Professional translators are increasingly dependent on electronic resources, and trainee translators need to develop skills that allow them to make the best use of these resources. The aim of this book is to show how CULT (Corpus Use for Learning to Translate) methodologies can be used to prepare learning materials, and how novice translators can become autonomous users of corpora. Readers interested in translation studies, translator training and corpus linguistics will find the book particularly useful. Not only does it include practical, technical advice for using and learning to use corpora, but it also addresses important issues such as the balance between training and education and how CULT methodologies reinforce student autonomy and responsibility. Not only is this a good introduction to CULT, but it also incorporates the latest developments in this field, showing the advantages of using these methodologies in competence-based learning.

The book begins by presenting research on student learning through multimedia and digital content creation. This introduction is followed by outlines of each stage of the practical, easy-to-use Decide, Design, Develop, and Evaluate (DDD-E) model, which is designed specifically for classroom use. Content also includes discussion of multiple intelligences, constructivist learning, and cooperative grouping; blackline masters to guide you and your students through the DDD-E process; and assessment and management strategies. In addition, you'll find sample activities using an array of development tools, information on mobile and web apps, and numerous other resources to support digital projects in your classroom. If you are interested in this book, I presume you have written a book or plan to write one, and are thinking of self-publishing it. If so, this is the place to start. If you self-publish a non-fiction book of interest to a defined target market, or a book of fiction for people who read the genre you have produced, you can begin to promote it to interested readers. I have sold close to 10,000 books. So while I'm no E.L. James (author of the originally self-published 50 Shades of Grey), I am a happy and profitable self-published author. Perhaps you can become one too. Having said that, your desire to self-publish may not be all about book sales. You may be looking to write a book to give to family and friends. You may be looking to gain the credibility that publishing a book gives a speaker or workshop leader. You may have other reasons for publishing your book. No matter your reason, this book will answer many of your self-publishing questions, point you in the right direction and get you started. In short, as the title says, this book will help you produce, price and promote your self-published book.
