THE INSTANT NEW YORK TIMES BESTSELLER! Also on the USA Today, Washington Post, Boston Globe, Globe and Mail, Publishers Weekly, and Indie bestseller lists. One of the most important stories of World War II, already optioned by Steven Spielberg for a major motion picture: a spectacular, searing history that brings to light the extraordinary accomplishments of brave Jewish women who became resistance fighters—a group of unknown heroes whose exploits have never been chronicled in full, until now. Witnesses to the brutal murder of their families and neighbors and the violent destruction of their communities, a cadre of Jewish women in Poland—some still in their teens—helped transform the Jewish youth groups into

resistance cells to fight the Nazis. With courage, guile, and nerves of steel, these “ghetto girls” paid off Gestapo guards, hid revolvers in loaves of bread and jars of marmalade, and helped build systems of underground bunkers. They flirted with German soldiers, bribed them with wine, whiskey, and home cooking, used their Aryan looks to seduce them, and shot and killed them. They bombed German train lines and blew up a town’s water supply. They also nursed the sick, taught children, and hid families. Yet the exploits of these courageous resistance fighters have remained virtually unknown. As propulsive and thrilling as *Hidden Figures*, *In the Garden of Beasts*, and *Band of Brothers*, *The Light of Days* at last tells the true story of these incredible women whose courageous yet little-known feats have been eclipsed by time. *Judy Batalion*—the granddaughter of Polish Holocaust survivors—takes us back to 1939 and introduces us to Renia Kukielka, a weapons smuggler and messenger who risked death traveling across occupied Poland on foot and by train. Joining Renia are other women who served as couriers, armed fighters, intelligence agents, and saboteurs, all who put their lives in mortal danger to carry out their missions. *Batalion* follows these women through the savage destruction of the ghettos, arrest and internment in Gestapo prisons and concentration camps, and for a lucky few—like Renia, who orchestrated her own audacious escape from a brutal Nazi jail—into the late 20th century and beyond. Powerful and inspiring, featuring twenty black-and-white photographs, *The Light of Days* is an unforgettable true tale of war, the fight for freedom, exceptional bravery, female friendship, and survival in the face of staggering odds. The Light of Days One World

The “thrilling, dramatic, historic” #1 New York Times bestseller by the Parkland Hospital surgeon who fought to save President John F. Kennedy (Robert K. Tanenbaum). On November 22, 1963, Dr. Charles Crenshaw, an accomplished surgeon, tried to save John F. Kennedy’s life—and then days later, the life of the alleged assassin, Lee Harvey Oswald. His gripping, firsthand account contradicts the Warren Commission and years of public misperception to illuminate a chapter in American history long cloaked in conspiracy. Writing with eye-opening immediacy, Dr. Crenshaw takes readers into the emergency room to share the critical events at Parkland Hospital as he lived them. Now updated, his searing testimony punctures myths and shatters a cover-up of massive proportions. “Hard-hitting, courageous, and correct in every respect.”—Cyril Wecht, M.D., J.D. “Dr. Crenshaw offers his expert opinion with persuasive evidence. Read this page-turning account of the Kennedy assassination.”—Robert K. Tanenbaum, Deputy Chief Counsel, Congressional Committee Investigation into the Assassination of President Kennedy Includes revealing photos Previously published as JFK Conspiracy of Silence

Deadly Choices Simon and Schuster

These days, almost no-one takes seriously the notion that one person, without assistance, killed President Kennedy. Even the official US government position for the last 40 years has been that JFK “was probably killed as the result of a conspiracy”, in the words of the House Select Committee on Assassinations report. 22 November 1963: A Brief Guide to the JFK Assassination leads you expertly through the complex and contradictory evidence so that you can make up your own mind about who killed President Kennedy and why he was assassinated. This essential book is fully referenced, and provides a clear and readable account of all the central issues in this controversial subject, including: - Lee Harvey Oswald - lone assassin, conspirator or patsy? - Oswald's longstanding links to US intelligence agencies; - Oswald's apparent visit to Mexico City a few weeks before the assassination - the crucial event which caused the Warren Commission to be set up; - the official investigations - and why their answers are not widely believed; - the medical evidence - the reason why the case remains controversial; - the political context of the JFK assassination; - and the pros and cons of the main theories associated with the event. The e-book edition contains more than 500 links to sources such as witness testimony and experts' technical reports. It is perhaps the first JFK assassination e-book to allow readers to check the essential documentation for themselves.

Tender Is the Flesh Little, Brown

In 1967, a Baltimore man named Howard Donahue began investigating the assassination of President John F. Kennedy. Like countless Americans, Donahue was fascinated by the events in Dallas. But what separated him from other amateur sleuths-and even the Warren Commission's experts-was a lifetime's experience with guns and ballistics.In *Mortal Error*, Bonar Menninger chronicles Donahue's twenty-five-year investigation of President Kennedy's death, and the stunning revelation his work produced. In crisp, rapid-fire prose, Menninger relates one of the greatest true-life detective stories ever told. More importantly, he offers solutions to questions that have haunted America for more than 50 years.Complete with 15 forensic diagrams, photos and illustrations-including images from the crime scene and the president's autopsy-this thoroughly researched exposé delves deeply into every angle of the Kennedy assassina- tion. It examines the infamously controversial Warren Report, various the- ories surrounding the shooting, and previously undisclosed forensic and ballistic clues to build a case for the clearest, most plausible explanation yet about the events of that historic day in Dallas.

#1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

We shall examine the validity of 16 experimental designs against 12 common threats to valid inference. By experiment we refer to that portion of research in which variables are manipulated and their effects upon other variables observed. It is well to distinguish the particular role of this chapter. It is not a chapter on experimental design in the Fisher (1925, 1935) tradition, in which an experimenter having complete mastery can schedule treatments and measurements for optimal statistical efficiency, with complexity of design emerging only from that goal of efficiency. Insofar as the designs discussed in the present chapter become complex, it is because of the intransigency of the environment: because, that is, of the experimenter’s lack of complete control.

This New York Times bestseller by the veteran government operative lays out the theory that LBJ orchestrated the JFK assassination. Consummate political insider Roger Stone makes a compelling case that Lyndon Baines Johnson had the motive, means, and opportunity to orchestrate the murder of John F. Kennedy. Stone maps out the case that Johnson blackmailed his way on the ticket in 1960 and was being dumped in 1964 to face prosecution for corruption at the hands of his nemesis attorney, Robert Kennedy. Stone uses fingerprint evidence and testimony to prove Kennedy was shot by a long-time Johnson hit man—not Lee Harvey Oswald. Johnson would use power from his personal connections in Texas, from the criminal underworld, and from the United States government to escape an untimely end in politics and to seize even greater power. In *The Man Who Killed Kennedy*, you will find out how and why he did it.

Soon to be an FX Docuseries from Emmy® Award-Winning Producer Marc Smerling (The Jinx) featuring the author Errol Morris! Academy Award-winning filmmaker Errol Morris examines one of the most notorious and mysterious murder trials of the twentieth century In this profoundly original meditation on truth and the justice system, Errol Morris—a former private detective and director of *The Thin Blue Line*—delves deeply into the infamous Jeffrey MacDonald murder case. MacDonald, whose pregnant wife and two young daughters were brutally murdered in 1970, was convicted of the killings in 1979 and remains in prison today. The culmination of an investigation spanning over twenty years and a masterly reinvention of the true-crime thriller, *A Wilderness of Error* is a shocking book because it shows that everything we have been told about the case is deeply unreliable and that crucial elements of case against MacDonald are simply not true.

Reclaiming Parkland details the failed attempt of Tom Hanks and Gary Goetzman—cofounder of the production company Playtone—to make Vincent Bugliosi’s mammoth book about the Kennedy assassination, *Reclaiming History*, into a miniseries. It exposes the questionable origins of *Reclaiming History* in a dubious mock trial for cable television, in which Bugliosi played the role of an attorney prosecuting Lee Harvey Oswald for murder, and how this formed the basis for the epic tome. Author James DiEugenio details the myriad problems with Bugliosi’s book, and explores the cooperation of the mainstream press in concealing these many faults during the publicity campaign for the book and how this lack of scrutiny led Hanks and Goetzman to purchase the film rights. DiEugenio then shows how the film eventually adapted from that book, entitled *Parkland*, does not even resemble *Reclaiming History*, though the script for that film displays the same imbalance that *Reclaiming History* does. *Reclaiming Parkland* also includes extended looks at the little-known aspects of the lives and careers of Bugliosi, Hanks, and Goetzman—including Bugliosi’s three attempts at political office and a review of the Tate-LaBianca murders in the light of today’s knowledge of that case. DiEugenio also looks at the connections between Washington and Hollywood, as well as the CIA influence in the film colony today. *Reclaiming Parkland* is a truly unique book that delves into the Kennedy assassination, the New Hollywood, and the political influence on how films are made today. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Assassination? Conspiracy? Evidence of the shocking truth is finally revealed. 'Shocking new details' - Herald Sun On 22nd November 1963, the 35th president of the United States, John Fitzgerald Kennedy, and his wife Jackie were taking part in a presidential motorcade through Dallas. Thousands lined the streets cheering; others hung out of windows to catch a glimpse of the much-loved First Lady and President. Suddenly, the unthinkable: three shots - bang...bang, bang - rang out. In front of the world, John F Kennedy was fatally wounded. Lee Harvey Oswald was caught. But did he fire the fatal bullet? Who REALLY killed JFK? Fifty years after the tragic events in Dallas, JFK: The Smoking Gun solves the ultimate cold case. With the forensic eye of a highly regarded ex-cop, Colin McLaren gathered the evidence, studied 10,000 pages of transcripts, discovered the witnesses the Warren Commission failed to call, and uncovered the exhibits and testimonies that were hidden until now. What he found is far more outrageous than any fanciful conspiracy theory could ever be. JFK: The Smoking Gun proves, once and for all, who did kill the President. 'A compelling case' - The Australian 'Comprehensive and compelling' - Newcastle Herald

JFK Motorcade Pinnacle Books

With meticulous calculation, learned in his studies and work as an engineer (with a degree from Drexel Institute of Technology, Philadelphia), Daniel Roffe spent years charting every piece of ballistic and photographic evidence from Dealey Plaza, Dallas, Texas—the hallowed and horrific site of what

many feel was the "Crime of the 20th Century"—where, on November 22, 1963, President John F. Kennedy was mortally wounded. The fatal shot was the Third on that fateful day. The evidence showed that the First shot came from the 6th floor of the Texas School Book Depository. That bullet hit the pavement to the right rear of the Presidential limousine releasing a shower of small concrete fragments, two of which hit the President on the right side of his face. 2.24 seconds later, the Second bullet hit his upper back and passed down through his neck, "slid" past his carotid artery and jugular and exited through the base of his throat...it then passed through Governor Connally's back, exited his chest, smashed through his right wrist, embedded in his left thigh...and later fell out and was found on a gurney in Parkland Hospital. Commander James Humes, a U.S. Navy doctor who performed the autopsy, stated that the wounds to the President would not have been fatal. 4.92 seconds later, the President's head "exploded" and a shower of blood, bone and brain matter was ejected in a jet-like corona from the right side of his head. The angle of the wound, the position of the President, and the lack of a facial exit wound precludes a third shot from the Texas School Book Depository. Additional, compelling evidence shows that one of the three shell casings found on the floor near the "sniper's nest" in the Book Depository had a bent casing lip...the FBI suggested that this cartridge could not have been safely fired on that day and was probably a "dry fire" or, "practice" casing. Evidence leads to the only other gun KNOWN? to be in proximity to the President...the AR-15 pulled from the floor of the Secret Service car by Agent George W. Hickey, Jr., who grabbed it, released the safety, turned towards the Book Depository, then found himself twisting and falling forward as his car's driver applied brakes upon seeing the brake lights of the Presidential limousine...as he grabbed for something to stop his fall, with his finger on the AR-15 trigger, Hickey's hand involuntarily clenched and supplied enough force to accidentally discharge his weapon...thus, was history made.
