 In this new edition of their groundbreaking book *Strategies That Work*, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become

engaged, thoughtful, independent readers. Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular "Great Books for Teaching Content," are accessible online. Since the first publication of *Strategies That Work*, more than a million teachers have benefited from Steph and Anne's practical advice on creating classrooms that are incubators for deep thought. This third edition is a must-have resource for a generation of new teachers--and a welcome refresher for

those with dog-eared copies of this timeless guide to teaching comprehension.

Connect to Comprehension is a comprehensive, scripted intervention reading program for struggling readers in grades 1-8. It is effective for small group intervention as well as for one-on-one tutoring. This program was developed to provide students who struggle with decoding access to upper-level comprehension instruction. Struggling readers typically don't get practice in these comprehension skills either because the reading materials are too difficult to decode or the lower-level text they can read are not engaging and motivating. As a result, when struggling readers begin to become more fluent, they then have to conquer their gaps in comprehension, especially upper-level skills such as making inferences, determining cause and effect, comparing and contrasting. In Connect to Comprehension, these upper-levels skills are explicitly taught, scaffolded, and practiced while students are learning and practicing basic decoding/structural analysis skills.

Radically change the way students learn from texts, extending beyond comprehension to critical reasoning and problem solving. Is your reading comprehension instruction just a pile of strategies? There is no evidence that teaching one strategy at a time, especially with pieces of text that require that readers use a variety of strategies to successfully negotiate meaning, is effective. And how can we extend comprehension beyond simple meaning? Bestselling authors Douglas Fisher, Nancy Frey, and Nicole Law propose a new, comprehensive model of reading instruction that goes beyond teaching skills to fostering engagement and motivation. Using a structured, three-pronged approach—skill, will, and thrill—students learn to experience reading as a purposeful act and embrace struggle as a natural part of the reading process. Instruction occurs in three phases: Skill. Holistically developing skills and strategies necessary for students to comprehend text, such as monitoring, predicting, summarizing, questioning, and inferring. Will. Creating the mindsets, motivations, and habits, including goal setting and choice, necessary for students to engage fully with texts. Thrill. Fostering the thrill of comprehension, so that students share their thinking with others or use their knowledge for something else. Comprehension is the structured framework you need to empower students to comprehend text and take action in the world.

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
