The West, Byzantium and the Islamic World, 300-1100 Pearson Higher Ed

This book charts the way towards a better, repurposed globalization, which it calls 'reglobalization', and shows how this can be built, incrementally but realistically, via reforms to the partial and fragile existing structures of global governance. In making this argument, the book firmly rejects the new fashion for a politics of deglobalization, which has appeared of late in both left-wing and right-wing variants. Instead, it suggests that a reformed Group of 20 (G20), for all its current inadequacies, can still provide the critical coordinating function that the management of a process of reglobalization requires. The book argues that globalization is too important to be lost; rather, it needs to be saved from its capture by neoliberalism and rebuilt around different values for a post-neoliberal era. The emergence of global pandemic as an issue only goes to emphasise the necessity, importance and urgency of the reglobalization project. Reglobalization is essential reading for everybody living in the era of globalization, which is all of us, and worried about its many economic, social and political problems, which is a growing number of us. The chapters in this book were originally published in the journal Globalizations.

Christians, Zoroastrians, and Iranian Political Culture in Late Antiquity Harper Collins

In this groundbreaking biography, celebrated author James McGrath Morris skillfully illuminates the life and accomplishments of pioneering journalist Ethel Lois Payne, while also bringing to the fore the critical role of the black press in the civil rights era. Payne used her journalistic skills as the Washington correspondent for the Chicago Defender to elevate civil rights issues to the national agenda. In the 1950s and 1960s, she raised challenging questions at presidential press conferences about matters of importance to African Americans and the emerging civil rights movement. A self-proclaimed "instrument of change," she publicly prodded President Dwight D. Eisenhower to support desegregation, and her reporting on legislative and judicial civil rights battles enlightened and motivated black readers. At some considerable personal risk, Payne covered such events as the Montgomery bus boycott, the desegregation of the University of Alabama, and the Little Rock school crisis. She also traveled overseas to write about the service of black troops in Vietnam and accompanied American leaders on diplomatic missions to Africa. President Lyndon B. Johnson recognized Payne's seminal role by presenting her with pens used in the signing of the Civil Rights Act and the Voting Rights Act. As a trailblazing black woman in an industry dominated by white men, she capped her career by becoming the first female African American radio and television commentator on a national network, working for CBS. Ethel Payne's unassuming style of journalism was a key to her success. From Alabama to Ghana, from Indonesia to Vietnam, Payne's reporting eschewed the emotionless objective style coveted by mainstream publications of her time. She became for many black Americans their eyes on the frontlines of the struggle for equality in Washington, in the South, and in Africa. The white and black presses, operating in parallel worlds, saw events differently. The white press was quick to portray civil rights legislation as munificent gifts bestowed on American blacks, while Payne's reporting focused on the failures of legislation to grant African Americans the equality that rightfully belonged to them. Ethel Payne's life and work offers readers an opportunity to see the historic events of the civil rights era through her eyes. Inspiring and instructive, moving and enlightening, *Eye on the Struggle* celebrates this extraordinary woman and her achievements—and reminds us of the power one person has to transform our lives and our world.

The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets, and prompted a fundamental reconsideration of the design of financial regulation. As the financial system has become ever-more complex and interconnected, the pace of evolution continues to accelerate. It is now clear that regulation must focus on the financial system as a whole, but this poses significant challenges for regulators. *Principles of Financial Regulation* describes how to address those challenges. Examining the subject from a holistic and multidisciplinary perspective, *Principles of Financial Regulation* considers the underlying policies and the objectives of regulation by drawing on economics, finance, and law methodologies. The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does, rather than what financial regulation is. By analysing specific regulatory measures, the book provides readers to the opportunity to assess regulatory choices on specific policy issues and encourages critical reflection on the design of regulation. Original enlightenment thought (hongaku shiso) dominated Buddhist intellectual circles throughout Japan's medieval period. Enlightenment, this discourse claims, is neither a goal to be achieved nor a potential to be realized but the true status of all things. Every animate and inanimate object manifests the primordially enlightened Buddha just as it is. Seen in its true aspect, every activity of daily life—eating, sleeping, even one's deluded thinking—is the Buddha's conduct. Emerging from within the powerful Tendai School, ideas of original enlightenment were appropriated by a number of Buddhist traditions and influenced nascent theories about the kami (local deities) as well as medieval aesthetics and the literary and performing arts. Scholars and commentators have long recognized the historical importance of original enlightenment thought but differ heatedly over how it is to be understood. Some tout it as the pinnacle of the Buddhist philosophy of absolute non-dualism. Others claim to find in it the paradigmatic expression of a timeless Japanese spirituality. According other readings, it represents a dangerous anti-nomianism that undermined observance of moral precepts, precipitated a decline in Buddhist scholarship, and denied the need for religious discipline. Still others denounce it as an authoritarian ideology that, by sacralizing the given order, has in effect legitimized hierarchy and discriminative social practices. Often the acceptance or rejection of original enlightenment thought is seen as the fault line along which traditional Buddhist institutions are to be differentiated from the new Buddhist movements (Zen, Pure Land, and Nichiren) that arose during Japan's medieval period. Jacqueline Stone's groundbreaking study moves beyond the treatment of the original enlightenment doctrine as abstract philosophy to explore its historical dimension. Drawing on a wealth of medieval primary sources and modern Japanese scholarship, it places this discourse in its ritual, institutional, and social contexts, illuminating its importance to the maintenance of traditions of lineage and the secret transmission of knowledge that characterized several medieval Japanese elite culture. It sheds new light on interpretive strategies employed in pre-modern Japanese Buddhist texts, an area that hitherto has received a little attention. Through these and other lines of investigation, Stone problematizes entrenched notions of "corruption" in the medieval Buddhist establishment. Using the examples of Tendai and Nichiren Buddhism and their interactions throughout the medieval period, she calls into question both overly facile distinctions between "old" and "new" Buddhism and the long-standing scholarly assumptions that have perpetuated them. This study marks a significant contribution to ongoing debates over definitions of Buddhism in the Kamakura era (1185-1333), long regarded as a formative period in Japanese religion and culture. Stone argues that "original enlightenment thought" represents a substantial rethinking of Buddhist enlightenment that cuts across the distinction between "old" and "new" institutions and was particularly characteristic of the medieval period.
