Go to the database and explore.Heat Treater S Guide Asm InternationalDetroit, Michigan. Exhibitor Information. Heat Treat 2019, the biennial show from the ASM Heat Treating Society, is considered

the premier, can't-miss event for heat treating professionals in North America. This year's conference and expo will feature an exciting mix of new technology, exhibits, technical programming and networking events geared toward the heat treating industry. Home - Heat Treat 2019 - ASM International Abstract. This article describes the heat treating (stress relieving, normalizing, annealing, quenching, tempering, martempering, austempering, and age hardening) of different types of steels, including ultrahigh-strength steels, maraging steels, and powder metallurgy steels. Tabulating the recommended temperatures for normalizing and austenitizing, it provides information on mechanism, cooling media, principal

variables, process procedures, and applications of heat treating. Heat Treating of Steel - ASM International Filled with instructional information and data, it examines the effect of heat treating on the structure, properties, and performance potential of cast iron, carbon and low-alloy steels, tool steels, stainless steels, bearing steels, and gear steels. ASM Heat Treating Society - Home | Facebook This article describes the effect of heat treatment processes such as annealing, normalizing, surface hardening, tempering, stress relieving, quenching, and austempering, on hardness and tensile properties of cast irons, namely gray irons, ductile irons, malleable irons, and austenitic irons. Heat Treating of Cast Irons - ASM International Visit us at the ASM Heat Treat Expo - Booth 1010. Come Visit us at ASM's 30th Heat

Treating Society Conference & Exposition – Booth 1010, Detroit, MI – October 15-17, 2019. If you plan on attending the show, please be sure to stop by our booth number 1010 to learn more about our latest vacuum furnaces, and most importantly... we're interested in learning about you, your business, and your needs.

News & Announcements Archives - Vacaero This article describes recommended heat treating practices, such as normalizing, annealing, austenitizing, quenching, preheating, and tempering commonly employed in certain steels. These are water-hardening tool steels, shock-resisting tool steels, oil-hardening cold-work tool steels, medium-alloy air-hardening cold-work tool steels, high-carbon high-chromium cold-work tool steels, hot-work

tool steels, high-speed tool steels, low-alloy special-purpose tool steels, and mold steels.
