There exists no doubt, considering the proactive role of mass communication in gathering, disseminating and gauging the public opinion and motivating them towards a desired change. This role by mass media is more important, particularly, in India where citizens are being seen as

information starving and being deprived of much required knowledge to better their lives. Studies in the past have pointed out that, media have and continues to play an important and decisive role in nations that are categorized as third world countries, in bringing about development and leading to a predetermined social change. Furthermore, media can play an independent and objective role in a democratic political setup in India, by bringing forth various opinions and ideas, thereby nurturing an informed citizen about the polices, developments and issues concerning them.

Australia's military consistently punches above its weight, and its approach to leadership is the key to its success. Developed over a century ago by fusing national values with battlefield imperatives, its approach has been fine-tuned over generations. It is now an adaptable and egalitarian leadership culture that ticks all the boxes for best practice. The military assumes no-one is born a natural leader, and that good training makes good leaders. Drawing on his own long military career and defence training programs, and on research, Nick Jans has identified the core principles of this consistently successful approach to leadership. These '3Rs' are the leadership skills which generate loyalty and commitment at an operational level, and they are just as successful in everyday team management as they are in the field. Leadership Secrets of the Australian Army includes real stories from the field and from workplaces, from everyday employees and from well-known leaders. It shows how you too can become a leader your team can believe in, and-equally importantly-how you can help them believe in themselves. 'Read it and be wise.' Lieutenant General David Morrison, AO

Is public administration an art or a science? This question of whether the field is driven by values or facts will never be definitively answered due to a lack of consensus among scholars. The resulting divide has produced many heated debates; however, in this pioneering volume, Norma Riccucci embraces the diversity of research methods rather than suggesting that there is one best way to conduct research in public administration. Public Administration examines the intellectual origins and identity of the discipline of public administration, its diverse research traditions, and how public administration research is conducted today. The book's intended purpose is to engage reasonable-minded public administration scholars and professionals in a dialogue on the importance of heterogeneity in epistemic traditions, and to deepen the field's understanding and acceptance of its epistemological scope. This important book will provide a necessary overview of the discipline for graduate students and scholars.

Transnational communities are social groups that emerge from mutual interaction across national boundaries, oriented around a common project or 'imagined' identity. This common project or identity is constructed and sustained through the active engagement and involvement of at least some of its members. Such communities can overlap in different ways with formal organizations but, in principle, they do not need formal organization to be sustained. This book explores the role of transnational communities in relation to the governance of business and economic activity. It does so by focusing on a wide range of empirical terrains, including discussions of the Laleli market in Istanbul, the institutionalization of private equity in Japan,

the transnational movement for open content licenses, and the mobilization around environmental certification. These studies show that transnational communities can align the cognitive and normative orientations of their members over time and thereby influence emergent transnational governance arrangements.
