Reintegrating Extremists Allyn & Bacon Delivers the inside story on 6,000 years of personal and public space. John Pile acknowledges that interior design is a field with unclear boundaries, in which construction, architecture, the arts and crafts, technology and product design all overlap.

Dao De Jing Springer Fundamentals of Economics for Business is an innovative text designed specifically for students in business education programs. It provides a

comprehensive yet accessible introduction to the key economic issues relevant to present or future business decision-makers. Reflecting the requirements of globalization, the content is international in scope and is applicable worldwide. The material is easily adaptable to courses of different lengths and educational objectives, including a one-semester MBA course, economics courses in an undergraduate commerce or business degree, or an executive MBA program. This second edition adds significant new material on production costs, managerial economics, growth and competitiveness, and includes new case studies with

applications to international business.

This book deals with the ways in which individuals interact with one another in a market environment. The goal of a well-functioning market is to coordinate the actions of individual agents to bring about results that make all the trading parties better off. Virtually all of the actions and interactions that are of interest in economics have been analyzed with the use of two simple constructs: demand and supply. ISBN 0-256-02996-2: \$38.95.

In all major regions of the world, the economic recession is deep-seated, resulting in mass unemployment, the collapse of state social programs and the impoverishment of millions of people. The meltdown of financial markets was the result of institutionalized fraud and financial manipulation. The economic crisis is accompanied by a worldwide process of militarization, a "war without borders" led by the U.S. and its NATO

allies. This book takes the reader through the corridors of the Federal Reserve, into the plush corporate boardrooms on Wall Street where far-reaching financial transactions are routinely undertaken. Each of the authors in this timely collection digs beneath the gilded surface to reveal a complex web of deceit and media distortion which serves to conceal the workings of the global economic system and its devastating impacts on people's lives.

A chance meeting with a charismatic

photographer will forever change Elizabeth's life. Until she met Richard, Elizabeth's relationship with Georgia O'Keeffe and her little-known Hawaii paintings was purely academic. Now it's personal. Richard tells Elizabeth that the only way she can truly understand O'Keeffe isn't with her mind—it's by getting into O'Keeffe's skin and reenacting her famous nude photos. In the intimacy of Richard's studio, Elizabeth experiences a new, intoxicating abandon and fullness. It never occurs to her that the photographs might be made public, especially without her consent. Desperate to avoid exposure—she's a rising star in the academic world and the mother of young children—Elizabeth demands that Richard dismantle the exhibit. But he

refuses. The pictures are his art. His property, not hers. As word of the photos spreads, Elizabeth unwittingly becomes a feminist heroine to her students, who misunderstand her motives in posing. To the university, however, her actions are a public scandal. To her husband, they're a public humiliation. Yet Richard has reawakened an awareness that's haunted Elizabeth since she was a child—the truth that cerebral knowledge will never be enough. Now she must face the question: How much is she willing to risk to be truly seen and known?

Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and

transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as *lex mercatoria*. This volume analyzes the different legal approaches to international business problems (including the theory of *lex mercatoria*) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

 This book presents an in-depth analysis of how statutory and third sector organisations have faced the challenge of dealing with former 'terrorists'. Offering a theoretically robust, empirically rich account of work with ex-prisoners and those considered 'at risk' of involvement in extremism in the United Kingdom, Marsden dissects the problems governments are facing in dealing with the effects of 'radicalisation'. Increasingly, governments are struggling with the challenge of dealing with those who have become involved in extremism, and yet, comparatively little is known about how and why people renounce violence. Nor are existing efforts to 'deradicalise' extremists well understood. Arguing that

reintegration is a more appropriate framework than 'deradicalisation', Marsden looks in detail at the mechanisms by which people can be supported to move away from extremism. By drawing out implications for policy, practice and academic debates around disengagement from radical subcultures, this book makes a significant contribution to an issue only likely to grow in importance for scholars of criminological theory, terrorism and justice.

Any healthcare professional with, or developing an interest in, clinical nutrition will be able to use this textbook, first published in 2001, as a source of information for the formation

of a clinical nutrition support service of excellence. The first three parts of the book will enable a clear perspective of the metabolism and physiology of clinical nutrition to be related to the practical application of support techniques. The fourth part of the book highlights the role of nutrition support in specific disease groups. A number of additional chapters have been added for this second edition, and modifications made to the content of chapters from the first edition to cover newer areas or areas of omission.

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient

society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of

men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

Published in association with Save the Children Priscilla Alderson examines the often overlooked issue of the rights of young children, starting with the question of how the 1989 UN Convention on the Rights of the Child applies to the youngest children, from birth to eight years of age. The question of finding a balance between young children's rights to protection, to provision (resources and services) and to participation (expressing their views, being responsible) is discussed. The author suggests that, in the belief we are looking after their best interests, we have become overprotective of children

and deny them the freedom to be expressive, creative and active, and that improving the way adults and children communicate is the best way of redressing that balance. This second edition has been updated and expanded to include the relevance of UNCRC rights of premature babies, international examples such as the Chinese one-child policy, children's influence on regional policies, and the influence on young children's lives of policies such as Every Child Matters and those of the World Bank, IMF, OECD and UNICEF. This readable, informative and thought-provoking book is a compelling invitation to rethink our attitudes to young children's rights in the light of new theories, research and practical evidence about children's daily lives. It

will be of interest to anyone who works with young children.

Bradbury argues that almost a century since the emergence of Modernism, it is now possible to see the entire period in perspective. It is clear that the first 50 years - from Henry James, Wilde and

Stevenson, through James Joyce, Lawrence, Forster, to Huxley, Isherwood and Orwell - have been extensively discussed in print. The years since World War II, though, have not been examined in depth, yet have produced talents such as Graham Greene, Angus Wilson, Beckett, Doris Lessing, Margaret Drabble, Angela Carter, Ian McEwan, Kingsley and Martin Amis, Julian Barnes, Fay Weldon, Salman Rushdie and Timothy Mo.

The *Sciences of the Soul* is the first attempt to explain the development of the disciplinary conception of psychology from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth. Fernando Vidal traces this development through university courses and textbooks, encyclopedias, and nonacademic books, as well as through various histories of psychology. Vidal reveals that psychology existed before the eighteenth century essentially as a “physics of the soul,” and it belonged as much to natural philosophy as to

Christian anthropology. It remained so until the eighteenth century, when the “science of the soul” became the “science of the mind.” Vidal demonstrates that this Enlightenment refashioning took place within a Christian framework, and he explores how the preservation of the Christian idea of the soul was essential to the development of the science. Not only were most psychologists convinced that an empirical science of the soul was compatible with Christian faith; their perception that psychology preserved the soul also helped to elevate its rank as an empirical science. Broad-ranging and impeccably researched, this book will be of wide importance in the history and philosophy of psychology, the history of the human sciences more

generally, and in the social and

intellectual history of eighteenth-century Europe.
