Wir alle haben Geister in unserem Leben. Es sind Facetten unserer Persönlichkeit, die wir nie realisieren konnten. Für jedes Ja stirbt ein Nein, für jeden Jungen, der geboren wird, entsteht der Geist eines Mädchens. Hilary Mantel hat sich ihren Geistern gestellt. In ihrer Autobiografie erzählt sie von ihrem Aufwachsen in einfachsten Verhältnissen und von den Zwängen, denen sich das eigensinnige und träumerische Mädchen unterwerfen muss. Und sie berichtet von ihrer Krankheit, die dazu führen wird, dass sich das Äußere der jungen Frau verändert und sie niemals Kinder gebären wird. Im Angesicht der Geister entscheidet sie sich für ein Geistesleben und wird zu einer der meistgefeierten Autorinnen und wichtigsten sozialkritischen Stimmen Englands. ›Von Geist und Geistern‹ erzählt das bewegte und bewegende Leben einer Frau, die ihre Schwächen immer wieder in Stärken verwandelt hat. Ein Zeugnis, das Mut macht und staunen lässt. [Lehninger Principles of Biochemistry](#) Penerbit Adab For non-majors/mixed biology courses. Paul Fleischman offers teens an environmental wake-up call and a tool kit for decoding the barrage of conflicting information confronting them. We're living in an Ah-Ha moment. Take 250 years of human ingenuity. Add abundant fossil fuels. The result: a population and lifestyle never before seen. The downsides weren't visible for centuries, but now they are. Suddenly everything needs rethinking – suburbs, cars, fast food, cheap prices. It's a changed world. This book explains it. Not with isolated facts, but the principles driving attitudes and events, from vested interests to denial to big-country syndrome. Because money is as important as molecules in the environment, science is joined with politics, history, and psychology to provide the briefing needed to comprehend the 21st century. Extensive back matter, including a glossary, bibliography, and index, as well as numerous references to websites, provides further resources.
