Issues in Quality in Healthcare and Quality of Life: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Quality in Healthcare and Quality of Life. The editors have built Issues in Quality in Healthcare and Quality of Life: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the

information about Quality in Healthcare and Quality of Life in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Quality in Healthcare and Quality of Life: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The International Journal of Indian Psychology, Volume 3, Issue 4, No. 56 Frontiers Media SA

Die Diagnostik und Therapie der Altersdepression kann nur interprofessionell und interdisziplinär erfolgreich durchgeführt werden. Daher hat eine Expertengruppe unter der Federführung der Schweizerischen Gesellschaft für Alterspsychiatrie und -psychotherapie (SGAP) Empfehlungen erarbeitet, um die diagnostischen und therapeutischen Interventionsmöglichkeiten im Alltag übersichtlich darzustellen und um die Früherkennung und Therapie der Altersdepression zu fördern. - Ausführliche Darstellung der Epidemiologie, der Pathophysiologie und der Ursachenhypothesen - Alltagsorientierte Darstellung der klinischen Symptomatik und diagnostischen Möglichkeiten - Demenz, Abhängigkeitserkrankungen, Persönlichkeitsstörungen, Schmerz, kardiovaskuläre Erkrankungen, metabolische Störungen und Medikamente als komorbide und verursachende Faktoren - Therapie mit Fokus auf Psychotherapie und Psychopharmakotherapie: verschiedene psychotherapeutische Ansätze, kritische Beurteilung der zur Verfügung stehenden Medikamente, Therapieresistenz, Augmentationsstrategien, chronobiologische und interventionelle Verfahren - Spezialtherapien: Angeleitete Selbsthilfe, Psychoedukation, Problemlösetraining, Rekreationstherapie, physische Aktivierung, Entspannungsverfahren, Verbesserung der sozialen Kompetenz, Ergotherapie, Künstlerische Therapien - Suizidalität als besonderes Problem der Alterspsychiatrie: Risikofaktoren, Diagnose und Behandlung.

Evidenzbasierte Leitlinie zur Psychotherapie somatoformer Störungen und assoziierter Syndrome John

Wiley & Sons

This book features more than 95 papers that were presented at the bi-annual Regional Conference on Science, Technology and Social Sciences, RCSTSS 2014, which was organized by Universiti Teknologi MARA Pahang. It covers topics ranging from communications studies, politics, psychology, education, religious studies as well as business and economics. The papers, which have been carefully reviewed, include research conducted by academicians locally, regionally and globally. They detail invaluable insights on the important roles played by the various disciplines in science, technology and social sciences. Coverage includes accounting, art and design, business, communication, economics, education, finance, humanity, information management, marketing, music, religion, social sciences and tourism. Throughout, clear illustrations, figures and diagrams complement the research. The book is a significant point of reference to academicians and students who want to pursue further research in their respective fields. It also serves as a platform to disseminate research findings as a catalyst to bring out positive innovations on the development of the region.

Measures of Job Satisfaction, Organisational Commitment, Mental Health and Job related Well-being Earthscan

Health psychology is a rapidly expanding discipline at the interface of psychology and clinical medicine. This new edition is fully reworked and revised, offering an entirely up-to-date, comprehensive, accessible, one-stop resource for clinical psychologists, mental health professionals and specialists in health-related matters. There are two new editors: Susan Ayers from the University of Sussex and Kenneth Wallston from

Vanderbilt University Medical Center. The prestigious editorial team and their international, interdisciplinary cast of authors have reconceptualised their much-acclaimed handbook. The book is now in two parts: part I covers psychological aspects of health and illness, assessments, interventions and healthcare practice. Part II covers medical matters listed in alphabetical order. Among the many new topics added are: diet and health, ethnicity and health, clinical interviewing, mood assessment, communicating risk, medical interviewing, diagnostic procedures, organ donation, IVF, MMR, HRT, sleep disorders, skin disorders, depression and anxiety disorders.

The Aging Workforce Handbook RED'SHINE Publication. Inc This book is concerned with human factors and ergonomics research and developments in the design and use of systems and devices for effective and safe healthcare delivery. It reports on approaches for improving healthcare devices so that they better fit to people's, including special population's needs. It also covers assistive devices aimed at reducing occupational risks of health professionals as well as innovative strategies for error reduction, and more effective training and education methods for healthcare workers and professionals. Equal emphasis is given to digital technologies and to physical, cognitive and organizational aspects, which are considered in an integrated manner, so as to facilitate a systemic approach for improving the quality and safety of healthcare service. The book also includes a special section dedicated to innovative strategies for assisting caregivers', patients', and people's needs during pandemic. Based on papers presented at the AHFE 2021 Conference on Human Factors and Ergonomics in Healthcare and Medical

Devices, held virtually on 25–29 July, 2021, from USA, the book offers a timely reference guide to both researchers and healthcare professionals involved in the design of medical systems and managing healthcare settings, as well as to healthcare counselors and global health organizations.

Die Anwendung des General Health Questionnaire (GHQ-12) zur Erkennung depressiver Störungen in der älteren Bevölkerung über 65 Jahre Oxford University Press

It gives me immense pleasure to welcome all to explore/publish/comment in/on our journal, The International Journal of Indian Psychology (IJIP). There are a lot of challenges which the growing psychological face in the realms of basic necessities in life. Psychological thoughts can play a very distinct role in bringing about this change. One of the key objectives of research should be its usability and application. This journal attempts to document and spark a debate on the research focused on psychological research and ideas in context of emerging geographies. The sectors could range from psychological education and improvement, mental health, environmental issues and solution, health care and medicine and psychological related areas. The key focus would however be the emerging sectors and research which discusses application and usability in social or health context. We intended to publish case reports, review articles, with main focus on original research articles. Over objective is to reach all the psychological practitioners, who have knowledge and interest but have no time to record the interesting cases, research activities and new innovative procedures which helps us in updating our knowledge and improving our treatment. Finally, I would like to thank RED'SHINE

International Publications, Inc for this keepsake, and my editorial team, technical team, authors and well wishers, who are promoting this journals. With these words, I conclude and promise that the standards policies will be maintained. We hope that the research featured here sets up many new milestones. I look forward to make this endeavour very meaningful.

Erfassung depressiver Störungen in der Primärversorgung John Wiley & Sons

Flood hazards and the risks they present to human health are an increasing concern across the globe, in terms of lives, well-being and livelihoods, and the public resources needed to plan for, and deal with, the health impacts. This book is the first detailed assessment and discussion of the global health implications of flooding and future flood risk. It combines an analysis of the human health impacts of flooding with analysis of individual and societal response to those risks, and sets these findings in light of potential future increases in flood hazard as a result of climate change. Written and edited by leading researchers and practitioners on flood hazards and human health, the volume brings together findings from epidemiological, environmental, social and institutional studies, with analysis rooted in an approach that emphasizes the developmental as well as environmental causes of flood risk, and the socially differentiated nature of vulnerability and coping capacity. The first part of the book sets out the scope of the issues, and provides a detailed discussion of the global health impacts of floods and the nature of human response to the health risks posed. The second part presents new research evidence on specific health aspects of floods covering mental health, infectious diseases, local level

responses and the responses of health systems - drawing on case study material from Europe, Africa, Asia and North America, including the impact of Hurricane Katrina in 2005. The conclusion synthesizes insights from the previous chapters and discusses priorities for policy, practice and research. It draws out implications for present and future adaptation to flooding, and emphasizes the need to integrate action on health with the broader agenda of long-term risk reduction. This is indispensable reading for professionals and researchers working on hazard and disaster planning, risk reduction and public health in all countries and contexts.

Issues in Quality in Healthcare and Quality of Life: 2011 Edition OECD Publishing

Bei der Hälfte chronisch kranker Patienten wird eine komorbide psychische Störung nicht erkannt. Wiederum die Hälfte der erkannten Störungen wird nicht adäquat behandelt. Die Folgen: ein erhöhtes Mortalitätsrisiko, steigende Gesundheitskosten, sinkende Lebensqualität von Patienten. Erforderlich ist daher eine interdisziplinäre Behandlung chronisch (psycho)somatisch erkrankter Patienten in der primär (psycho)somatischen, psychotherapeutischen und psychiatrischen Versorgung. Dabei hilft das hier zusammengestellte Wissen über Auftretenshäufigkeit, Diagnostik und Ätiologie. Mit Symptomatologie, Diagnostik, Behandlungs- und Fortbildungsansätzen.

Advances in Women's Health Research and Treatment: 2011 Edition OECD Publishing

Good mental health is a vital part of people's well-being, and the COVID-19 pandemic brought renewed attention to its importance.

However, discussions so far have not focused sufficiently on how governments should best monitor it at the broader population level, and on how to consider both mental ill-health and positive mental states.

Die evidenzbasierte Leitlinie gibt Empfehlungen für die Therapie somatoformer Störungen und assoziierter Syndrome. Die Behandlungsleitlinien wurden von einem Expertenteam der Fachgruppe Klinische Psychologie und Psychotherapie in der Deutschen Gesellschaft für Psychologie (DGPs) entwickelt. Sie basieren auf dem aktuellen Kenntnisstand zu wirksamen Psychotherapien sowie zur Kombination von Psychotherapie mit Pharmakotherapie bei diesen Störungen. Der Band bietet eine knappe Beschreibung somatoformer Störungen und assoziierter Syndrome, wie z.B. Hypochondrie, chronischer Rückenschmerz, chronisches Erschöpfungssyndrom, Reizdarmsyndrom, Fibromyalgie, somatoformer Schwindel. Er gibt Hinweise zur Diagnostik, zur Pharmakotherapie bei somatoformen Störungen

und liefert spezifische Empfehlungen für die Therapie. Die derzeit vorliegende Evidenz für verschiedene psychotherapeutische Ansätze wird in übersichtlichen Tabellen gegenübergestellt.

Kinder und Jugendliche aus alkoholbelasteten Familien: Dysfunktionale Kognitionen und Verhaltensauffälligkeiten
Lulu.com

Der Band bietet eine umfassende Sammlung diagnostischer Verfahren im Bereich der Rehabilitation. Es werden sowohl krankheitsübergreifende Verfahren, als auch Verfahren für ausgewählte Indikationsgebiete dargestellt. Nach einer Einführung, die einen systematischen Überblick über den Stellenwert psychologischer Diagnostik in der Rehabilitation liefert, wird in einem Beitrag auf die "International Classification of Functioning" (ICF) eingegangen. Anschließend beschreibt der erste Teil des Bandes krankheitsübergreifende Verfahren, die u.a. folgende Bereiche umfassen: "Lebensqualität und Funktionszustand", "Gesundheitsökonomisch orientiertes Assessment von Lebensqualität", "Soziale Unterstützung", "Rehabilitations- und Behandlungszufriedenheit". Im zweiten Teil werden ausgewählte Verfahren für die Indikationsgebiete Dermatologie, Diabetes, Gastroenterologie, Kardiologie, Onkologie, Orthopädie, Rheumatologie und Pneumologie vorgestellt. Verfahren, die im Rahmen der sozialmedizinischen Begutachtung zum Einsatz kommen können, runden den Band ab. Die Einheitlichkeit der Verfahrensbeschreibungen ermöglicht einen schnellen Zugang zu den wichtigsten Informationen. Angaben zum Anwendungsbereich und technischen Aspekten, wie etwa Bearbeitungszeit und Auswertungsmethodik, liefern wichtige Hinweise zum praktischen Einsatz der Verfahren.

Diagnostische Verfahren in der Psychotherapie Springer

This volume critically reviews the phenomenon of the aging workforce, adopting an interdisciplinary perspective that examines the challenges raised on an individual, organizational and societal level. Core issues framing the concept of the aging workforce and its consequences are presented by a team of leading contributors from around the world.

Grundprobleme der epidemiologischen

Psychometrie

A user's guide to the general health

questionnaire

Erfassung depressiver Störungen in der

Primärversorgung

Psychische Störungen bei körperlichen

Erkrankungen

Kinder und Jugendliche aus alkoholbelasteten Familien stellen

eine besondere Risikogruppe für die Entwicklung von

Suchterkrankungen oder anderen psychischen Störungen dar.

Pathologische Entwicklungsverläufe resultieren aus einem

Zusammenspiel verschiedener Risiko- und Schutzfaktoren, wenig

beachtet wurde bislang die Rolle dysfunktionaler Kognitionen. Die

vorliegende Fragebogenstudie untersucht 72 Jugendliche aus

suchtbelasteten Familien und 109 unbelastete Jugendlichen

zwischen 12 und 18 Jahren. Belastete Jugendliche weisen eine

höhere psychische Symptombelastung auf als Jugendliche aus

unbelasteten Familien. Hinsichtlich kognitiver Muster

unterscheiden sich belastete Jugendliche kaum von unbelasteten

Jugendlichen. Es stellte sich jedoch in beiden Gruppen heraus,

dass kognitive Faktoren bedeutsam für die Entwicklung

psychischer Auffälligkeiten sind. Ähnliche Ergebnisse zeigten sich für Variablen der Eltern-Kind-Beziehung. Der Bearbeitung kognitiver Muster und familiärer Faktoren kommt somit eine besondere Bedeutung zu, sowohl in der selektiven Präventionsarbeit mit Jugendlichen aus alkoholbelasteten Familien als auch in der universellen Präventionsarbeit mit unbelasteten Jugendlichen.

Quality of Life: Application of the Concept and the Questionnaire for Evaluations in Food Systems BoD – Books on Demand

The concept of quality of life has a wide range of applications in

different scientific fields and realms in life. To evaluate the link between the quality of life and food systems, a survey was conducted with the actors of an organic municipality in Södertälje, Sweden. This municipality is a pioneer in sustainable food production and consumption, research, planning and innovation. The survey results provided for a better understanding of how individuals affect and are affected by food systems. Organic consumers perceive local and organic food as healthier and more environmentally friendly than its conventional counterpart, and this perception typically impacts individuals' perception of well-being. Quality of life is an important factor to consider when evaluating food systems, since it provides a person-centred approach in food systems' evaluations. A questionnaire has proven to be an effective instrument to measure individuals' quality of life and can be applied to food system evaluations, to facilitate the transformation process towards sustainable food systems. Food system transformation is essential to provide a high quality of life for individuals and society.

Empfehlungen für die Diagnostik und Therapie der Depression im Alter Frontiers Media SA

Worldwide economic constraints on health care systems have highlighted the importance of evidence-based medicine and evidence-based health policy. The resulting clinical trials and health services research studies require instruments to monitor the outcomes of care and the output of the health system. However, the over-abundance of competing measurement scales can make choosing a measure difficult at best. Measuring Health provides in-depth reviews of over 100 of the leading health

measurement tools and serves as a guide for choosing among them. Now in its third edition, this book provides a critical overview of the field of health measurement, with a technical introduction and discussion of the history and future directions for the field. This latest edition updates the information on each of the measures previously reviewed, and includes a complete new chapter on anxiety measurement to accompany the one on depression. It has also added new instruments to those previously reviewed in each of the chapters in the book. Chapters cover measurements of physical disability, social health, psychological well-being, anxiety, depression, mental status testing, pain, general health status and quality of life. Each chapter presents a tabular comparison of the quality of the instruments reviewed, followed by a detailed description of each method, covering its purpose and conceptual basis, its reliability and validity and, where possible, shows a copy of the actual scale. To ensure accuracy of the information, each review has been approved by the original author of each instrument or by an acknowledged expert.

05 - Mentally Healthy Days and Days Out of Role Associated with Psychological Distress: Relating the General Health Questionnaire with Functioning Waxmann Verlag

This book presents the largest international study of psychological disorders seen in primary health care. Centres in fourteen countries participated in this investigation, including Brazil, Chile, China, India, Nigeria and the USA as well as several European countries. The study has shown how people with mental disorders present their problems to doctors and how likely their disorders are to be detected and treated.

Measuring Population Mental Health Emerald Group Publishing
Prevention of mental illness and mental health promotion have often been ignored in the past, both in undergraduate and postgraduate curricula. Recently, however, there has been a clear shift towards public mental health, as a result of increasing scientific evidence that both these actions have a serious potential to reduce the onset of illness and subsequent burden as a result of mental illness and related social, economic and political costs. A clear distinction between prevention of mental illness and mental health promotion is critical. Selective prevention, both at societal and individual level, is an important way forward. The Oxford Textbook of Public Mental Health brings together the increasing interest in public mental health and the growing emphasis on the prevention of mental ill health and promotion of well-being into a single comprehensive textbook. Comprising international experiences of mental health promotion and mental well-being, chapters are supplemented with practical examples and illustrations to provide the most relevant information succinctly. This book will serve as an essential resource for mental and public health professionals, as well as for commissioners of services, nurses and community health visitors.
