Distance learning and remote learning have been developing options within the eLearning and talent training realms for over two decades, yet distance learning has become a significant reality within the past few months, especially as the COVID-19 pandemic has forever impacted the K-12, higher education, and adult training and talent development workforce solutions. Within the rapid shift into remote and distance learning environments, the curricular design and instructional design are understood as necessary. However, there is a need to understand aspects around social learning within eLearning environments. It is important to understand the opportunity of moving towards transformative social learning environmental engagement and experiences within distance and remote learning environments to improve the ability to understand social learning in eLearning environments. eLearning Engagement in a Transformative Social Learning Environment focuses on supporting and enhancing remote and distance learning (eLearning) instructional experiences, discusses the strategic role of social learning within eLearning environments, and enhances levels of engagement, transformative learning, and talent attainment environments. This book provides insights and support towards policies and procedures within instructional and training decision making around social learning needs and support. The chapters will explore social learning opportunities and support, modeling social learning engagement, communities of practice, and instructional processes of eLearning. The intended audience is teachers, curriculum developers, instructional designers, professionals, researchers, practitioners, and students working in the field of teaching, training, and talent development.

Assessment in the Second Language Writing Classroom is a teacher and prospective teacher-friendly book, uncomplicated by the language of statistics. The book is for those who teach and assess second language writing in several different contexts: the IEP, the developmental writing classroom, and the sheltered composition classroom. In addition, teachers who experience a mixed population or teach cross-cultural composition will find the book a valuable resource. Other books have thoroughly covered the theoretical aspects of writing assessment, but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment. Further, no book to date has included an in-depth examination of the machine scoring of writing and its effects on second language writers. Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means to do so. Her highly accessible, thought-provoking presentation of the conceptual and practical dimensions of writing assessment, both for the classroom and on a larger scale, promises to engage readers who have previously found the technical detail of other works on assessment off-putting, as well as those who have had no previous exposure to the study of assessment at all.

Teaching at Its Best This third edition of the best-selling handbook offers faculty at all levels an essential toolbox of hundreds of practical teaching techniques, formats, classroom activities, and exercises, all of which can be implemented immediately. This thoroughly revised edition includes the newest portrait of the Millennial student; current research from cognitive psychology; a focus on outcomes maps; the latest legal options on copyright issues; and how to best use new technology including wikis, blogs, podcasts, vodcasts, and clickers. Entirely new chapters include subjects such as matching teaching methods with learning outcomes, inquiry-guided learning, and using visuals to teach, and new sections address Felder and Silverman's Index of Learning Styles, SCALE-UP classrooms, multiple true-false test items, and much more. Praise for the Third Edition of Teaching at Its Best Everyone—veterans as well as novices—will profit from reading Teaching at Its Best, for it

provides both theory and practical suggestions for handling all of the problems one encounters in teaching classes varying in size, ability, and motivation."—Wilbert McKeachie, Department of Psychology, University of Michigan, and coauthor, McKeachie's Teaching Tips This new edition of Dr. Nilson's book, with its completely updated material and several new topics, is an even more powerful collection of ideas and tools than the last. What a great resource, especially for beginning teachers but also for us veterans!"—L. Dee Fink, author, Creating Significant Learning Experiences This third edition of Teaching at Its Best is successful at weaving the latest research on teaching and learning into what was already a thorough exploration of each topic. New information on how we learn, how students develop, and innovations in instructional strategies complement the solid foundation established in the first two editions."—Marilla D. Svinicki, Department of Psychology, The University of Texas, Austin, and coauthor, McKeachie's Teaching Tips [Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria](#) Frontiers Media SA

"This research publication accommodates in-depth studies that elucidate both the prospects and problems of learning assessment in higher education"—Provided by publisher.

This volume, edited by Grace Veach, explores leading approaches to teaching information literacy and writing studies in upper-level and graduate courses. Contributors describe cross-disciplinary and collaborative efforts underway across higher education, during a time when "fact" or "truth" is less important than fitting a predetermined message. Topics include: working with varied student populations, teaching information literacy and writing in upper-level general education and disciplinary courses, specialized approaches for graduate courses, and preparing graduate assistants to teach information literacy.

Introductory and capstone experiences in the undergraduate psychology program are crucial ways to engage students in their major and psychology department, impart realistic expectations, and prepare them for life beyond college. Providing the right orientation and capstone courses in psychology education is increasingly a concern of instructors, department chairs, program directors, and deans, and both types of courses have become important sources for gathering pre- and post-coursework assessment data for degree learning outcomes. The strategies presented here have been designed to help educators examine issues around teaching the introductory or careers course and developing a psychology-specific orientation program. The authors also provide concrete suggestions for building capstone experiences designed to fit the needs of a department, its pedagogical philosophy, or the educational agenda of the college or university. Undergraduate psychology curriculum designers and instructors can benefit from learning innovative and effective strategies for introducing the major to first-year students and, at graduation, for bringing closure, reinforcing the overall departmental learning outcomes, and helping students apply their disciplinary knowledge in capstone experiences and post-graduate life. In this collection of articles, psychology instructors involved in the improvement of teaching and learning review the research and share their own successes and challenges in the classroom. Discussions include effective practices for helping students become acclimated to and engaged in the psychology major, application of developmental knowledge and learning communities to course design, and use of quality benchmarks to improve introductory and capstone courses. Other chapters describe innovations in the design of stand-alone courses and offer concrete advice on counseling psychology graduates about how to use what they have learned beyond their higher education experiences.

"This book addresses competence in leadership and management, critical thinking, cultural intelligence, information technology, and professional writing, as well as legal and ethical concerns. It focuses on the role of the RN within an inter-professional team, describes the experience of returning to an academic setting, and the challenges of and strategies for accomplishing a successful role transition. Numerous reflective exercises, case vignettes, and online case studies reinforce the content." -- The Lamp Programs that address the transition from practical/vocational nursing to Baccalaureate nursing were virtually nonexistent two years ago; today there are 155 such programs, a number that continues to increase. This is the first text to address the specific educational needs of students transitioning from LPN/LVN to BSN and professional practice. Comprehensive and user-friendly, the text covers every aspect of role transition in the LPN/LVN to BSN course. It is based on the recommendations of the Institute of Medicine's iFuture of Nursingi and the iBSN in 10i initiative. The book provides an overview of professional practice at the BSN level and examines the core, role, and skill competencies required for the Baccalaureate-prepared nurse. The text addresses competence in leadership and management, critical thinking, cultural intelligence, information technology, and professional writing, as well as legal and ethical concerns. It focuses on the role of the RN within an interdisciplinary team, describes the experience of returning to an academic setting, and the challenges of and strategies for accomplishing a successful role transition. Numerous reflective exercises, case vignettes and online case studies reinforce content. Important practice concepts like QSEN and the Essentials of Baccalaureate Education for Professional Nursing Practice are woven throughout the text. A robust ancillary package includes PowerPoints, online quizzes, reflective questions, and case studies. To most people, it appears as if Derek James is a typical college freshman. Yes, he is on a football scholarship at one of the most prestigious universities in the country, but other than that, he appears quite ordinary. But there is an extraordinary secret that Derek is harboring: he is a warlock! When he runs into fellow freshmen Matthias, Omar, and Tre'Veil, he is surprised to learn that they are also warlocks! Shortly after they all meet, however, the freshmen start getting attacked by terrifying monsters. Now, the four fast friends must overcome doubts and disagreements in order to discover the source of the attacks. But it may go deeper than any of them realize.

Multivariate statistics and mathematical models provide flexible and powerful tools essential in most disciplines. Nevertheless, many practicing researchers lack an adequate knowledge of these techniques, or did once know the techniques, but have not been able to keep abreast of new developments. The Handbook of Applied Multivariate Statistics and Mathematical Modeling explains the appropriate uses of multivariate procedures and mathematical modeling techniques, and prescribe practices that enable applied researchers to use these procedures effectively without needing to concern themselves with the mathematical basis. The Handbook emphasizes using models and statistics as tools. The objective of the book is to inform readers about which tool to use to accomplish which task. Each chapter begins with a discussion of what kinds of questions a particular technique can and cannot answer. As multivariate statistics and modeling techniques are useful across disciplines, these examples include issues of concern in biological and social sciences as well as the humanities.

The COVID-19 pandemic radically and rapidly, and perhaps forever, changed the K-20 educational landscape. In March 2020, K-12 schools and institutions of higher education were forced to pivot quickly to online and remote teaching. This new paradigm resulted in many teachers, regardless of content area, being unprepared. In the field of second language teaching and learning, world language and TESOL educators require the investigation of techniques used during the global pandemic to ensure continued success in online teaching practice. The Handbook of Research on Effective Online Language Teaching in a Disruptive Environment provides strong and cogent guidance in the use of pedagogically sound methods of online language instruction. This book builds an innovative knowledge base about teaching during disruptive times in the context of K-20 language learning that is supported with empirical evidence. Covering topics such as online work engagement, reflective practice, and flipped classroom methods, this handbook serves as a powerful resource for instructors of English language arts and TESOL, TESOL professionals, pre-service teachers, professors, administrators, instructional designers, curriculum developers, students, researchers, and academicians.

This book takes a developmental perspective at the use of scoring rubrics to assess student work. Citing developmental characteristics of each age, the author presents examples and adaptations of assessment rubrics on a variety of subjects for teachers from kindergarten through adult/college. After a presentation of foundation information on rubrics, separate chapters are devoted to each grade level from primary through adult. Written so that each chapter can be addressed independently, the book provides additional chapters devoted to assessing technological topics and using rubrics with students with special needs. The final chapters provide practical information to help teachers to create their own rubrics and to convert rubric scores to letter grades. An updated annotated listing of recommended rubric websites is included.
