What are the origins of agriculture? How did people learn to domesticate plants? How did they come to improve some? How did they learn special techniques for processing certain plants for food? In these highly personal and informal essays-old-fashioned

botany, the author calls them-noted botanist Charles Heiser investigates those and other questions raised by the interactions of plants and people. His purpose is to try to find the origins of some of our domesticated plants and to consider other plants that might someday contribute to our food resources. In *Of Plants and People*, Heiser examines the origins of pumpkins, squashes, and other cucurbits. In *The Totora and Thor*, he digresses from food plants to trace the spread of the totora reed from South America to Pacific islands. *Little Oranges of Quito* is about the domestication of a wild plant, the naranjilla, that is going on today. *Chenopods: From Weeds to the Halls of Montezuma* concerns the uses of the Andean quinoa and its relatives, and *Sangorache and the Day of the Dead, A Trip to Tulcán, and Chochos and Other Lupines* all examine Latin-American domestic plants that could contribute to our own foods. *Green 'Tomatoes' and Purple 'Cucumbers*, the tomato and the pepino, respectively, describes two other crops that have received scant notice in the United States. The subject of "How Many Kinds of Peppers Are There?" is the genus *Capsicum*, with its sweet green and hot red peppers and all their related species and varieties. Heiser again writes about nonfood plants in the essay "Peperomias," but in the next chapter, "Sumpweed," he discusses a plant that was once used for food but that has been neglected in favor of others. And in "A Plague of Locusts" the author compares the honey locust tree with a close relative to try to determine what gives particular plants advantages in certain environments. In his final essay, *Seeds, Sex, and Sacrifice*, Heiser relates myth, anthropological evidence, and botanical findings to review the connection between religion and the origin of agriculture. The audience for

this book will include botanists, horticulturists, anthropologists, and any reader interested in the interrelationships between plants and people.

Whether in football or in the law, Illinois Supreme Court Justice Robert Thomas has always had the "best view from the bench." Bob Thomas got his start in football at the University of Notre Dame, kicking for the famed "Fighting Irish" in the early 1970s. Claimed off waivers by the Chicago Bears in 1975, Thomas helped to take the franchise from their darkest days to their brightest. Yet, on the cusp of the team's greatest moment, he was struck with a shocking blow that challenged his fortitude. In this dramatic retelling of Bob Thomas's fascinating life, renowned sports writer Doug Feldmann shows how neither football nor the law was part of Thomas's dreams while growing up the son of Italian immigrants in Rochester, New York, in the 1960s. Chasing excellence on both the gridiron and in the courtroom, however, would require resilience in ways he could not have imagined. As *A View from Two Benches* shows us, Bob Thomas reached the top of two separate and distinct professions, guided by a bedrock of faith that has impacted his decisions and actions as both a football player and a judge, helping him navigate the peaks and valleys of life. As Doug Feldmann reveals, Bob Thomas has

always stayed true to the values he learned in his earliest days. Doug Feldmann's rich biography of an accomplished kicker and a proud justice of the law shows us that determination and resilience go a long way to a successful and impactful life.

...the relationship between employment growth and output growth...is greatly affected by the functioning, efficiency and institutional structure of the labor market. --Joseph Stiglitz, Chief Economist
Despite the resumption of economic growth in most LAC countries since the late 1980s, improvements on the employment/unemployment front have been sluggish at best, with a few notable exceptions. In many countries, renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment, and to

restore wages to pre-crisis levels. The focus of this book is on:

- the performance of labor markets in the LAC region since the beginning of significant structural reforms
- most countries in the region have undertaken
 - the structure of labor markets, institutions, and incentive structures;
 - the effects of that structure on employment, earnings, income distribution, and poverty levels;
 - the role of labor market institutions in labor market trends;
 - the options for reform and the benefits of comprehensive labor reforms, as evidenced inside and outside the region;
 - labor policy reforms to improve in a sustainable way the employment/unemployment outlook.
