Ages 4 to 6 years. Mental Maths procedures can help a child to quickly compute their answers. It is an amazing tool to use for calculation especially in the present time. This series serves this purpose accurately It will help to sharpen the child's calculating skills and also develop an aptitude for mathematics.

Introductory Mental Arithmetic for Pupil Teachers Pascal Press

Hone your child's or class' mental maths with this range of tests designed by a practising Primary Maths Coordinator. The 30 tests contained within this book are grouped into 10 blocks, each containing 3 similar tests. This allows for improved consolidation and improvement when compared with other test books that quickly jump from one mathematical concept to the next. Suitable for use in the classroom or at home. Answers included. This is the UK version of the book which uses English spellings and £s and pence in the questions.

**Mental Maths** First Mental Arithmetic  
Mental Maths is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the 'tricks' we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series.

Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics % we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include: 32 double-page units of Mentals are included % 8 units for each school term each unit is divided into four sets (A,B,C and D) of 20 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 20 always covers geometry a special 'eHelp' section,, at the front of the book gives different strategies and explanations to help students solve Mentals problems. These are also numbered so they link to the question numbers in each Mentals unit a eFun Spot,, unit, containing fun activities, and a eRevision,, unit are included at the end of each 8 units extra practice,, sections which reinforce particular strategies appear in the lower part of each page. Answers to all questions are in a lift-out section in the centre of the book

How to be Brilliant at Mental Arithmetic addresses the twin pillars of mental arithmetic - mental recall and mental agility. Mental recall depends on familiarity with number bonds and plenty of opportunity to practise. Mental agility depends more on confidence with the number system and the four operations. Using the worksheets in this book, students will learn about: tens and units; addition, subtraction, multiplication and division; addition shortcuts; product squares; quick recall; number sequences; factors; more and less; approximations; metric and imperial measures.

Zaubern mit Zahlen – wer dieses Buch gelesen hat, muss PISA nicht mehr fürchten Wer glaubt, Mathematik sei

eine trockene Angelegenheit und Kopfrechnen eine unnötige Quälerei, der irrt sich gewaltig. Denn nach der Lektüre dieses Buches ist es für jeden ein Leichtes, Rechenoperationen mit vier- und fünfstelligen Zahlen in Sekundenschnelle im Kopf auszuführen. Und was wie Zauberei wirkt, ist letztendlich nichts anderes als mathematische Logik, die jedermann beherrschen kann und die dazu noch richtig Spaß macht. • So wird Kopfrechnen kinderleicht! • Mit zahlreichen Übungen und Lösungen A Classified Catalogue of School, College, Classical, Technical, and General Educational Works in Use in Great Britain in 1871 Schofield & Sims Limited
