This volume explores the process of heritage making and its relation to the production of touristic places, examining several case studies around the world. Most existing literature on heritage and tourism centers either on its managerial aspects, the tourist experience, or issues related to inequality and identity politics. This volume instead establishes theoretical links between analyses of heritage and the production and reproduction of places in the context of the global tourist trade. The approach adopted here is to explore the production of heritage as a complex process shaped by local and global discourses that can have a deep impact on several policies and legislations. Heritage itself has now become not only a global discourse, but also a global practice, which may eventually lead to the use of heritage as a field for hegemony. From these perspectives, heritage

making may be incorporated in the world economy, mainly through the global tourism trade. The chapters in this book stress the need for identifying the intrinsic political implications of these processes, relocating their study in political, economic and social settings. Combined with a diversified set of theoretical approaches and research methods, guided by a common thematic rationale, *The Making of Heritage* is at the forefront of current debates about heritage.

How can we effectively interpret and present one culture to another without stereotypes or over-simplifications? What is the best way to present an authoritative version of a national heritage without also endangering ancient sites or being insensitive to the local customs, beliefs, and religious practices of the indigenous peoples? This volume addresses the ongoing thrust in archaeology to take the next step after preserving the past: interpreting that past for the future. That future audience includes both local citizens and tourists who may have little background in archaeology, anthropology, or the history of the culture featured. Walker presents the key components of the anthropological study of tourism as a global phenomenon, with particular emphasis on the more prominent arguments for how and why tourism is a universal and meaningful human activity. The highly controversial topic of authenticity is examined, with special attention given to how "authentic" has been defined and how it relates to the ways in which archaeological sites, artifacts, and cultural traditions are presented--or not presented--to the visiting public. The ephemeral promise of "authenticity" drives the heritage tourism industry, which is a key consideration for the long term economy of the Maya Riviera and elsewhere. Through analysis of seven archaeological sites on the Yucatan peninsula that are open to heritage touring, Walker reveals the planned growth of the Maya Riviera since the early 1970s and examines the impact of international tourism on both ancient structures and the contemporary Maya people and culture.

This book attempts to dismantle the unfounded Eurocentric view of US-born and immigrant Mexican peoples, that groups together the identities of Latinx, Chicanx, and other indigenous peoples of the Southwest into Hispanics whose contributions to the cultural, historical, and social development of the Southwest are marginalized or made non-existent. The narrative and performative legacies that tourism and fantasy heritage produce are promulgated and consumed by both Latinx and non-Latinx peoples and cultures. This book endeavors to expose these productions through analysis of on-the-ground resistance in the service and spirit of intercultural dialogue and change. This book will offer a precise set of recommendations for breaking away from these practices and thus forming new, veritable identities. With a strongly heritage-oriented discourse, this book on deconstructing Eurocentric representation of Mexican people and their culture will appeal to academics and scholars of heritage tourism, Chicano studies, Southwest studies and Native American studies courses.

Frommer's 2001 Mexico Nicholas Khatchadourian

This worldwide study examines how religion gets into theme parks – as mission, as an aspect of culture, as fable, and by chance. Gods and Rollercoasters analyses religion in theme parks, looking at how it relates to modernism, popular culture, right-wing politics, nationalism, and the rise of the global middle class. Crispin Paine argues that religion has discovered a major new means of expression through theme parks. From the reconstruction of Biblical Jerusalem at the Holy Land Experience in Orlando, through the world of Chinese mythology at Haw Par Villa in Singapore, to the great temple/theme park Akshardham in New Delhi, this book shows how people are encountering and experiencing religion in the context of fun, thrills and leisure time. Drawing on examples from six of the seven continents, and exploring religious traditions including Christianity, Daoism, Buddhism, Hinduism and Islam, Gods and Rollercoasters provides a significant contribution to the study of religion, sociology, anthropology, and popular culture.

Explorer's Guide Mexico's Aztec & Maya Empires (Explorer's Complete) Hunter Publishing, Inc

The essays collected here offer important new reflections on the multiple images of and rhetoric surrounding the rain forest. The slogan "Save the Rain Forest!"—emblazoned on glossy posters of tall trees wreathed in vines and studded with monkeys and parrots—promotes the popular image of a marvelously wild and vulnerable rain forest. Although representations like these have fueled laudable rescue efforts, in many ways they have done more harm than good, as these essays show. Such icons tend to conceal both the biological variety of rain forests and the diversity of their human inhabitants. They also frequently obscure the specific local and global interactions that are as much a part of today's rain forests as are the array of plants and animals. In attending to these complexities, this volume focuses on specific portrayals of rain forests and the consequences of these characterizations for both forest inhabitants and outsiders. From diverse disciplines—history, archaeology, sociology, literature, law, and cultural anthropology—the contributors provide case studies from Latin America, Asia, and Africa. They point the way toward a search for a rain forest that is both a natural entity and a social history, an inhabited place and a shifting set of ideas. The essayists demonstrate how the single image of a wild and yet fragile forest became fixed in the popular mind in the late twentieth century, thereby influencing the policies of corporations, environmental groups, and governments. Such simplistic conceptions, In Search of the Rain Forest shows, might lead companies to tout their "green" technologies even as they try to downplay the dissenting voices of native populations. Or they might cause a government to create a tiger reserve that displaces peaceful peasants while opening the doors to poachers and bandits. By encouraging a nuanced understanding of distinctive, constantly evolving forests with different social and natural histories, this volume provides an important impetus for protection efforts that take into account the rain forest in all of its complexity. In this highly acclaimed book, now available in paperback, Joel Simon vividly describes the environmental crises facing Mexico today, from the smog-choked shantytowns of Mexico City to the decaying coral reefs off the island of Cancun to rural villages impoverished by the overuse of chemical fertilizers that ruined the land. Deftly combining historical research with extensive personal interviews, Simon describes the failed development policies that have caused such environmental destruction and reveals the crucial links between Mexico's environmental pollution and the social anti economic problems that threaten its political stability. Richly detailed and provocatively argued, Endangered Mexico transforms our understanding of the challenges Mexico currently faces.
