Purchase. Lin & Costello is

the standard book on  
error correcting codes for  
a reason. It explains  
concepts well in addition  
to a strong mathematical  
presentation. It also  
contains a wealth of  
information on various  
coding techniques, not  
only the standard  
techniques used in  
industry. Error Control  
Coding: Lin, Shu, Costello,  
Daniel ... While a lot of  
development has  
happened since this book  
was written, it is the  
standard reference for  
any coding theorist. It is  
easier to read and well

organized. Only flaw is its weight and over 1200 pages!!
