The color wheel was invented in 1666 by Isaac Newton, who mapped the color spectrum onto a circle. The color wheel is the basis of color theory, because it shows the relationship between colors. Colors that look good together are called a color harmony. Artists and designers use these to create a particular look or feel. Color wheel - color theory and calculator | Canva

Colors Psychologists have documented that "living color" does more than appeal to the senses. It also boosts memory for scenes in the natural

world. By hanging an extra "tag" of data on visual scenes, color helps us to process and store images more efficiently than colorless (black and white) scenes, and as a result to remember them better, too.

This color combination has an outdoor feel to it, like a summer baseball game: you have the red dirt of the baseball diamond, the green grass in the outfield, the bright sun in a blue sky overhead. However, it's more subtle (and has more variety of color) than, say, the more obvious greens and browns in #6.
