 PPT - Chapter 14 Work, Power, and Machines PowerPoint ...14-2
 A machine is something that changes a force and makes work easier. Machines may change a force in three ways. 1. increase the size of the force; 2. change the direction of the force; 3. increase the distance over which the force acts. The force you put into a machine is the input force. The distance over which the input force acts is the input distance. The work you do on the machine is the work input.
