What is the Kama Sutra? Is it a spiritual text written by a visionary man of wisdom in India almost two millennia ago? Or is it the world's first mucky book? Well, it's the former - it's a spiritual text written by a visionary man of wisdom in India almost two millennia ago. Though shocking for its time, the Kama Sutra has gone on to become the world's most respected guide book on all matters sexual, and is now on top of the wardrobes or under the beds of over sixty percent of the world's teenage boys. It is a common and misconceived belief among the younger generations that sex is something not only void in

the minds of our senior citizens, but is most likely physically impossible for those who are at or beyond retirement age. The glorious truth may come as a bit of a shock to the youth of today - it may even conjure up images in their minds best left 'till after lunch! The world's oldies are sexually active. New and exciting research has uncovered startling new evidence that oldies are still 'at it', and still 'do it' whenever they don't have a bad back. Can it be true? Are our most senior citizens getting their wrinkly legs over? If you are an older person, take heart - there's a lot of dusty action out there. Sex in the twilight years, though similar in mechanics to the couplings of youth, is in fact vastly different. This book exposes the secret world of grey love and covers every aspect of senior congress - from geriatric anatomy and attraction, through to mating rituals, sex positions, post-sex heart condition medication and proper service and care of pace makers.

Originally published in 1936, in this classic account of the development of abstract art Alfred Barr analyses the many diverse abstract movements which emerged with bewildering rapidity in the early years of the twentieth century, and which had an impact on every major form of art. Barr traces the history of nonrepresentational art from its antecedents in late nineteenth-century painting in France - Seurat and Neo-Impressionism, Gauguin and Synthetism, and Cézanne - through abstract tendencies in Dada and Surrealism. He distinguishes two main trends in abstract art: the

geometrical, structural current as it developed in Cubism and later in Constructivism and Mondrian, and the intuitional, decorative current running from Matisse and Fauvism through Kandinskij and, later, Surrealism. He shows how individual movements influenced one another, and how many artists experimented with more than one style. Barr also discusses the involvement of a number of abstract movements in architecture and the practical arts – the Bauhaus in Germany, de Stijl in Holland, Purism in France, and Suprematism and Constructivism in Russia.
