Journal Eleven years ago, Lindsey Nash

escaped into the night with her young

daughter and left an abusive

But she gets the sense that someone is watching her, tracking her every move. Her new boyfriend is threatened. Her home is invaded, and her daughter is shadowed. India presents a unique example with its high potential in manufacturing capability but low integration in GVCs. This book examines the reasons why India has failed to integrate within GVCs so far and looks at key examples to

understand the impediments in this process. The chapters bring together case studies from across the manufacturing industry – labour-intensive (garment, paper and diamond), capital-intensive (automobile and petrochemical), and knowledge-intensive (semi-conductor microchip, chemical and pharmaceutical) sectors. Together, they present stories of successful integration of some firms in GVCs as well as the difficulties faced by them. The volume also highlights the importance of GVCs in the context of developing countries in terms of benefits such as income and value generation, knowledge and technology collaborations, and advances in systems and processes. This book will interest scholars and researchers in economics, international trade studies,

development economics and business management as well as to practitioners, policymakers, government officials, and those in the corporate sector.

In today's era of International business, International Human Resource Management (IHRM) is emerging as a crucial factor since organizations are run by people. What is interesting in this phenomenon is, not only that there are differences in people across the countries, but even within a country or regions within it. This complex socio-cultural and psychological fabric coupled with historical, geographic, economic and political factors, creates certain boundary conditions and makes IHRM a very complex process. The intention of this book is to portray the various factors that are connected with managing Human Resources in International Business. Since the two are inseparable, any organization aspiring to participate

as a player in international business must develop the knowledge, skills and acumen to perceive the subtle nuances that govern the rules of game. IHRM as a discipline cuts across all other business operations in the international context and plays a vital role in the success or failure of a business venture since, businesses are essentially driven by people. In the light of the above, this book has sought to address some of the issues that relate to IHRM, which need to be logically understood by any keen observer of international business, today. The approach of this book has been to detail IHRM both, in terms of a function, as well as a process and the factors or key elements that are attached to them. To make this book reader-friendly, chapter highlights have

been added at the beginning of each chapter to facilitate the reader to identify the broader areas that may be learnt from a particular chapter. Each chapter also contains detailed references and key terms. Conceptual questions, multiple choices, web-based exercises are some of the additional features of the book. Relevant diagrammatic representation, relevant case study and list of web references have been also added in this book.

Managing people in a multinational context is the essence of international human resource management. This requires a broader perspective of what

operating internationally involves, and a clear recognition of the range of issues pertaining to all categories of staff operating in different functional, task and managerial capacities. Books that are available on the subject are heavily loaded with cultural aspects rather than HRM processes. From teaching experience, it is noticed that students who are familiar with domestic HRM books find it difficult to comprehend the subject of international HRM. Therefore the topics are arranged in the traditional HRM style with international implications at each stage. A separate chapter is allocated for Expatriation & Repatriation. Similarly Management of People in international context in sixteen countries is discussed in a separate chapter. The text aims to cover in terms of industries,

to illustrate the activities and approaches of international organisations. Also, the coverage of different cultures is not intended to include all the different and diverse cultures of the world, simply to enable sufficient understanding of the cultural contexts from which many of the approaches are derived, and to provide background on the appropriateness of different aspects of managing people in international organisations. A detailed treatment to empirical researches on cross cultural issues and cross cultural, comparative management issues arising out of cross border mergers and acquisitions as well as human resource issues emerging out of global acquisitions of Arcelor and Corus by Indian companies and companies of

Indian origin are also treated in the text. *Extremophiles* Bsp Books Pvt. Limited
