no matter what setting they find themselves in.

Kraus' Recreation and Leisure in Modern Society NYU Press

This is a comprehensive resource for recreation and leisure studies curriculums that presents theoretical and practical content for the professional's role in sports programming as it relates to all recreational organisations and agencies- youth/adult leagues, tournaments, club

activity, and drop-in play. With its in-depth look at the delivery of sport programming, this text includes a sound theoretical foundation, detailed sports delivery responsibilities, plus key information regarding resource connections and administrative involvement. It is a practical, hands-on resource for all future professionals.

Leisure Programming for Baby Boomers Human Kinetics

Meeting the needs of customers through effective recreation programs is imperative for leisure service organizations to survive and prosper in the twenty-first century. The authors of this book break new ground for recreation programming by interpreting it within the servant leadership approach. Servant

leadership is based on the premise that all recreation providers serve their customers through programs. The servant leadership approach simultaneously enhances the personal growth of workers and improves the quality and caring of our many institutions through a combination of teamwork and community, personal involvement in decision making, and ethical and caring behavior. Whether a leisure services professional works for a municipal recreation department providing recreational sports leagues for adults, or for a nonprofit organization providing special events, or as a commercial tour operator offering wilderness backpacking trips, *Programming for Parks, Recreation, and Leisure Services: A Servant Leadership Approach* provides both cutting-edge concepts and practical knowledge for successful programming.

Outdoor Recreation Back Bay Books Never HIGHLIGHT a Book Again Virtually all testable terms, concepts, persons, places, and events are included. Cram101 Textbook Outlines gives all of the outlines, highlights, notes for your textbook with optional online practice tests. Only Cram101 Outlines are Textbook Specific. Cram101 is NOT the Textbook.

The baby boomers—those born between 1946 and 1964—are a generation that consists of nearly 76 million Americans. Beginning in 2011, this large and influential population will begin their transition out of the workforce. As baby boomers enter retirement, they will be looking for opportunities in fitness, sports, outdoors, arts and cultural events, and other activities that suit their vibrant lifestyles. With their varied life experiences, values, and expectations, baby boomers are predicted to redefine the meaning of recreation and leisure

programming for mature adults. Though many researchers have forecast the boomers' impact on the future, only *Leisure Programming for Baby Boomers* addresses key information that recreation and leisure professionals need in order to make program decisions with baby boomers in mind. The authors combine their research, programming, and marketing expertise to provide insights into the values and lifestyle choices of boomers and offer programming and marketing strategies to reach this large and influential population. *Leisure Programming for Baby Boomers* will help you move beyond the traditional offerings of bingo, art classes, and social dances to capture the attention and imagination of your baby boomer community. This comprehensive guide offers these features: -An in-depth review of current research to help you understand the values, interests, and needs of the boomer generation -Guidance in adopting a "boomer lens" so you can more easily recognize the opportunities in working with this group and create and market programs that appeal to the values of this unique generation -The Cochran Baby Boomer Quiz, a tool that can be used not only in assessing the programming preferences of the boomers in your community, but also in testing your staff's knowledge of boomers and preparing them to work more effectively with this group -Strategies, guidelines, and ready-to-use ideas for boomer-specific programming in arts and culture, outdoor recreation, education, wellness, and tourism -Marketing templates and strategies that will attract boomers and keep them coming to your programs With *Leisure Programming for Baby Boomers*, you'll discover what distinguishes the baby boomer generation from previous generations in regard to their demographic makeup, gender differences, cultural influences, brand loyalty, consumer behavior, and spending patterns. Based on current research, *Leisure Programming for Baby Boomers* explains the boomer generation in terms of five value areas specific to recreation and leisure programming: cultural influences, healthy aging and society, retirement, leisure pursuits, and economic levels. Using this knowledge, you'll learn how to consider these generational values to create effective marketing messages and plan appropriate programming. *Leisure Programming for Baby Boomers* presents a range of detailed program ideas and formats that fulfill the interests of this new clientele so you can start offering new programs right away. It

also offers guidelines and examples that will help you plan your own programs to meet the needs of your community. You'll find all the tools you need to market your new programs, including techniques for attracting boomers to your programs and marketing templates that make implementing your marketing strategies simpler. Information on key topics such as marketing psychology; advertising beyond the brochure; motivating, recruiting, and communicating at the front lines; and creating and maintaining a focused image will help you better understand how to market programs. In this demand-driven occupation, recreation professionals must be prepared to market and deliver a wide range of leisure opportunities to serve the boomer generation. Is your recreation or leisure program ready for the baby boomers? *Leisure Programming for Baby Boomers* will help you understand the unique profile of the boomer generation and respond with creative programs that will add value and quality to the leisure lives of this new generation of mature adults.

An Introduction Human Kinetics

Evaluation is a process that each of us uses every day. Professionals in any field of human services must have the means to access and assess information. Having information is not enough, however, unless that information can be applied and used. To organize and manage recreation services (i.e., all elements related to the various specialties in the field such as parks, tourism, sports, arts, therapeutic recreation, camping, event management), information is needed about people's preferences, needs, and behaviors and the programs, administrative structures, and resources that comprise the organizations. To build a body of knowledge and to document the value of recreation, systematic processes are necessary. Evaluation and research can provide information that will enable "enlightened decisions." *Evaluating Recreation Services: Making Enlightened Decisions*, Fourth Edition, is about systematic evaluation and research that focuses specifically on identifying explicit evaluation criteria or research questions, collecting evidence or data, and making judgments about the value or the worth of something applied to service improvement or knowledge development. This book aims to provide a basic overview and working knowledge of procedures. Knowing basic steps in evaluation research and having some familiarity with evaluation and research tools can help you to begin a process of lifelong learning about systematic inquiry.

Including People with Disabilities in

Parks and Recreation Opportunities

Human Kinetics

Recreation Facility Management: Design, Development, Operations, and Utilization presents a comprehensive introduction to the field of facility design, management, and maintenance for practicing or future recreation professionals.

A New Approach for Creating Sustainable, Resilient Communities Human Kinetics

Used in numerous universities throughout the United States, Canada, Australia, and New Zealand, this book provides programming insights for educators, practitioners, and students. The book will present readers with the vital tools necessary in providing successful programs for their patrons.

Designing Leisure Experiences

Gardners Books

In the 21st century, recreation and leisure programmers will face many social, cultural, economic, and environmental changes that affect the recreation and leisure needs, interests, and attitudes of the people they serve. These changes require recreation and leisure programmers who are highly skilled, knowledgeable, and competent in planning, organizing, implementing, and evaluating recreation and leisure programs and services, with the goal of creating high quality, high impact leisure experiences. Recreation and Leisure Programming: A 21st Century Perspective provides key insights into the strategies, practices, procedures, and methods for recreation and leisure programmers to employ to fulfill their responsibility successfully.

Promoting Individual and Community Health at the Library Human Kinetics

Organized on a chapter-by-chapter basis, this workbook provides reflective exercises designed to help students and professionals apply the knowledge and materials found throughout Programming for Parks, Recreation, and Leisure Services: A Servant Leadership Approach. **A Proposed Adaptive Use Program : Technical Report** Human Kinetics

The "Park and Recreation Professional's Handbook" offers a thorough grounding in all areas of programming, leadership, operations, administration, and professionalism. It integrates foundational concepts, the latest research, and real-world examples to present readers with a complete picture of all of the skills needed for success in the field.

A Servant Leadership Approach Sagamore Pub Llc

Recreation Programming: Designing, Staging, and Managing the Delivery of Leisure Experiences incorporates

information and techniques based on current knowledge about experiencing leisure and the current professional techniques and practices that programmers need to learn and master to design, stage, evaluate, and manage leisure experiences in any organization including government, commercial, and not-for-profit agencies. This eighth edition teaches the programmer to design and stage program services by learning the theory and techniques of recreation programming including (1) basic leisure theory that explains how leisure is experienced; (2) the generic structure of situated activity systems in which social interaction produces leisure experiences; (3) how programs are designed; and (4) procedures and techniques that programmers use to stage, evaluate, and manage recreation programs in a variety of agencies.

Studyguide for Programming for Parks, Recreation, and Leisure Services by Jordan, Debra J. Cram101

Management of Park and Recreation Agencies is sponsored by the Commission for Accreditation of Park and Recreation Agencies (CAPRA) in order to share with professionals'now and in the future'the desirable practices of the profession embodied in the National Accreditation Standards for park and recreation agencies. These standards are used as the guideline for what should be included in the book. Each chapter addresses specific standards needed for accreditation. The purpose of the book is to help administrators of every area of parks and recreation, including those in for-profit, nonprofit, commercial, and public operations. The emphasis is on public park and recreation agencies because those are the agencies for which the standards were written. However, each standard can be used by any agency that provides park and recreation facilities, programs, or services. It is geared to managers and what they need to know, not to the program or maintenance supervisors.

Human Kinetics

Armed with this book's expert advice and plentiful examples of successful initiatives, public libraries will feel empowered to make a difference in community members' health and well-being.

Therapeutic Recreation Leadership and Programming Programming for Parks, Recreation, and Leisure Services A Servant Leadership Approach

Over the past 150 years, communities have focused their attention on enhancing quality of life, health and wellness, and the greening of their environments through the provision of park and recreation

services and amenities. The greening and beautification of communities as well as tying recreation services to clean economic development provide a direct connection between the work public park and recreation departments and community development. This text asks students to consider important questions, such as: What are the most important elements of a livable community? In what type of community they would like to live? How important are building social connections amongst family, friends, neighbors, colleagues, and others? How are such relationships developed and sustained? What types of organizations are more likely to create such opportunities for building ones social capital? What agencies in the community are concerned with addressing environmental degradation and on the flipside enhancing community beautification and greening? All of these questions point toward the importance of public parks and recreation and its community development efforts.

Community Parks & Recreation: An Introduction is organized into three major parts. Part I focuses on the History and Philosophical Foundations of Public Parks and Recreation. The major intent of this section is to provide an underpinning to assist the student in understanding the major dimensions of public parks and recreation and its impact socially, culturally, environmentally and economically. Part II of the book focuses on Managerial and Administrative Aspects of Park and Recreation Systems. This section of the book provides practical strategies for administrative activities, planning, marketing, budgeting, engaging the public and land acquisition. Part III of the book is focused on The Public Sector Service Provision in Parks and Recreation. This section of the book focuses on program and service delivery including chapters dealing with programming for community recreation, youth programming, programming for adults and seniors, programming special events and community-based therapeutic recreation. The authors of this text all share a deep interest in community, parks, and/or recreation services. At various times in their careers, they have served as playground leaders, recreation specialists, youth leaders, community therapeutic recreation specialists, recreation center directors, recreation supervisors and/or directors of parks and recreation. The authors hold a strong commitment to community parks and recreation that is clearly reflected in this new text.

Steps to Successful Programming Human

Kinetics

To find solutions to the critical problems facing the recreation and park profession, its leaders must become effective problem solvers. This book offers a problem-solving model that should aid such leaders in developing a systematic approach to the vital issues they confront. It also includes a series of case studies depicting typical day-to-day problems faced by administrators, supervisors, leaders, and recreation and park boards and commissions. Certainly, a book of this type should not be limited to classroom use. It is hoped that its concepts and ideas can also be effectively used in staff development programs and in-service training, as well as by park and recreation boards, military installations, hospitals, conservation agencies, penal institutions, commercial recreation enterprises, colleges and university administrations, state departments, and other agencies concerned with recreation and park problems. What is important is that the problems a person is likely to encounter, and these are for the most part predictable, are those for which students and practitioners have been prepared. I attempt to combine practical with academic approaches to problem solving, offering both the theoretical and pragmatic viewpoints, combining these wherever possible. For these reasons, this book should be useful not only for teaching park and recreation students how to handle hypothetical problems systematically, but as an update and refresher for those involved with actual problems in agencies and organisations.

Learning to resolve a dilemma ethically is a complex skill that recreation leaders and managers must learn in order to be successful, because they face ethical issues every day. They must ask themselves, "What is the right thing to do in this situation?" "Is my decision ethical for everyone involved?" "How will my decision affect each of the stakeholders--and my career?" Teaching applied ethics requires an understanding of how moral dilemmas can be justly resolved as well as techniques and approaches to accomplish these goals. *Issues in Recreation and Leisure: Ethical Decision Making* guides students through this complex process of resolving real-life recreation dilemmas by presenting activities, techniques, and a field-tested three-step process. This process helps students develop sound approaches to dealing with contemporary issues in leisure and recreation. In addition, this text contains the following features: -Thematic chapters that address current major issues in recreation management, therapeutic recreation, outdoor recreation, tourism, and culture so that students can comprehend the range of issues in these diverse areas of recreation -Eight case studies based on current dilemmas from a variety of recreation and leisure settings, providing students with valuable practice in applying

the three-step method for resolving ethical dilemmas -Learning activities in each chapter that help students apply leisure philosophy to resolve dilemmas Part I explores ethics in leisure services and examines how dilemmas are naturally solved. It covers ethical theory and introduces a three-step method that can be widely applied. Students learn how recreation professionals worked through an actual dilemma and how their problem-solving strategies affect their solutions and their careers. Part II presents real-life dilemmas common to a variety of leisure management areas, ethical issues in therapeutic recreation, and problems in outdoor education. The authors also tackle various issues surrounding tourism, including culture, sex tourism, the natural environment, and virtual tourism. Part III contains a consideration of professionalism in parks and recreation and related fields, a peek into the future, and eight contemporary case studies drawn from leisure services fields. These case studies test students' abilities to apply ethical problem solving by using the three-step method presented earlier in the book. The studies present issues in four major areas of recreation and leisure. *Issues in Recreation and Leisure: Ethical Decision Making* provides new insights into the recreation and leisure profession. It comes with a flexible format that can be used for one- to three-credit-hour courses in recreation issues. It arms students with the theory and knowledge they need for ethically resolving dilemmas. As such, it prepares them to make a difference as effective leisure service providers.
