and James Fowler explain the amazing power of social networks and our profound influence on one another's lives. Your colleague's husband's sister can make you fat, even if you don't know her. A happy neighbor has more impact on your happiness than a happy spouse. These startling revelations of how much we truly influence one another are revealed in the studies of Dr. Christakis and Fowler, which have repeatedly made front-page news nationwide. In *Connected*, the authors explain why emotions are contagious, how health behaviors spread, why the rich get richer, even how we find and choose our

partners. Intriguing and entertaining, *Connected* overturns the notion of the individual and provides a revolutionary paradigm—that social networks influence our ideas, emotions, health, relationships, behavior, politics, and much more. It will change the way we think about every aspect of our lives.

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the

critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results:

- The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients
- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping
- The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service

In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in

psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

When it comes to reporting on politics, nobody does it smarter or funnier than bestselling author Molly Ivins. In *Shrub*, Ivins focuses her Texas-size smarts on the biggest politician in her home state: George Walker Bush, or "Shrub," as Ivins has nicknamed Bush the Younger. A candidate of vague speeches and an ambiguous platform, Bush leads the pack of GOP 2000 presidential hopefuls; "Dubya" could very well be our next president. What voters need now is an original, smart, and accessible analysis of Bush--one that leaves the "youthful indiscretions" to the tabloids and gets to the heart of his policies and motivations. Ivins is the perfect woman for the job. With her trademark wit and down-home wisdom, Molly Ivins shares three pieces of

advice on judging a politician: "The first is to look at the record. The second is to look at the record. And third, look at the record." In this book, Ivins takes a good, hard look at the record of the man who could be the leader of the free world. Beginning with his post-college military career, Ivins tracks Dubya's winding, sometimes unlikely path from a failed congressional bid to a two-term governorship. Bush has made plenty of friends and supporters along the way, including Texas oil barons, evangelist Billy Graham, and co-investors in the Texas Rangers baseball team. "You would have to work at it to dislike the man," she writes. But for all of Bush's likeability, Ivins points to a disconcerting lack of political passion from this ascending presidential candidate. In her words, "If you think his daddy had trouble with 'the vision thing,' wait till you meet this one." Witty, trenchant, and on target, Ivins gives a singularly perceptive and entertaining analysis of George W. Bush. To head to the voting booth without it would be downright un-American. From *Shrub: The Short but Happy Political Life of George W. Bush* "The past is prologue in politics. If a

politician is left, right, weak, strong, given to the waffle or the flip-flop, or, as sometimes happens, an able soul who performs well under pressure, all that will be in the record." Bush's welfare record: "Texas pols like to 'git tuff' on crime, welfare, commies, and other bad stuff. Bush proposed to git tuff on welfare recipients by ending the allowance for each additional child--which in Texas is \$38 a month." Bush and the Christian right: "Bush has learned to dance with the Christian right. It has been interesting and amusing to watch the process. Interesting because it's sometimes hard to tell who's leading and who's following; amusing because when a scion of Old Yankee money gets together with a televangelist with too much Elvis, the result is swell entertainment." Bush's environmental record: Since Governor Bush's election, Texas air quality has been rated the worst in the nation, leading all fifty states in overall toxic releases, recognized carcinogens in the air, cancer risk, and ten other categories of pollutants. Bush's military career: "Bush was promoted as the Texas Air National Guard's anti-drug poster boy, one of life's little ironies given

the difficulty he has had answering cocaine questions all these years later. 'George Walker Bush is one member of the younger generation who doesn't get his kicks from pot or hashish or speed,' reads a Guard press release of 1970. 'Oh, he gets high, all right, but not from narcotics.'"

Crack the Secret of Successful Screenwriting John Wiley & Sons

A favourite character from BBC TV sitcom 'Allo 'Allo!, undercover British agent and head of Nouvion Police, Officer Crabtree, has usually sought to remain undercover if not exactly invisible—which befits his secret agent roots masquerading as a poloceman. In this delightful book, his self-taught yet masterly grasp of Fronch speaks for itself as it falls under the spotlight as never before. From 'Ploose may I hov a kippy of the dooly nosepooper?' to 'frigs logs', 'scrimbled oggs' and 'fosh and chops' the book is a tribute to mangled words, thoughts and phrases. Arthur Bostrom, who played Crabtree on stage and screen, mixes vowels and mispronunciation as he strives to educate those less well-versed in the French longwodge. Illustrated by John Cooper and ideal for travellers and fans of 'Allo 'Allo! alike, Good Moaning France! is a wake-up call for anyone conceited enough to think they are competent in French (or English or any other language for that matter). With readers' questions answered in Ask Crabtree, examples from Crabtree's poloce newtberks and a most unhelpful Undex. With a Foreword by music legend Rick Wakeman and

permission of the estates of 'Allo 'Allo! screenwriters David Croft and Jeremy Lloyd this is the perfect book for anyone crossing or travelling beneath the Channel to France. Reviews 'Listen very carefully, you will read this more than once. I loaved it'-- Les Dennis. 'I've not laughed at anything like I've laughed at Crabtree ever in my life, this book is "very good nose"'-- Justin Moorhouse. 'Buck your fairy trip to Fronce now and take Crabtree's guide with you. A must-read. Hilarious'-- Su Pollard. 'DO NOT BUY ZIS BOOK!!! IF YOU DO, YOU VILL BE SHOT!!!'-- Helga.

Virus of the Mind is the first popular book devoted to the science of memetics, a controversial new field that transcends psychology, biology, anthropology, and cognitive science. Memetics is the science of memes, the invisible but very real DNA of human society. In *Virus of the Mind*, Richard Brodie carefully builds on the work of scientists Richard Dawkins, Douglas Hofstadter, Daniel Dennett, and others who have become fascinated with memes and their potential impact on our lives. But Richard goes beyond science and dives into the meat of the issue: is the

emergence of this new science going to have an impact on our lives like the emergence of atomic physics did in the Cold War? He would say the impact will be at least as great. While atomic bombs affect everybody's life, viruses of the mind touch lives in a more personal and more pernicious way. Mind viruses have already infected governments, educational systems, and inner cities, leading to some of the most pervasive and troublesome problems of society today: youth gangs, the welfare cycle, the deterioration of the public schools, and ever-growing government bureaucracy. Viruses of the mind are not a future worry: they are here with us now and are evolving to become better and better at their job of infecting us. The recent explosion of mass media and the information superhighway has made the earth a prime breeding ground for viruses of the mind. Will there be a mental plague? Will only some of us survive with our free will intact? Richard Brodie weaves together science, ethics, and current events as he raises these and other very disturbing questions about memes.

Christopher Nolan's previous films have reflected the uncertainties of the

twentieth-first century. With *Dunkirk*, Nolan has gone back into the past and brought to life one of the momentous events of the twentieth-century - the evacuation of British troops from Dunkirk, telling the tale by land, sea, and sky. *Dunkirk* opens as hundreds of thousands of British and Allied troops are surrounded by enemy forces. Trapped on the beach with their backs to the sea, they face an impossible situation as the enemy closes in. The film features a prestigious cast, including Kenneth Branagh, Cillian Murphy, and newcomer Fionn Whitehead, with Mark Rylance and Tom Hardy. The screenplay is accompanied by a conversation about the film between Christopher Nolan and Jonathan Nolan, as well as selected storyboards.

The Power of Introverts in a World That Can't Stop Talking by Susan Cain Orient Blackswan

Veteran script consultant Jill Chamberlain discovered in her work that an astounding 99 percent of first-time screenwriters don't know how to tell a story. These writers may know how to format a script, write snappy dialogue, and set a scene. They may have interesting characters and

perhaps some clever plot devices. But, invariably, while they may have the kernel of a good idea for a screenplay, they fail to tell a story. What the 99 percent do instead is present a situation. In order to explain the difference, Chamberlain created the Nutshell Technique, a method whereby writers identify eight dynamic, interconnected elements that are required to successfully tell a story. Now, for the first time, Chamberlain presents her unique method in book form with *The Nutshell Technique: Crack the Secret of Successful Screenwriting*. Using easy-to-follow diagrams (“nutshells”), she thoroughly explains how the Nutshell Technique can make or break a film script. Chamberlain takes readers step-by-step through thirty classic and contemporary movies, showing how such dissimilar screenplays as *Casablanca*, *Chinatown*, *Pulp Fiction*, *The Usual Suspects*, *Little Miss Sunshine*, *Juno*, *Silver Linings Playbook*, and *Argo* all have the same system working behind the scenes, and she teaches readers exactly how to apply these principles to their own screenwriting. Learn the Nutshell Technique, and you'll discover how to turn

a mere situation into a truly compelling screenplay story.

A Memoir Hay House, Inc

The essays in this book, written by researchers from both humanities and science, describe various theoretical and experimental approaches to adding medical ethics to a machine, what design features are necessary in order to achieve this, philosophical and practical questions concerning justice, rights, decision-making and responsibility in medical contexts, and accurately modeling essential physician-machine-patient relationships. In medical settings, machines are in close proximity with human beings: with patients who are in vulnerable states of health, who have disabilities of various kinds, with the very young or very old and with medical professionals. Machines in these contexts are undertaking important medical tasks that require emotional sensitivity, knowledge of medical codes, human dignity and privacy. As machine technology advances, ethical concerns become more urgent: should medical

machines be programmed to follow a code of medical ethics? What theory or theories should constrain medical machine conduct? What design features are required? Should machines share responsibility with humans for the ethical consequences of medical actions? How ought clinical relationships involving machines to be modeled? Is a capacity for empathy and emotion detection necessary? What about consciousness? This collection is the first book that addresses these 21st-century concerns. Random House

This groundbreaking book explains prognosis from the perspective of doctors, examining why physicians are reluctant to predict the future, how doctors use prognosis, the symbolism it contains, and the emotional difficulties it involves. Drawing on his experiences as a doctor and sociologist, Nicholas Christakis interviewed scores of physicians and searched dozens of medical textbooks and medical school curricula for discussions of prognosis in an attempt to get to the core

of this nebulous medical issue that, despite its importance, is only partially understood and rarely discussed. "Highly recommended for everyone from patients wrestling with their personal prognosis to any medical practitioner touched by this bioethical dilemma."—Library Journal, starred review "[T]he first full general discussion of prognosis ever written. . . . [A] manifesto for a form of prognosis that's equal parts prediction-an assessment of likely outcomes based on statistical averages-and prophecy, an intuition of what lies ahead."—Jeff Sharlet, Chicago Reader "[S]ophisticated, extraordinarily well supported, and compelling. . . . [Christakis] argues forcefully that the profession must take responsibility for the current widespread avoidance of prognosis and change the present culture. This prophet is one whose advice we would do well to heed."—James Tulsky, M.D., New England Journal of Medicine
