Introduction to Human Development and Family Studies is the first text to introduce human development and family studies (HDFS) as inextricably linked areas of study, giving students a complex yet realistic view of individuals and families. Pioneers of research paradigms have acknowledged that the

family is one setting in which human development occurs. Moreover, in many academic programs, the lines of these two disciplines blur and much work is inherently multidisciplinary and interdisciplinary. This book helps to fortify an understanding of HDFS and subareas within it. Vignettes from current HDFS students as well as new professionals, an overview of the lifespan stage(s) within the family context, a wide description of research methods and applications, current policy issues relevant to the area, and

discussions of practice/careers coupled with strategies for pursuing specializations or careers in the area are hallmarks of this textbook. Introduction to Human Development and Family Studies is essential reading for students new to the major and minor wanting to know: What is HDFS? Who are the people involved in HDFS? Why is HDFS important? How does theory and research inform work in HDFS? What does the pursuit of being an ethical professional require? What are the key areas in HDFS? Incredibly user-friendly both on the page and online, the text also features the following resources: Chapter Summaries where the main points of each chapter are pinpointed at the end of every chapter for review and study. Key Terms listed and defined

within the margins of every chapter, a complete Glossary at the end of the text, and Flashcards online for additional review and study. Challenge: Integration section at the end of each chapter that underscores concepts from the chapter and draws connections between content presented in other chapters. Journal Questions to encourage reflection about the content and encourage thinking about some of the content coupled with students' own experiences. Suggested Resources that lists relevant websites, books, articles, and video links for further study. A Closer Look at Applied Experiences Appendix outlines the internship process and shows how the internship experience can be meaningful and useful, and a Consuming Research Appendix that focuses on what it means

to be a consumer of research, the knowledge and skills consumers need, and considerations for transitioning from a consumer of research to a producer of research.

Ideal for anyone embarking on or considering a career in the helping professions, BECOMING A HELPER,

Seventh Edition, provides an overview of the stages of the helping process while teaching readers the skills and knowledge they need to become successful helping professionals. Drawing on their years of experience, Corey and Corey focus on the struggles, anxieties, and uncertainties often encountered on the road to becoming effective helpers. They also emphasize self-reflection on a number of professional issues. Finally, the authors help readers decide if a career in the helping professions is right for them by asking them to take a candid look at the demands and strains they'll face in the field.

Intended for courses on theories of human development, this new text presents nine theories grouped into three major families - those that emphasize biological systems; those that emphasize environmental factors; and those that emphasize a dynamic

interaction between biological and environmental forces. The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights. The inclusion of social role theory and life course theory expand the book's relevance to the study of adulthood and aging. Grouping the theories by families enhances students' ability to think critically about theoretical ideas, assess the strengths and weaknesses of each theory, and gain a deeper understanding of how each theory guides research and application. The three families are introduced with a brief overview of the unique perspectives of each theory and the rationale for grouping these theories together. Discussion of each theory

includes: the historical and cultural context in which the theory was developed; an overview of key concepts and important ideas; new directions in contemporary scientific work; a research example illustrating how the theory has been tested and modified; an application showing how the theory has guided the design of an intervention or program; an analysis of how the theory answers basic questions about human development; and a critique highlighting the theories' strengths and weaknesses. Theories of Human Development serves as a text in advanced undergraduate and/or beginning graduate courses in theories of human development. Its clear organization and engaging writing style make it accessible to students with a minimal background in human

development.
