 The author is one of the foremost authorities on

lustreware and has incorporated all the latest research into his text. In some cases this has necessitated a rethinking of previously held theories and this adds greatly to the book's interest for collectors. The reader is taken from lustreware's beginnings in 1805 through its heyday in the first half of that century, with later lustrewares also touched on. The techniques of lustring are described in some detail and there is a comprehensive coverage of the companies and

personalities involved in its manufacture - everything, in fact, that the collector needs to know.

When you took statistics in school, your instructor gave you specially prepared datasets, told you what analyses to perform, and checked your work to see if it was correct. Once you left the class, though, you were on your own. Did you know how to create and prepare a dataset for analysis? Did you know how to select and generate appropriate

graphics and statistics? Did you wonder why you were forced to take the class and when you would ever use what you learned? That's where "Stats with Cats" can help you out. The book will show you: How to decide what you should put in your dataset and how to arrange the data. How to decide what graphs and statistics to produce for your data. How you can create a statistical model to answer your data analysis questions. The book also provides enough feline support to

minimize any stress you may experience. Charles Kufs has been crunching numbers for over thirty years, first as a hydrogeologist, and since the 1990s as a statistician. He is certified as a Six Sigma Green Belt by the American Society for Quality. He currently works as a statistician for the federal government and he is here to help you.
