The authors of this important work, Miguel Aon and Sonia Cortassa have

travelled widely to work in some of the leading research laboratories to accumulate a large information base on which to assemble this book. Taking a transdisciplinary approach, the authors draw on work at the interface of biochemistry, genetics, physiology, thermodynamics, kinetics and biomathematics, using mathematical models throughout to corroborate and analyze the biological complexity presented. Emphasizing biological processes occurring at the cellular level. *Dynamic Biological Organization* gives exciting insights into the experimental and theoretical applications of modern scientific paradigms to

fundamental biological processes.
