This book investigates the best strategies for poverty alleviation in post-disaster urban environments, and the conditions necessary for the success and scaling up of these strategies. Using the case study of Typhoon Yolanda (Haiyan) in the Philippines, the strongest typhoon ever to make landfall, the book aims to draw out policy recommendations relevant for other middle- and lower-income countries facing similar urban environmental challenges. Humans are increasingly living in densely populated and highly vulnerable areas, often coastal. This increased density of human settlements leads to increased material damage and high death tolls, and this vulnerability is often exacerbated by climate change. This book focuses on urban population risk, vulnerability to disasters, resilience to environmental shocks, and adaptation in relation to paths in and out of poverty. Using both qualitative and quantitative methods, including primary survey data from victims and those charged with overseeing the relief effort in the Philippines, *Urban Poverty in the Wake of Environmental Disaster* has significant implications for disaster risk reduction as it relates to the urban poor and is highly recommended for scholars and practitioners of development studies, environment studies, and disaster relief and risk reduction.

Was wir schon jetzt über mögliche Zukünfte lernen können und wie wir uns darauf vorbereiten sollten Immer wieder erprobt die Menschheit das Leben in »idealen« Welten. Dazu zählten bislang etwa anarchische Reformkommunen, eine spirituelle Weltbürger:innen-Stadt in Indien, hocheffiziente Smart Cities oder geplante Unterwasserstädte, aber auch Kolonien auf Mond und Mars. Das Wunschland findet sich immer wieder zwischen sozialen und technologischen Utopien und

hat das Potenzial, die Welt zu verändern. Der Soziologe Stefan Selke zeigt anhand zahlreicher Inneneinsichten in real-utopische Projekte, welche gesellschaftlichen Transformationen es bislang gab und welche künftig zu erwarten sind. Techno-Propheten basteln Exit-Strategien für unseren kaputten Planeten: Schwimmende Mikronationen in internationalen Gewässern, Roboterstaaten mit eigener Gesetzgebung oder von Künstlicher Intelligenz gesteuerte Projekte zeugen vom Wettstreit zwischen sozialen und technologischen Innovationen. Stefan Selke liefert einen hoch spannenden Werkstattbericht aus dem Labor der Menschheit. Zugleich schaut er in den Rückspiegel und zeigt, was wir von bereits erprobten utopischen Projekten lernen können. Er fordert einen radikalen Perspektivwechsel für kooperative planetarische Gestaltungsstrategien – einen utopischen »New Deal«.

East Asia is a region deeply affected by conflict. Colonial, ideological, and national wars have left their scars and legacies on regional, international, and national governance. Yet East Asian post-conflict development experiences have been viewed as remarkably successful. The three largest economies of East Asia, Japan, China, and South Korea, have all experienced dramatic growth but immediately prior to their periods of expansion, all experienced the devastating impacts of international conflicts and/or civil upheaval. These post-conflict development 'success' stories do not, however, tell the whole tale. Other states in East Asia and in particular certain regions within some of these states, while apparently emerging from similar conflictual backgrounds, have experienced far less positive transitions. This volume critically assesses measurements of success in East Asian post-conflict development from a human-centered perspective. This involves a major re-evaluation of accepted accounts of domestic governance and international relations in East Asia from both a comparative and inter-disciplinary viewpoint. Case study rich, this volume provides policy prescriptions for East Asian donors and actors in an effort to provide Asian solutions for Asian problems.

Sowohl die zurückliegende Finanz-, Wirtschafts- und Eurokrise als auch die aktuelle Corona-Krise zeigen, dass wir in Europa von einer stabilen und nachhaltigen Wirtschaftsentwicklung weit entfernt sind. Hinzu kommen bisher ungelöste Fragen unserer Zeit: der Klimawandel, die Digitalisierung, der demografische Wandel, die ökonomische und soziale Ungleichheit, die Globalisierung. Nur mit progressiven Politikansätzen kann es gelingen, die großen Herausforderungen, vor denen Europa steht, besser zu bewältigen. In ihren Beiträgen fragen die Autorinnen und Autoren dieses Bandes nach Visionen für die Zukunft der EU, nach dem erhofften Green New Deal und der notwendigen sozialen Dimension Europas. Sie nehmen dabei die Fiskal-, Geld- und Steuerpolitik, die Sozial- und Klimapolitik, die Wettbewerbs-, Handels- und Industriepolitik sowie die Technologie- und Innovationspolitik in den Blick. Welche Fehlentwicklungen gibt es? Wie können sie korrigiert werden? Welche wirtschaftspolitischen Maßnahmen sind dafür geeignet? Was müssen wir aus den Erfahrungen in der Corona-Krise lernen? Mit Beiträgen von Norbert Walter-Borjans, Reiner Hoffmann, Sebastian Dullien, Gustav Horn, Ulrike Guérot, Achim Truger u.a.

*Urbanization in Northern Corridor Economic Region in Malaysia* presents five chapters: Introduction, Paradigm of Urbanization, The Rise of Urbanization, Urbanization in Northern Corridor Economic Region, and Strategy on Urbanization. The book provides an insight into scientific literature on the topic of urbanization, encompassing a variety of publications such as books, magazines, journals, and other formats. The notion of urbanization, related to the urban model and theory, is becoming recognized in academic spheres. Urban theory, within the urban context, aims to define objectives and distinct approaches for the common realization of city living. Urban transition consists of a variety of elements that transform the urban region. The data presented in the book examines the link between various perspectives on urbanization and their outcomes. The strategies on

urbanization must involve many domains, because an estimated 1.6 billion citizens currently reside in urban regions.

Beyond the scope of the dispute settlement between the Philippines and China, the South China Sea arbitral award can be thought to significantly influence the development of international law and the law of the sea. Accordingly, this book seeks to examine the South China Sea arbitration from the perspective of the development of public international law and its limitations. Specifically it addresses the issues of jurisdiction of the Annex VII Arbitral Tribunal, the historic rights, the legal status of maritime features, the lawfulness of various activities of China, and the role of the South China Sea arbitration in the international dispute settlement. In considering these issues, this book examines the South China Sea arbitration in three respects: (i) the clarification of relevant rules and obligations under the UN Convention on the Law of the Sea as well as international law, (ii) the protection of community interests at sea, and (iii) considerations of time elements in international law.

A surprisingly hopeful assessment of the prospects for human rights in the Middle East, and a blueprint for advancing them The enormous sense of optimism unleashed by the Arab Spring in 2011 soon gave way to widespread suffering and despair. Of the many popular uprisings against autocratic regimes, Tunisia's now stands alone as a beacon of hope for sustainable human rights progress. Libya is a failed state; Egypt returned to military dictatorship; the Gulf States suppressed popular protests and tightened control; and Syria and Yemen are ravaged by civil war. Challenging the widely shared pessimism among regional experts, Micheline Ishay charts bold and realistic pathways for human rights in a region beset by political repression, economic distress, sectarian conflict, a refugee crisis, and violence against women. With due attention to how patterns of revolution and counterrevolution play out in different societies and historical contexts, Ishay reveals the progressive potential of subterranean human rights forces and offers strategies for transforming current realities in the Middle East.

This book examines the attitudes of political, military and non-state actors towards the idea of a UN Emergency Peace Service, and the issues that might affect the establishment of this service in both theory and practice. The United Nations Emergency Peace Service (UNEPS) is a civil society-led idea to establish a permanent UN service to improve UN peace operations as well as to operationalise the emerging norm of the 'responsibility to protect' civilians from atrocity crimes. The UNEPS proposal has received limited support. The book argues that interest in, and support for, the UNEPS proposal is determined by perceptions that it would erode state sovereignty, the extent to which the principles of the proposal are consistent with actors' views on the world and perceptions on whether UNEPS will realistically be capable of contributing to the workings of the UN and regional peacekeeping systems in areas that are seen to be deficient. This book makes the case for localising the UNEPS proposal so that it is more consistent with attitudes of those consulted for this research. It concludes that the development of a series of less ambitious proposals could be the first steps to creating a rapidly deployable service with the mandate to prevent atrocity crimes. This book will be of much interest to students of peace operations, the Responsibility to Protect, international organisations, IR and security studies.

Unbemannte Waffensysteme – umgangssprachlich Drohnen – entfachen kontroverse Debatten. Zwei Entwicklungen sind dabei zentral: zum einen die zunehmende Bewaffnung unbemannter Systeme, zum anderen ihre Autonomisierung. Während diese für die einen das „drohende Ende der

Menschlichkeit“ bedeuten, gelten sie für andere als Ausdruck einer fortschreitenden Technisierung und „Humanisierung“ der Kriegsführung. Die mit unbemannten Waffensystemen verbundenen Herausforderungen sind vielschichtig. Sie stehen im Fokus dieses Bandes. Seine Autorinnen und Autoren diskutieren Fragen der Veränderung der Kriegsführung und ihrer Legitimität, völkerrechtliche Dimensionen, strategische und sicherheitspolitische Aspekte, Rüstungskontrollfragen und theologische Rekonstruktionen.
