Laboratory Manual for Biotechnology and Laboratory Science McGraw-Hill Education

Get hands-on practice with physical examination and assessment skills! Corresponding to the chapters in Carolyn Jarvis' *Physical Examination & Health Assessment, 7th Edition*, this lab manual offers a variety of activities, exercises, and checklists to prepare you for the skills laboratory and clinical setting. And with the new NCLEX® exam-style review questions, you'll be ready to apply your knowledge and to succeed on the NCLEX exam. A variety of learning activities test your understanding with multiple-choice, short answer, fill-in-the-blank, matching, and review questions. Clinical objectives for each chapter help you study more efficiently and effectively. Regional write-up sheets familiarize you with physical examination forms and offer practice in recording narrative accounts of patient history and examination findings. Anatomy labeling exercises offer additional practice with identifying key anatomy and physiology. Narrative summary forms reflect the charting format used for narrative accounts of health history and for physical examination findings. A comprehensive glossary provides fast, easy access to key terminology and definitions. Reading

assignments help you review corresponding chapters in the textbook and include page references. Audio-visual assignments tie videos of specific examination procedures to practical applications in the lab. NEW NCLEX® exam-style review questions help to prepare you for the NCLEX exam. NEW evidence-based guidelines reflect a focus on conducting the most effective, qualitative exams. NEW content on the Electronic Health Record, charting, and narrative recording includes examples of how to document assessment findings.

The *Laboratory Manual for Anatomy and Physiology* by Allen and Harper presents material in a clear and concise way. It is very interactive and contains activities and experiments that enhance readers' ability to both visualize anatomical structures and understand physiological topics. Lab exercises are designed to require readers to first apply information they learned and then to critically evaluate it. All lab exercises promote group learning and the variety offers learning experiences for all types of learners (visual, kinesthetic, and auditory). Additionally, the design of the lab exercises makes them easily adaptable for distance learning courses.

McGraw-Hill Science/Engineering/Math

Green chemistry involves designing novel ways to create and synthesize products and implement processes that will eliminate or greatly reduce negative environmental impacts. The *Green Chemistry Laboratory Manual for General Chemistry* provides educational laboratory materials that challenge students with the customary topics found in a general chemistry laboratory manual, while encouraging them to investigate the practice of green chemistry. Following a consistent format, each lab experiment begins with objectives and prelab questions highlighting important issues that must be understood prior to getting started. This is followed by detailed step-by-step procedures for performing the experiments. Students report specific results in sections designated for data, observations, and calculations. Once each experiment is completed, analysis questions test students' comprehension of the results. Additional questions encourage inquiry-based investigations and further research about how green chemistry principles compare with traditional, more hazardous experimental methods. By placing the learned concepts within the larger context of green chemistry principles, the lab manual enables students to see how these principles can be applied to real-world issues. Performing laboratory exercises through green experiments results in a safer learning environment, limits the quantity of hazardous waste generated, and reduces the cost for chemicals and waste disposal. Students using this manual will gain a greater appreciation for green chemistry principles and the possibilities for future use in their chosen careers.
