learn about the properties of solids, liquids and gases"-- Nomad Press Features safe, inexpensive science experiments with mixtures that illustrate changes in phase and chemical composition. **Many Kinds of Matter** Courier Corporation Solids, Liquids and Gases has 13 experiments carefully chosen by the Ontario Science Centre. With minimal supervision, children can

explore the three states of matter, what makes each state unique and how matter changes from a solid to a liquid to a gas through evaporation, condensation, melting and freezing. Filled with bright photographs, the Starting with Science series provides valuable lessons about basic science for five to eight year olds. **Solids, Liquids, and Gases** Routledge For a kid,

watching a solid turn into a liquid or a liquid into a gas is nothing short of magic. In *Explore Solids and Liquids! With 25 Great Projects* kids experience the wonder of different states of matter. They'll learn what matter is made of, how it can change, and how these interactions really work in our universe. With plenty of activities and projects, young readers gain a solid understanding of the matter they touch,

see, feel, and experience every single day. As young readers discover the basic concepts and vocabulary of chemistry, they will experiment with household objects to discover how solids, liquids, and gases occupy space. Kids will dissolve solids into liquids and bring them back again, use salt and pepper to demonstrate water's surface tension, and fly helium-filled balloons

to see what happens to molecules at different temperatures. Illustrated with cartoon and filled with fun facts, *Explore Solids and Liquids!* makes science entertaining and exciting. *Explore Solids and Liquids!* meets common core state standards in language arts for reading informational text and literary nonfiction and is aligned with Next Generation Science Standards.

Guided Reading Levels and Lexile measurements indicate grade level and text complexity.

McGraw-Hill
The water you drink. The air you breathe. This book you're holding. Everything around you is made of matter. Learn more about what makes up matter, the forms it can take, and nature's rules about it. With inexpensive items that you probably have lying around your home, you can do these easy and fun experiments on solids, liquids, and gases. Think like a chemist

as you construct a tower of liquids, grow your own crystals, and even measure the speed of smell. Explore the powerful world of matter, from the visible to the invisible.
