This book presents 190

full papers from the

Medical Informatics

Europe (MIE 2018)

conference, held in

Gothenburg, Sweden,

in April 2018. The MIE

conferences aim to

enable close

interaction and

networking between an

international audience of academics, health professionals, patients and industry partners. The title of this year's conference is: Building Continents of Knowledge in Oceans of Data - The Future of Co-Created eHealth, and contributions cover a broad range of topics related to the digitalization of healthcare, citizen participation, data science, and changing health systems, addressed from the perspectives of citizens, patients and their families, healthcare professionals, service providers, developers and policy makers. The second part of the title in particular has attracted a large number of papers describing strategies to create, evaluate,

adjust or deliver tools and services for improvements in healthcare organizations or to enable citizens to respond to the challenges of dealing with health systems. Papers are grouped under the headings: standards and interoperability, implementation and evaluation, knowledge management, decision support, modeling and analytics, health informatics education and learning systems, and patient-centered services. Attention is also given to development for sustainable use, educational strategies and workforce development, and the book will be of interest to both developers and practitioners of healthcare services.

With the wide variety of devices, touch points, and channels in use, your ability to control how people navigate your well-crafted experiences is fading. Yet it's still important to understand where people are in their journey if you're to deliver the right content and interactions at the right time and on the right device. This practical guide shows you how storytelling can make a powerful difference in product design. Author Anna Dahlström details the many ways you can use storytelling in your projects and throughout your organization. By applying tried-and-tested principles from

film and fiction to the context of design and business, you'll learn to create great product experiences. Learn how the anatomy of a great story can make a difference in product design. Explore how traditional storytelling principles, tools, and methods relate to key product design aspects. Understand how purposeful storytelling helps tell the right story and move people into action. Use storytelling principles to tell, sell, and present your work.

Harold Kerzner's essential strategies on measuring project management

performance With the growth of complex projects, stakeholder involvement, and advancements in visual-based technology, metrics and KPIs (key performance indicators) are key factors in evaluating project performance. Dashboard reporting systems provide accessible project performance data, and sharing this vital data in a concise and consistent manner is a key communication responsibility of all project managers. This third edition of Kerzner's groundbreaking work, *Project Management Metrics, KPIs, and Dashboards: A Guide to Measuring and Monitoring Project Performance*, helps functional managers

gain a thorough grasp of what metrics and KPIs are and how to use them. Plus, this edition includes new sections on processing dashboard information, portfolio management PMO and metrics, and BI tool flexibility. • Offers comprehensive coverage of the different dashboard types, design issues, and applications Provides full-color dashboards from some of the most successful project management companies, including IBM, Microsoft, and others Aligns with PMI's PMBOK® Guide and stresses value-driven project management PPT decks are available by chapter and a test bank will be available for use in seminar presentations and courses Get ready to

bolster your awareness of what good metrics management really entails today—and be armed with the knowledge to measure performance more effectively.

Numbers can tell an exciting story. The trick is to know what story to tell and make it understandable. This compact, practical guide will show everyone who must

design numeric data how to transform raw data into readable, relevant information. The Designer's Guide to Presenting Numbers, Figures, and Charts brings together the guidelines established over the last forty years for making effective presentations of figures, tables, and graphs. Included are the straightforward steps designers and other professionals can take to make their tables and charts the most meaningful. The authors define and discuss a range of graph types, from simple bar and pie charts to contemporary "data visualizations," offering explanations of the intended application of each. Readers will learn when to use a table, when to use a chart,

which chart is best to use, and how to make all numeric presentations as comprehensible as possible. Specific topics include:
 Rounding numbers
 Table construction
 Chart design Guidance on numbers and page layout
 Color Reference and demonstration tables
 Presenting figures in PowerPoint
 Ordering numbers for decision-making
 Multiple comparisons
 Grids And more
 Communicating information effectively is an increasingly important skill in the digital age. People find numbers persuasive, and well-executed visual presentations of information will influence more people and even shorten meetings. Complete with a glossary and

helpful exercises, this guide offers everything needed to create more-effective presentations.

BI Consulting Group has developed what is recognized as the most complete, most comprehensive set of dashboard and report design “best practice” standards ever developed, specific to Oracle Business Intelligence (formerly Siebel Business Analytics). These best practices have not been created simply to provide a “standard”, instead they are based on the most important litmus test “what standards actually cause dashboards to be used, and what “best practices” of dashboard and report development provide insight into the business, rather than just reports. This guide was started with the Siebel Analytics 7.8.x

platform, before Oracle acquired Siebel. The current version of the guide reflects Oracle's 10.1.3.3.x releases of Oracle Business Intelligence Enterprise Edition (OBIEE). Expect this guide to be enhanced and revised with subsequent major releases of OBIEE.
