New Visionaries in 21st Century Photography

For a relatively young country, America is rich in decaying ruins that cover its landscape. Through his striking photography, Eric Holubow provides a glimpse inside these perilous structures to

reveal the slow but unforgiving wear and tear that has befallen many of the country's forgotten sites. What transpires is a surprising, yet undeniable beauty beneath the rubble and decrepitude. Centred in the Rust Belt, but spanning from coast to coast, north to south, and big cities to small towns, breathtaking images of nearly a hundred sites,

including factories, churches, theatres, prisons, and power plants, signify the comprehensive erosion of important parts of our history. Holubow's compelling work forces us to pay attention to formerly grand, significant landmarks and institutions that have long been ignored, and reminds us of the tragic fate that they and everything we know eventually share.

Plotting adventures from London, Paris, Eastern Europe, Detroit, Chicago and Las Vegas, uncovering the tunnels below the city as well as scaling the highest skyscrapers, Bradley Garrett has evaded urban security in order to experience the city

in new ways beyond the conventional boundaries of everyday life. Explore Everything is both an account of his escapades with the London Consolidation Crew as well as an urbanist manifesto on rights to the city and new ways of belonging in and understanding the metropolis. It is a passionate declaration to "explore everything," combining philosophy, politics and adventure.

The cities of Pennsylvania are littered with the redundant relics. Behind closed doors and hidden deep in forests, there are decaying secrets waiting to be discovered. At the start of the twentieth century, migrants were

drawn to the up-and-coming industrial giant that was Pennsylvania. There were jobs and opportunities aplenty. Then, the economic bubble burst. Factories and steel mills closed, one by one. Families left in droves in search of work and a better life elsewhere. After the mass exodus, a wealth of infrastructure was rendered obsolete. Abandoned churches lay discarded, as small scattered congregations merge together. Schools and hospitals are left to rot. Forgotten theatres, once hosting sell-out performances, now lay silent and lost. The steam locomotives and trolley cars lie rusting and disused, obsolete in the face of new technology. One by one, these hidden treasures are lost as

time and the world moves on around them. This book explores the beauty that lies in these forgotten places, often hiding in plain site on the streets of Pennsylvania.

Through Time

Hospitals, schools, churches, theaters, hotels, homes, industry, bridges, diners, malls, amusement parks and more. Ohio holds a huge collection of history that continues to fade away.

Eventually all that will be left of many of these places are the photographs and memories. Ohio has so much incredible history that has been saved, but at the same time so much history that remains abandoned and practically forgotten. I find it sad and fascinating that these places are tossed aside like they are. Though they have been forgotten, there is such an interesting

beauty inside their walls, decay and all.

This book is not about the urban explorer, it's about the places they explore. This is about the unusual, the forgotten, and the unknown - sometimes, the smallest flash of beauty in an otherwise banal or decayed setting. Places and human history are inextricably linked. The humans are never far away from these pages; they are hovering just out of sight. They are all here though, their presence haunting every photograph. The people, in reality, have moved on. These fragments remain, decaying scenes from the theatres in which their lives played out, their work, their

suffering, and their joy. You cannot capture that with a camera, only with your imagination can you breathe a kind of life back into these otherworldly scenes. That makes you the explorer...

Join us on a journey through the zone . . . The aim of this photo book is to poignantly portray the desolate and haunting beauty found in the decaying ruins of Chernobyl, which nature is slowly reclaiming. It consists of three hundred carefully selected photos, taken by the authors on two trips to the zone of alienation in the summer of 2018 and autumn of 2020. Also included are numerous interesting facts related to the various locales explored within. *Altered Images* Jonglez Publishing
Rediscovering our forgotten heritage No Entry'; 'Dangerous Site Keep Out; Trespassers Will Be Prosecuted': common sights on walls or perimeter fences around many of

the world's abandoned sites. These warnings allude to potential dangers and prove an ineffective deterrent against thieves and vandals. To the urban explorer/photographer these signs simply serve to whet the appetite for the promise of hidden wonders that may lie beyond. For those who ignore the warnings and climb the fences, what awaits is usually worth the risks. Vast industrial spaces that feel more like an alien landscape or poignant residential settings, which are slowly surrendering to the inexorable advance of nature. Places once alive with sound and movement, now silent and still, but no less sensory. Immense and powerful beauty resides in these

forgotten places. For some, just getting inside a location to experience this alternative form of sightseeing is enough to satisfy a desire to simply go where one shouldn't. But for some there is a need to capture the essence of a location in words and pictures, giving others a metaphorical leg-up over the fences, to walk them through the remaining ruins. Matt Emmett falls into the latter of these groups, travelling regularly to places in the UK and across Europe. He seeks out vast power stations and their cooling towers, steel works, mines, bunkers, tunnels, schools, engine sheds, hotels, castles and a myriad of other buildings. All have their own stories to tell in a variety of

voices and without the distraction, sounds and people who inhabited them, those stories are clear and strong and the character of each location is laid bare. Architectural Digest: "Photographer Matt Emmett has made a name for himself by pushing the boundaries to capture epic imagery of Europe's most forgotten ruins." International Business Times: "Matt Emmett's 'Forgotten Heritage' photography project uncovers the brutal beauty of abandoned buildings and derelict industry." *Place-Hacking the City* America Through Time Ask the Dust is a feast of urban ruin photography, executed in gorgeous full colour, full page spreads framed by the overview of the young

French adventurer behind the camera. Featuring a potent blend of haunting images of never before seen locations and new angles on classic subjects - Ask the Dust is a visual treat for anyone who cannot keep their eyes away from the elegant corruption of decomposing buildings. Epecuen: The town that drowned. Ghostly images from the real life Atlantis. Kolmanskop: The abandoned mining town that was swallowed by sand. Urban Exploration: Evocative imagery and thought provoking commentary combine to powerful effect. Beauty in Decay America Through Time "Ohio's Forgotten History Part 3" - a 450-page hardcover book

filled with abandoned and forgotten places across Ohio. Part 1 in the series explored more of Northern Ohio, so part 3 will explore more of Ohio's central to Southern areas, as well as a small amount of Northern.

Eva Dawson is lost. Working as a photographer, she stumbles upon the world of urban exploration, and starts to find beauty in broken things. Meanwhile, her marriage is just as broken as the buildings she sets out to explore. Can she find a way to create a future, or is happiness a relic of the past? This book is an exploration in its own right, a fascinating journey through one

woman's attempts to change her life for the better. Praise for "Charcoal" by JE Rowney: "Great characters...the writer really 'gets' heart breaking situations." "This personally was like a shotgun to the chest. A very powerful read. Highly recommended." "A really good read. Just wanted to keep reading to see how the story unfolded. Refreshingly different." Eva Zeisel was one of the twentieth century's most influential ceramicists and designers of modern housewares. Her distinctive take on modern industrial design was inspired by organic form and brought beauty and playfulness to housewares, earning her designs a beloved place in midcentury homes. This richly illustrated volume—the first-ever complete biographical account of Zeisel's life and work—presents an extensive survey of every line she ever

created, all captured in gorgeous new photography, plus 28 short essays from scholars, collectors, curators, and designers. The definitive book on the grande dame of twentieth-century ceramics, this is an essential resource for anyone who appreciates modern design.

"A new breed of urban adventurers take a savage ride through the hidden story of America's North East.

Join us as we follow two explorers' journey through derelict spaces. From New York City to the infamous Rust Belt, once home to America's heavy industry, 'States of Decay' brings you a glimpse of the broken, the doomed, the entropic dreamlands on the flipside of the silver dollar coin. The morbid counterparts to the modern America that pumps greenbacks from its corporate epicentres though its far reaching veins, nurturing the glossy surfaces. Peer into the recent past as dark histories unfold and their stories are told. Journey into atmospheric asylums, derelict houses of worship, forgotten educational institutions, industrial monoliths, vacant

hotels, desolate transport hubs, and other ruins of the 20th century. See them as they stand today. Travel back in time and immerse yourself in the shadows of their past"--Introduction.

Have you ever wondered what lies behind the rotting walls of an abandoned building? Empire State of Decay: Discarded New York offers a rare look into forgotten spaces that offer visual wonder, beautifully decaying sights, and an insight as to what happens when the public walks away. Follow one woman's adventure through forgotten hospitals, poorhouses, and resorts in the Empire State-documenting its history through

poignant photographs. See what's left of the formerly bustling Catskills, what's forgotten in Staten Island, and how nature reclaims her space throughout New York. While sometimes dangerous, these spaces have stories to tell. Hidden from the public, visit these blighted spaces suffering from years of neglect and disrepair. Author Alex Gulino offers an inside look as she slides down icy hallways, runs across fields, and crawls under fences to explore and document these lost spaces. See the history that lives on in quiet desperation

with hopes that you, too, see the beauty in decay.
