DEVIN JAIDYN

Springer Science & Business Media
This book undertakes a comparative study of the history and development of legislative and administrative systems in operation today for the protection of archaeological monuments. With the exception of Scandinavia and the United

Kingdom, no country adopted a positive policy towards the protection and conservation of its archaeological and historical heritage until the twentieth century. Moreover, it was not until the middle of that century, under the threat of wholesale devastation from extensive schemes for social and economic development, that the accelerating disappearance of the sites and monuments of Antiquity became the

object of intensive study and legislation. Since then systems of cultural resource management have developed throughout the world. A range of countries (from Europe, America, Asia and Africa) representing a diversity of political and ideological systems - capitalist, socialist and ex-colonial - have been selected as being broadly representative of the variety of these systems. The case studies have been written by distinguished archaeologists and provide critical evaluations of the objectives and shortcomings of these systems.

From Codicology to Technology Walter de Gruyter

Human heritage is an endless mine of knowledge, skills, ethos and accomplishments, which visualize and

examine the power of human creativity and innovation throughout the history. The contributions cast an insight into the human psyche to perceive its Weltanschauung, and its way of thinking and making artefacts associated with knowledge, existence and identity in the context of other existing systems in the world. They demonstrate the diversity of topics as well as the state-of-the art of interdisciplinary approaches that participants of the Humboldt-Kolleg use in their research on cultural heritage, and confirm, once again, that the strengths of the Alexander von Humboldt Network should be celebrated and honoured. The present volume invites us to seek more novel research approaches that aim towards an understanding of the complex nature of

human inheritance.

The five volume set LNCS 10960 until 10964 constitutes the refereed proceedings of the 18th International Conference on Computational Science and Its Applications, ICCSA 2018, held in Melbourne, Australia, in July 2018. Apart from the general tracks, ICCSA 2018 also includes 34 international workshops in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as computer graphics and virtual reality. The total of 265 full papers and 10 short papers presented in the 5-volume proceedings set of ICCSA 2018, were carefully reviewed and selected from

892 submissions.

Crowdsourcing our Cultural Heritage
Springer Science & Business Media

This book includes carefully selected papers presented at the 10th International Conference on Knowledge, Information and Creativity Support Systems (KICCS 2015), which was held in Phuket, Thailand, on November 12-14, 2015. Most of the papers are extended versions with the latest results added, representing virtually all topics covered by the conference. The KICCS 2015 focus theme, "Looking into the Future of Creativity and Decision Support Systems", highlighted the field's growing complexity and called for deeper, insightful discussions about the future, complemented with an exposition of current developments that have proven

their value and usefulness. As such, the book addresses topics concerning future-oriented fields of research, such as anticipatory networks and systems; foresight support systems; and relevant newly emerging applications, exemplified by autonomous creative systems. It also focuses on cognitive and collaborative aspects of creativity.

Forestry and Our Cultural Heritage Disha Publications

This book “Preservation in Digital Cartography: Archiving Aspects” should give an overview on how to preserve digital cartographic applications and geospatial data in a sustainable way. The intention of this book is to shape the opinion of affected parties and to bring together various disciplines. Therefore adjacent chapters will generally deal

with information technologies, Service-Oriented Architectures, cybercartography, reproduction and historic cartography, which all together can be subsumed in perspective cartographic heritage. The survival of this digital cartographic heritage will base on long-term preservation strategies that make use of intensive dissemination on the one hand and sustainable digital archiving methods on the other. This includes a massive development of paradigm that expands from “store-and-save” to “keep-it-online”. The paradigm “store-and-save” is mainly used for analogue masters that consist of storage media, like vellum, and their visible content. Avoiding the storage media from degeneration in climate-controlled areas will help to keep

the content accessible. In the digital domain the high interdependency of stage media, format, device and applications leads to the paradigm “keep-- online” which for example describes the migration to new storage devices. In fact this expansion of paradigm means that the digital domain calls for ongoing actions in order to preserve cartography for a long term.

Our Cultural Heritage Amsterdam University Press

India is one of the most ancient civilizations. India is a land of many creeds, the cradle of mankind, the motherland of language, the mother of history, the grandmother of epics and the great grandmother of traditions. Our cultural heritage is ancient, vast, rich and blissful and its sources are—four

Vedas, 18 Puraanas, 108 Upanishads, the Ramayana, the Mahabharata consisting of about one lakh verses, the Agamas of the Jains, the Tripitikas of the Buddhists, the Guru Granth Sahib of the Sikh brothers and the holy words of the pious saints of different regions. As the time has passed, lack of knowledge about the same has failed to create self pride and esteem for these. Also, unfortunately, during the last few centuries, due to external attacks on the country, particularly those by the British, India has lost its capacity of guiding the world. The newly educated generation of this country today is totally unaware of the culture, traditions, philosophy and life values of this country. Sources of Our Cultural Heritage will open the eyes of the people, trying to distance

themselves from Hinduism. This book will let them know the great commonalities. It gives valuable knowledge and information about our vast and enriched cultural heritage in a very simple and lucid language.

Heritage Microbiology and Science Routledge

The paradigm shift in the field of education focuses on the development of life skills, attitudes and values. This was the prime focus which made us divide this series into two themes: LIFE SKILLS and ATTITUDES & VALUES. Each theme strongly voices out in three levels - beginners, the avid readers and the experts making it a six book series. The book "Breathing in Bodhi - the General Awareness/ Comprehension book - Attitude & Values / Level 2 for the avid

readers" is the second of the three books based on the Attitude & Values theme. • The book contains 30 fascinating stories about People, Places, Events, Ideas and Issues. The stories are further based on Attitude & Values - 15 each on Attitude and Values. • The book aims at enhancing the comprehension skills along with augmenting the general awareness of children leading to the development of the Attitude & Values. • The book is an honest attempt to trigger the young minds to think, explore and relate to the world around them. • It makes them THINK, COMPREHEND AND ANALYSE. The articles given for the comprehension purpose are actually in sync to the real world. • Each story has been elaborately discussed and is analysed by the following tools: •

Wordsmith - aims at developing the vocabulary and contextual usage of words. • Finding the Fact - aims at developing the comprehension skills • Extra Inning - gives an opportunity to the reader to explore the extra information related to the story. • Reality Check - a platform to create opinions about the various issues related to the story. • Only when the reader is in a position to generate thoughts/ opinions about a given situation/ issue then only he is in a position to provide a real solution model. • This series is a must have for people who not only want to build in their reading habit and develop their vocabulary but also want to enroot an eye for comprehending, analyzing and transforming their approach from problem finders towards becoming

PROBLEM SOLVERS by reinforcing the power of Attitude & Values. *IAS Foundation for Class 11, 12 & Undergraduate Students (General Studies, Comprehension, Essays & Articles)* Cambridge University Press Crowdsourcing, or asking the general public to help contribute to shared goals, is increasingly popular in memory institutions as a tool for digitising or computing vast amounts of data. This book brings together for the first time the collected wisdom of international leaders in the theory and practice of crowdsourcing in cultural heritage. It features eight accessible case studies of groundbreaking projects from leading cultural heritage and academic institutions, and four thought-provoking essays that reflect on the wider

implications of this engagement for participants and on the institutions themselves. Crowdsourcing in cultural heritage is more than a framework for creating content: as a form of mutually beneficial engagement with the collections and research of museums, libraries, archives and academia, it benefits both audiences and institutions. However, successful crowdsourcing projects reflect a commitment to developing effective interface and technical designs. This book will help practitioners who wish to create their own crowdsourcing projects understand how other institutions devised the right combination of source material and the tasks for their 'crowd'. The authors provide theoretically informed, actionable insights on crowdsourcing in

cultural heritage, outlining the context in which their projects were created, the challenges and opportunities that informed decisions during implementation, and reflecting on the results. This book will be essential reading for information and cultural management professionals, students and researchers in universities, corporate, public or academic libraries, museums and archives.

Traveling Heritages Springer Science & Business Media

Im Juli 2003 fand in Berlin eine Tagung statt, die den Vorkehrungen gewidmet war, die Bibliotheken zum Katastrophenschutz treffen können, sowohl Katastrophen, die von Menschenhand ausgelöst werden (Konflikte, Kriege) als auch

Naturkatastrophen (Erdbeben, Überschwemmungen, Orkane). Ein Gremium internationaler Experten tauschte Erfahrungen aus und diskutierte beispielsweise Planungsmaßnahmen, Verhaltensstrategien, Schulungsanforderungen sowie institutionelle Rahmenbedingungen. Dieser Band enthält die Beiträge zu dieser Tagung.

Heritage Planning Springer

Critical belonging has been an essential feature of Christianity since its origin. This book shows how, by working collaboratively, the “people of God” can credibly meet past and present challenges together. In this way, the diversity and unity within the Christian community are acknowledged and

affirmed.

Sustainable Tourism in Southern

Africa Walter de Gruyter GmbH & Co KG

The valuation of Heritage Assets (HA), which are a vital resource for the non-profit public or private organizations operating in the heritage sector is on the one hand sometimes difficult to do, and on the other, can be excessively costly with respect to the correlated disclosure benefits. The growing application of the (full or modified) accrual basis of accounting in the public and non-profit sectors has extended and reanimated this issue. This book applies the comparative method, in order to provide new information on the analyzed subject. Specifically, after having investigated the different theoretical and technical proposals, it compares the

reporting behavior of significant cases of Italian and American public and private organizations, coming from different cultural and management approaches. Proposing a link between the managerial and reporting issues of the organizations involved in the management and maintenance of heritage assets, this book is crucial in the task to optimize the performance of organizations in this sector.

Biodeterioration of Stone Surfaces

Routledge

Covering the applied managerial perspective of the travel industry, this book looks at the core disciplines and the application of theory to practice. Considering individual and corporate social responsibility, it teaches effective managerial skills by reviewing legal

frameworks, quality management and marketing, financial management, and the management of shareholders and stakeholders. It discusses current trends such as sustainability and governmental emission targets against a background of the needs of a commercial business to innovate and increase profits. A valuable tool for both students and those working in the travel industry, this new edition includes new content, a revised structure and all-new international case studies.

Preparing for the Worst, Planning for the Best: Protecting our Cultural Heritage from Disaster Facet Publishing

IAS is one of the most sought after career these days. For an aspirant to be successful in this exam, he must have a thorough knowledge of India - social,

political, economical, geographical, international climate. Students need to start well in advance such that they not only attain the fundamental knowledge but also gain the ability to generate their opinion and ideas about a topic. The IAS Foundation Book is an attempt in the same direction. Undergraduate Students and class 11/ 12 students who aspire for this career can start with this book. The book provides 175+ articles from diverse areas like History, Geography of the World , Polity Governance, Constitution, Social Justice, International relations, Technology, Economic Development, Bio diversity, Environment, Security, Disaster Management, Ethics, Integrity and Aptitude. These articles not just provide you the complete update on the topic but will also guide you to analyse

and explore the various issues associated with it. The articles are followed by exercises constituting vocabulary questions, comprehension questions, related general awareness questions and opinion creation/ analytical questions. The book provides answers to the 1st three type of questions. The opinion creation/ analytical questions are open-ended and requires a lot of thinking and analysis before answering. It is one of the most powerful book that will expose you to the most sensitive issues, ideas, events, people or places.

Sources Of Our Cultural Heritage (Pb) Springer Science & Business Media "Heritage Science is currently emerging as a new discipline and this book forms a comprehensive volume that addresses

key topical areas of heritage science and discusses the threats to a wide range of heritage materials and monuments by biological and chemical agents of decay." "Heritage Microbiology and Science: Microbes, Monuments and Maritime Materials also provides up-to-date information on subjects covering the component field of heritage microbiology, molecular and chemical analytical techniques, and the mechanisms of degradation and deterioration of historic ships and buildings. The book also details state-of-the-art techniques for the study of large and small heritage objects, and their conservation. Techniques cover the use of GIS image processing, molecular biological analysis of environmental samples including FISH, electrophoresis

to remove corrosive ions and synchrotron radiation to detect chemicals present in artefacts. Information is included on molecular and synchrotron techniques to assist with identifying biological and chemical threats to heritage artefacts and monuments." "Several authors have developed their methods through involvement in international collaborative projects such as BIOBRUSH, BACPOLES and Save the Vasa. Extensive emphasis is placed on case studies and there is a valuable section on historic ships covering the preservation of HMS Victory, ssGreat Britain, Vasa and the Mary Rose. Contributions are presented as fully referenced research papers giving useful technical details and identification of

areas for future study. The book serves as an indispensable guide and reference source for those working in all areas of historical conservation, biodeterioration, microbiology and materials science."--
BOOK JACKET.

Breathing in Bodhi - the General Awareness/ Comprehension book - Attitude & Values/ Level 3 for the experts Routledge

Islamic manuscripts are voices from the past, revealing scholarly debates and networks, as well as aspects of daily life. They allow us to witness the transmission of knowledge and economic and cultural exchanges of centuries gone by. The present articles mirror this variety of aspects involved when dealing with Islamic manuscripts, and emphasize their importance as sources for our

knowledge of history. The articles cover research on single manuscripts, as well as collections, the problems of editing, as well as cataloguing. New technologies have extended the possibilities of preserving and presenting manuscripts - accessible online, digitised and catalogued, they serve an international research community and become a worldwide cultural heritage.

Breathing in Bodhi - the General Awareness/ Comprehension book - Attitude & Values/ Level 2 for the avid readers Royal Society of Chemistry

This book explores how environmental urban design can benefit from established and emerging representation and simulation techniques that meet the need for a multisensory approach. Bringing together contributions by

researchers and practicing professionals that approach the topics discussed from both theoretical and practical perspectives and draw on case-study applications, it addresses important themes including digital modeling, physical modeling, mapping, and simulation. The chapters are linked by their relevance to simple but crucial questions: How can representational solutions enhance an urban design approach in which people's well-being is considered the primary goal? How can one best represent and design the ambiance of places? What kinds of technologies and tools are available to support multisensory urban design? How can current and future environments be optimally represented and simulated, taking into account the way in which we

experience places? Shedding new light on these key questions, the book offers both a reference guide for those engaged in applied research, and a toolkit for professionals and students.

The Cultural Heritage of Nagaland
Association of Research Libr

This volume gives an in-depth account of cultural heritage of Nagaland covering important themes like cultural beliefs, traditional knowledge, material culture, and social institutions. Contributors from diverse disciplines and backgrounds have delved into the cultural heritage of the state's variegated tribes. Nagaland a

hilly state in North-East India had been the centre of British colonialism and American Baptist mission. This cultural contact is significantly reflected in the socio-cultural life, and the contributors have shed light on the continuities and changes. This volume highlights the multiplicity of cultural traditions that are specific to various tribes inhabiting sixteen districts of Nagaland, since their experiences of modernity and cultural contact with 'others' have been diverse. The contributors have mainly focussed on the cultural heritage of the majority Naga tribes, but other tribes like the Kukis and Kacharis are part and parcel of the cultural melting pot of Nagaland, and this volume in a way underscores the cultural exchange and interactions. Taylor & Francis does not sell or

distribute the print version of this book in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Department of Defense Authorization for Appropriations for Fiscal Year 2012 and the Future Years Defense Program LIT Verlag Münster

This book provides an overview of various challenges and contemporary research activities in cultural heritage information focusing particularly on the cultural heritage content types, their characteristic and digitization challenges; cultural heritage content organization and access issues; users and usability as well as various policy and sustainability issues associated with digital cultural heritage information systems and services. Cultural Heritage Information, the first book in the peer-

reviewed i-Research series, contains eleven chapters that have been contributed by seventeen leading academics from six countries. The book begins with an introductory chapter that provides a brief overview of the topic of digital cultural heritage information with the subsequent chapters addressing specific issues and research activities in this topic. The ordering of the chapters moves from scene setting on policies and infrastructures, through considerations of interaction, access and objects, through to concrete system implementations. The book concludes by looking forward to issues around sustainability, in the widest sense, that are necessary to think about in order to maximize the availability and longevity of our digital cultural heritage. The key

topics covered are: - Managing digital cultural heritage information - Digital humanities and digital cultural heritage (alt-history and future directions) - Management of cultural heritage information: policies and practices - Cultural heritage information: artefacts and digitization technologies - Metadata in cultural contexts - from manga to digital archives in linked open data environment - Managing cultural heritage: information systems architecture - Cultural heritage information users and usability - A framework for classifying and comparing interactions in cultural heritage information systems - Semantic access and exploration in cultural heritage digital libraries - Supporting exploration and use of digital cultural heritage

materials: the PATHS perspective - Cultural heritage information services: sustainability issues. Readership: This will be essential reading for researchers in Information Science specifically in the areas of digital libraries, digital humanities and digital culture. It will also be useful for practitioners and students in these areas who want to know the different research issues and challenges and learn how they have been handled in course of various research projects in these areas.
