A perfectly balanced guide outlining truly useful tips to getting through your viva from someone who knows." "This is an excellent book. I found the book helpful in giving me a good understanding of what to expect, how to start with focusing on the specific areas suggested and	how to develop my own style in marking up my thesis ... It certainly reduced my nerves going in knowing I had suggested areas fully prepared. A must have for anyone doing a viva!" How to Survive Your Viva 3e is a concise, practical introduction that equips students with the skills they need to defend their thesis or dissertation. communication skills. The book ensures you are ready for what can be a complex and intimidating experience, telling you what to expect, how to practise and prepare, what questions you might be asked and how to ensure your responses support your thesis. Written in an accessible style, this book draws on the tried and trusted material and activities created for viva

Becoming a Scholar Your PhD Survival Guide Becoming a Scholar provides a window into the lives of nine non-traditional

doctoral students. As mature, part-time, international students enrolled in a professional doctorate programme, they reflect on the transformation process of becoming scholars, and their narratives provide breadth and depth to themes that represent a diverse cross-section of cultures, identities and communities. Recognising that the process of becoming a

scholar is as much internal as it is external, the book provides an opportunity to engage with authentic personal stories that remain firmly rooted in academic literature. By bringing the 'human face' behind the doctoral journey to the forefront, the narratives draw much-needed attention to the personal journey that inevitably parallels and intersects with the academic journey. Although the

narratives are drawn from a professional Doctor in Education (EdD) programme based in the UK, the struggles are sure to resonate with a much wider range of doctoral students and academics, sparking lively discussion, debate and reflection. A must-read for students preparing to embark on the doctoral journey, and essential reading for doctoral programmes that wish to

equip students with important knowledge about the challenges ahead. Writing For Academic Journals Przemek Chojecki This new edition is designed to help graduate and research students with the process, preparation, writing, and examination of their theses. Many students are able to design their program of research and to collect the data, but they can find it more

difficult to transform their data into a thesis. Managing your Mental Health during your PhD Springer Nature This book is your own personal PhD coach. It's not just about surviving your PhD, it's about thriving in the experience. Taking a unique self-coaching approach, this book will enable you to understand how to navigate your way through the various challenges posed by PhD

study with resilience, self-sufficiency, and the determination to succeed. Each chapter contains self-coaching challenges so that you can discover what works for you and generate fresh ideas to enable you to move forwards, banish self-doubt, bust procrastination, and realise your full potential to make the most of your PhD experience. Your PhD Coach will enable you to:

Build resilience and self-leadership
Challenge yourself to be focused and achieve aspiring goals
Find the right balance and nurture stronger relationships
Develop your confidence, creativity and motivation
Using a coaching philosophy that helps you realize your own solutions and develop your own strategies to move forward, the book is packed full of techniques, tips and tricks applicable to a

wide range of circumstances both within the PhD process and beyond - an essential book for all those taking on the challenge of PhD research. "Medd and Gill go deep into the under the skin of what it is like to do a PhD, pull out the reality of the operation and offer some sound advice. They provide effective techniques to bust the 'gremlins' - the voices in the head - that can haunt postgraduate researchers

and diminish the research experience. I urge all research students (and supervisors) to read this very accessible book. It will help them reflect deeper into their research experience and help build confidence in themselves and (re)gain satisfaction in their work and studies." Dr Richard Hinchcliffe, Academic Development, Centre for Lifelong Learning, University of Liverpool, UK

"Coaching empowered me to reclaim my PhD and this book will enable many more students to do the same. Will Medd and Jeff Gill have a deep understanding of the PhD process and students reading this book, at any stage in their PhD, will find themselves thinking 'Wow, that is exactly how I feel!' The book challenges the inevitability of the 'PhD steam-roller' and its comfortable and chatty

tone creates a friendly guide for those struggling with the demands of a PhD and inspiration for those who want to get the most from the whole experience." Beth Brockett, PhD Student, Lancaster Environment Centre, Lancaster University, UK

This handbook provides an in-depth exploration of the entire journey of postgraduate research in the social and behavioural sciences, from enrolment to its culmination in the form of a thesis, dissertation or portfolio, and beyond. It is written in an accessible and example-rich style, offering practical and concrete advice in virtually all

areas. It also includes references to additional resources and websites, and each chapter features key recommendations for improving the postgraduate research experience. The book addresses not only research-related aspects (e.g. supervisors; selecting your guiding assumptions; contextualising, framing and configuring research; reviewing literature; sampling; writing proposals;

ethics and academic integrity; selecting a data gathering strategy; surviving your thesis/dissertation/portfolio examination; and publishing), but also questions concerning how to integrate, manage, and balance the research journey in the context of the postgraduate student's broader life-world (e.g. skill development and supervisor relations; effective time and project

management; a healthy work-life balance; maintaining motivation; and dealing with criticism). The book adopts an explicitly pluralist perspective on postgraduate research, moving beyond mixed methods thinking, and offers concrete examples from postgraduate students' real- world experiences.
