Target 3 Billion Tyndale House Publishers
"No one wakes up and decides, "I'm planning to ruin my marriage, neglect my kids, and cause mistrust in my family." Yet our personal pursuits and busyness can lead us there. Marriage and leadership coaches Dr. Josh and Christi Straub show how seven core decisions can help us put what's most important center stage in our lives. A playbook of the practical and life-

changing coaching strategies Josh and Christi use with clients, Famous at Home is a realistic, grace-filled look at the struggles families face. This book will help you and your spouse: be on the same team--fighting for each other and not against each other; stay emotionally connected even when work, physical distance, or busyness get in the way; deeply invest in the emotional lives of your children. You really can be famous at home, showing up in intentional and meaningful ways for your biggest fans."-- Back cover.

Teaching English, or any other language, in the 21st century requires teachers to be competent in using computer-assisted language learning (CALL) to alleviate learning of subject matter and assess methods of instruction in different contexts. To be CALL competent, English as a foreign language (EFL) teachers should have acquired the seven subdomains of technological, pedagogical,

and content knowledge (TPACK) regarding their subject matter before going into their teaching practice. As the learning environment evolves, technology plays a crucial role, so EFL teachers need to be well-prepared to deal with it. Therefore, English language teacher education (ELTE) should bear the onus of acquainting student teachers with all the necessary knowledge domains connecting content, pedagogy, and technology. Integrating TPACK and CALL in English Language Teaching presents the EFL context of the world and examines the underpinnings of ELTE and its connection to technology. It emphasizes that current EFL student teachers in the ELTE programs across the world should be empowered with TPACK applicable to their subject matter to integrate CALL effectively into prospective instruction. Besides foregrounding current challenges and exploring germane research in the world, the book provides an insightful examination of the field of CALL. Covering topics such as English language teacher education (ELTE), computer-assisted language learning (CALL), and EFL TPACK, this premier reference source is ideal for professionals,

researchers, policymakers, and executives concerned with implementing technology integration in EFL teacher education programs.

Multifunktionale Struktur Springer

Was ist eine Multifunktionsstruktur
 Multifunktionsmaterial ist ein Verbundmaterial. Der traditionelle Ansatz bei der Entwicklung von Strukturen besteht darin, die lasttragende Funktion und andere funktionale Anforderungen separat zu behandeln. In letzter Zeit ist jedoch das Interesse an der Entwicklung von lasttragenden Materialien und Strukturen mit integralen nicht-tragenden Funktionen gestiegen, geleitet von jüngsten Entdeckungen darüber, wie multifunktionale biologische Systeme funktionieren. So profitieren Sie (I) Einblicke und Validierungen zu den folgenden Themen: Kapitel 1:

Multifunktionsstruktur Kapitel 2:

 Explores how the text and principles of the
 UNCITRAL Model Arbitration Law are
 implemented, or not, in key Asian
 jurisdictions.
**The UNCITRAL Model Law and Asian
 Arbitration Laws** Bloomsbury Publishing
 This is the first book to focus on the legal
 question of the incorporation of arbitration
 clauses, even though this issue constitutes
 a common problem that arises frequently
 in practice. Arbitration Clauses and Third
 Parties compares different branches of
 law, namely shipping, reinsurance, and
 construction, where the legal notion of
 incorporation is often implemented. It
 evaluates how the differences and
 peculiarities of the said branches of law
 impact the outcome of the incorporation of
 arbitration clauses and therefore why a

'one size fits all' approach should be avoided. The book provides both an in-depth legal analysis of the incorporation of arbitration clauses as well as the legal position of the third parties regarding arbitration agreements and a detailed evaluation of the relevant case law. It further offers a unique comparative analysis of English law and Singapore law with regards to the incorporation of arbitration clauses and features recent case law on the issue from both jurisdictions. Moreover, the book explores the status of third parties to arbitration and a wide range of legal situations in which arbitration clauses bind third parties. This book will be directly of interest to lawyers and professionals in arbitration, reinsurance, construction, and shipping, as well as to relevant academic courses.

The first in-depth study of the Indian creative industries, this book provides a comprehensive mapping of the Indian creative industries and its policy landscape, developing and defining key concepts and terms and offering detailed case studies of specific sectors,

geographic regions and governance structures. Using an ecosystem framework, this book focuses on strategy/policy; tangible and intangible infrastructure; and funding and investment to understand the main drivers and barriers across nine sub-sector value chains. With investment from global brands into many sectors, it tracks how Indian creative industries are fostering innovation and design for social and ecological sustainability. It also delves into India's informal economy to share key policy insights. The volume will be of great interest to scholars and researchers of public policy, business studies and South Asian studies. It will also be a key document for foreign investors willing to invest in one of the fastest-growing and stable economies in the world.

Research Handbook on Asian Financial Law Penguin UK

This comprehensive Research Handbook provides an in-depth analysis of the different financial law approaches, legal systems and trends throughout Asia. It considers how reforms following the crises have been critical for the development and growth of the region and explores a

broad range of post-crisis financial regulatory issues. This timely book also examines how inconsistent and divergent approaches to financial market regulation are curtailing the region's potential.

Special Economic Zones in India John Wiley & Sons

A review of the existing literature on the China-India comparative theme conveys the distinct impression that the literature largely projects China and India as intrinsically competitive entities. While much has been written on where and why China and India are contesting, particularly from a political sense, very little attention has been devoted to mutual collaboration, whether existing or potential. Such possibilities are at their greatest in economics, which will dominate the future China-India relationship. This book explores Sino-Indian ties from a comparative economic perspective and argues that it is erroneous to visualise the ties either from exclusively competitive or collaborative perspectives. The future relationship between the two countries will be characterised simultaneously by two ?C?s: competition and collaboration, which are both linked to

common challenges facing them. Arguing that while competition in the economic sphere is inevitable, given their size and aspirations, the book contends that negative externalities from competition will encourage both countries to collaborate and expand the scope of such collaboration. The book's refreshing angle makes it a must-read for those interested in Sino-Indian relationship.

Digital Media and Wireless Communication in Developing Nations: Agriculture, Education, and the Economic Sector explores how digital media and wireless communication, especially mobile phones and social media platforms, offer concrete opportunities for developing countries to transform different sectors of their economies. The volume focuses on the agricultural, economic, and education sectors. The chapter authors, mostly from Africa and India, provide a wealth of information on recent innovations, the opportunities they provide, challenges faced, and the direction of future research

in digital media and wireless communication to leverage transformation in developing countries. The volume provides important research on digital media and wireless communication within the context of developing countries that will be very useful for professionals from academia, government agencies, NGOs, technologists, entrepreneurs and investors, and others.

This timely collection of fifteen essays by leading economists explores how rapid economic growth in China and elsewhere in Asia is reshaping the world economy.

More Than Words Taylor & Francis This significant and timely book explores a novel market mechanism, Stock Connect, which gives mutual market access to Chinese and international investors, and provides original analyses and fresh insights. This mechanism could become the new normal in future global financial integration. By examining this cross-border scheme from a regulatory perspective via a three-tiered analytical framework (investors, issuers and regulators), this book unearths the

profound implications of Stock Connect to local and global financial markets and the legal impediments to its implementation. It covers a broad range of topics in this cross-boundary investment channel, including an overview of four existing connectivity arrangements (Shanghai-Hong Kong, Shenzhen-Hong Kong, Shanghai-London and China-Switzerland), the uniqueness of these connectivity arrangements, investor protection, regulations of connect issuers, regulatory cooperation and enforcement, the impacts on local and global financial markets, the implications for the world market connectivity as well as the challenges and future of Stock Connect. This pioneering study will appeal to a broad range of readers who are interested in the on-going reshaping of international financial systems and China's emerging influence in the international financial order.

As the number of children for whom English is an Additional Language in schools increases, how do teachers and trainees prepare to support them to succeed? A complete guide to

understanding, learning from and teaching bilingual and EAL children in schools. The text begins by asking 'who are EAL learners' and challenges some of the misconceptions about this group. It goes on to examine language in depth, providing focused theory to help teachers and trainees better understand the wider context of children's needs. This theory is supported by a wealth of information on practical teaching strategies and resources in the promoting learning section. The text covers planning across the curriculum for EAL and offers day-to-day practical support for teachers. The fourth edition is updated throughout and includes a new chapter on EAL and SEND.

At the heart of this book lies a reappraisal of humanities research and its use in understanding the conditions of a consumer-led society. This is an open, investigative, critical, scientific task as well as an opportunity to engage with creative enterprise and culture. Now that every user is a publisher, consumption needs to be rethought as action not behavior, and media consumption as a mode of literacy. Online social networks

and participatory media are often still ignored by professionals, denounced in the press and banned in schools. But the potential of digital literacy should not be underestimated. Fifty years after Richard Hoggart's pioneering *The Uses of Literacy* reshaped the educational response to popular culture, John Hartley extends Hoggart's argument into digital media. Media evolution has made possible the realism of the modern age journalism, the novel and science not to mention mass entertainment on a global scale. Hartley reassesses the historical and global context, commercial and cultural dynamics and the potential of popular productivity through analysis of the use of digital media in various domains, including creative industries, digital storytelling, YouTube, journalism, and mediated fashion. Encouraging mass participation in the evolutionary growth of knowledge, *The Uses of Digital Literacy* shows how today's teenage fad may become tomorrow's scientific method. Hartley claims the time has come for education to catch up with entertainment and for the professionals to learn from popular culture. This book will stimulate the imagination and stir further

research.

This collection studies the contribution of non-state actors to international obligations. Chapters by academics and practitioners address the role that these actors play in the sources of obligations, their implementation, human rights aspects, dispute settlement, responsibility and legal accountability.

Teaching to Exceed the English Language Arts Common Core State Standards Taylor & Francis

Young people develop their value systems during their school years, offering the perfect window of opportunity for educators to challenge prejudice and promote race equality during these formative years. Yet, as teacher training is increasingly school-centred and school budgets are stretched more thinly than ever, most teachers do not feel they have the time to develop the language or skills to do so. *More Than Words* is an easily implementable tool for all educators - teachers, senior leaders, governors and support staff - to help them look beyond fire-fighting racist incidents to create long-

term systemic changes. Supporting teachers in a non-judgemental fashion, this book dismantles any myths they may be harbouring so they can engage with issues with an open mind, allowing them to create positive change. This comprehensive guide helps school staff to create a safe, inclusive and supportive environment for all young people.
