 How to achieve a reliable diagnosis - even in complex clinical cases. For such challenges, veterinary surgeons must know about all the possible pathophysiological causes of a particular clinical problem, be able to evaluate them in individual cases and exclude anything which is not relevant using diagnostic pathways. The 'rules out' describe this process of exclusion for all aspects of internal medicine in the cat and dog, and ultimately lead to a reliable and secure diagnosis. They form, therefore, an important basis for everyday clinical work and provide a practical guideline for the systematic problem-oriented processing of patients. For students, these 'rules out' are a prerequisite for understanding veterinary internal medicine. For experienced clinicians, they are a helpful diagnostic guide especially when dealing with complex cases and so can help in solving particularly 'knotty' problems.

 Understanding Diseases of the Human Body and Spirit explores the congruence between the physical and spiritual dimensions of diseases. Illnesses are caused by genetic aberrations, environmental agents, pathogenic microbes, circulatory disturbances, unregulated tumor growths or abnormal immune reactions. The author, an experienced pathologist and life-long student of the Bible, explains how correlating factors are operative in producing humankind's spiritual infirmities. Narratives of pathological events in the body aptly illustrate and enhance understanding of scriptural teachings regarding the broken relationship of sinful humanity with God, the restoration of this relationship through salvation in Jesus Christ, the believers' continual growth in spiritual health through the indwelling Holy Spirit, and the real hope of glorious transformation of their bodies in the hereafter. Dr. Chiu also contributes unique insights into subject matters which have engaged and troubled the minds of the sick, their loved ones, as well as theologians, pastors, bioethicists, lay-Christian workers and healthcare providers. These include the relationship between sin and disease, the perception of injustice when disease strikes ("why me?"), the significance of a person's life-history and value-systems to the experience of disease, the meaning of the biblical promise of healing, as well as homosexuality and the Bible, and the place of miracle cures. Take better care of your health by understanding the nature of diseases. Be inspired to pursue spiritual health in Christ which transcends illnesses and death.

We aim at testing knowledge acquisition and application, albeit data analysis is tested in fewer instances. The questions are presented in Calibri (body) theme font to provide the best readability. The questions' stems are short, bold, and typed in size 14 font. Each question has four options. It is hard for a test taker who doesn't know the answer to guesstimate. We have used plausible distractors and avoided double negatives. Furthermore, we have used the finished and unfinished statement styles and avoided complex structures of questions. We have implemented the (how common is ...) and (what is the likelihood that ...) styles of questions as we believe that the reader's intuition and clinical sense last longer, in mind, than figures do.
