Lemon-Aid Used Car Guide 1996

This title was first published in 2002. The interest in becoming globally competitive through network strategies, particularly networks between small and medium-sized firms in local business communities, is high among academic researchers, economic development agencies and growth orientated firms. Important contributions to our understanding of the strategic use of networks are coming from a number of disciplinary and theoretical perspectives. This volume provides a unique opportunity to both synthesize this

diverse literature and report the results of original research. It is particularly relevant to scholars of business and management, geography and economics
