ANGELINA BRYNN

The New Industrial Revolution Cambridge University Press
 Evaluating building materials for environmental sustainability is a complex prospect. How do governmental agencies and the design industry actually measure sustainable initiatives and environmental impacts? This book breaks down the technical vocabulary and principles that define environmentally sustainable choices across interior and exterior architectural products to help the reader understand: Material ingredient selection Energy and water use Emissions, including greenhouse gases Human health and toxicity Social accountability assessment This guide explains the structure of green certifications, standards and ecolabels, life cycle assessment, environmental regulations, and more. It presents a historic timeline for context and a snapshot of current trends and future objectives. It is a comprehensive reference for interior designers, architects, building owners, contractors, and students enrolled in interior design and architecture.

Einfach intelligent produzieren Springer Nature
 The Cradle to Cradle ("C2C") concept is a biomimetic approach

that models human industry on nature's processes, viewing materials as nutrients circulating in healthy and safe metabolisms. It seeks to create systems that are not only efficient but also essentially waste free. A growing number of building owners and developers are looking to implement it in their buildings, be it to increase the productivity of their workforce, or to provide a differentiator. The C2C concept is reasonably covered in building construction; however, it is a rather uncharted area in building services, making it difficult for MEP engineers to develop C2C-inspired designs. Arup set out to bridge this gap, establishing how C2C-inspired design would look like in the different MEP disciplines, and researching which systems, products and materials are available in the market to meet the corresponding criteria. The result is a comprehensive guideline that enables MEP engineers to develop a C2C-inspired design. It covers design criteria, system selection, system sizing, design for deconstruction, as well as material and product selection for the main MEP disciplines, and sets out a number of criteria by which the aptness of a design for C2C can be measured.

CSR und Klimawandel Da Capo Press

The 18th CIRP International Conference on Life Cycle Engineering

(LCE) 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment, product development, sustainable manufacturing and end-of-life-management. The theme "Glocalized Solutions for Sustainability in Manufacturing" addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products, services and processes taking into account local capabilities and constraints to achieve an economically, socially and environmentally sustainable society in a global perspective. Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions. Products and services need to be addressed that ensure a high standard of living everywhere. Resources required for manufacturing and use of such products are limited and not evenly distributed in the world. Locally available resources, local capabilities as well as local constraints have to be drivers for product- and process innovations with respect to the entire life cycle. The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas.

Up From The Cradle Of Jazz North Point Press

Provides a review of current and potential research in green management and control.

Cat's Cradle CRC Press

Unbestritten ist Design ein wichtiger Motor von Innovation. Aufgabe ist es allerdings auch, mit der zu schaffenden Anziehungskraft begehrlicher Produkte verantwortungsvoll umzugehen. Dieses Buch richtet sich an Gestalter, die Circular Design für die neue, regenerative Kreislaufwirtschaft anwenden möchten. Diese "Circular Economy" wurde 2015 von der EU in Gang gebracht und verlangt nach neuen Gestaltungsstrategien. Die Methoden von Circular Design können helfen, den Spagat zu schaffen, attraktive Produkte zu gestalten und gleichzeitig verantwortungsvoll mit den Ressourcen umzugehen. Dieses Buch holt viele gute Ansätze vor den Vorhang. Vorgestellt werden die wichtigsten Strategien und Konzepte, dazu Impulse und Anregungen aus der Praxis. Ebenso wird deutlich, dass es nicht nur eine Umgestaltung der Produkte braucht, sondern auch, über das eigentliche Produkt hinaus zu schauen.

Churning the Earth Springer-Verlag

An exciting vision of what we can aspire to when sustainability is integrated within strategic practices across enterprise functions, systems, supply chains, and cities. The book will enable decision makers to recognize a new era of innovative value creation.

The Cradle of Thought Routledge

A history of New Orleans music in the four decades since World War II. In particular, it tells of the rise of rhythm and blues, a musical form rooted in the very identity of the Crescent City, its history and geography, the Mardi Gras rites and the intermixture of its many races and cultures. In providing a tribute to the musical heritage of New Orleans, the book is also a testament to the rich sounds still produced there by such musicians as Dr John, the Neville Brothers, Allen Toussaint, and The Wild Tchoupitoulas.

Katzenwiege arsEdition

Wie begegnen Unternehmen dem Klimawandel? Dieses Buch zeigt es Ihnen! Dieses Buch gibt Ihnen einen Einblick, wie Sie in der wirtschaftlichen Praxis dem Klimawandel entgegenwirken und erfolgreich mit seinen direkten und indirekten Folgen umgehen. Die Autoren untersuchen die klimawandelinduzierten Risiken und ihre Steuerung aus betriebswirtschaftlicher Sicht. Weiter arbeiten sie heraus, welche Unternehmenspotenziale und Chancen durch eine nachhaltige und klimaschonende Wirtschaftstransformation

entstehen können. Auf diese Weise zeigen Ihnen die Herausgeber, wie aus einem der größten Probleme unserer Zeit auch wirtschaftliche Erfolgsmodelle entstehen können. Die einzelnen Fachbeiträge renommierter Autorinnen und Autoren stellen zudem aktuelle Erkenntnisse der Wissenschaft, Pläne der Politik sowie Forderungen von Interessensvertretungen und NGOs vor. Konkrete Best Practice-Beispiele unterschiedlichster Branchen runden den Inhalt ab. Gleichzeitig prüft dieses Werk Klimaziele und Maßnahmen internationaler Initiativen und Entwicklungen, wie beispielsweise das Pariser Klimaabkommen. Dadurch fordert dieses Buch mit Blick auf den Klimawandel Unternehmen im Zuge ihrer ökologischen sowie gesellschaftlichen Verantwortung zum Handeln auf. Innovative Impulse für Unternehmen Dieses Buch liefert Ihnen aktuelle Erkenntnisse aus der Wissenschaft zum Klimawandel. Die Autoren erörtern, welche Auswirkungen die Klimakrise auf Wirtschaft und Gesellschaft hat und welche Rolle der Digitalisierung im Kontext von Nachhaltigkeit und Klimaänderung zukommt. Anschließend rücken die folgenden Kapitel unter anderem diese Aspekte in den Mittelpunkt: Internationale, europäische und nationale Klimapolitik Digitalisierung und Klimawandel im Kontext der Sustainable Development Goals Klimaschonende Veredelung regenerativer Rohstoffe Versorgungssicherheit in Zeiten des Klimawandels Integration von CSR und Klimaschutz in das Kerngeschäft der Österreichischen Post AG Dekarbonisierungsstrategien für Aktieninvestitionen Auf diese Weise liefert dieses Buch Unternehmen zahlreiche Impulse, um im Zuge des Klimawandels innovative Strategien und Anpassungsmöglichkeiten zu entwickeln. So lassen sich bisher unerschlossene wirtschaftliche Potenziale nutzen.

Guideline for Building Services Design Inspired by the Cradle to Cradle Concept Kiepenheuer & Witsch

Dieses Buch verdeutlicht, mit welchen innovativen Geschäftsmodellen die Mobilitätsbedürfnisse der Zukunft befriedigt werden könnten. Die Autoren stellen praxisnah und wissenschaftlich fundiert Ansätze, Instrumente und Konzepte im Kontext der Mobilität 4.0 vor. Neben einer Einführung für die Entstehung neuer Geschäftsmodelle im Bereich Mobilität befassen sich die Kapitel mit einem Flatrate-Car der Zukunft und verschiedenen App-Anwendungen zur Optimierung intermodaler Verkehrsketten. Zudem werden Aspekte und Lösungen vorgestellt, wie Mobilität für körperlich Bedürftige verbessert werden kann. Anhand von Fallbeispielen werden konkrete Mobilitätskonzepte erläutert.

The rapid emergence of China and India as prime locations for low-cost manufacturing has led some analysts to conclude that manufacturers in the "old economies"--the U.S., U.K., Germany, and Japan--are being edged out of a profitable future. But if countries that historically have been at the forefront of events in manufacturing can adapt adroitly, opportunities are by no means over, says the author of this timely book. Peter Marsh explores 250 years in the history of manufacturing, then examines the characteristics of the industrial revolution that is taking place right now. The driving forces that influence what types of goods are made and who makes them are little understood, Marsh observes. He discusses the key changes in what is happening in manufacturing today, including advances in technology, a greater focus on tailor-made goods aimed at specific individuals and industry users, participation of many more countries in world manufacturing, and the growing importance of sustainable forms of production. With broad historical sweep and dozens of engaging examples, Marsh explains these changes and their import both for consumers making purchase choices and for

manufacturers assessing how to participate successfully in the new industrial era.

Advances in Human Dynamics for the Development of Contemporary Societies Athens : University of Georgia Press
Die Implementierung des Cradle-to-Cradle-Konzepts kann einen entscheidenden Beitrag zur Entwicklung langfristig tragbarer Wirtschafts- und Konsummuster leisten. Dennoch wird dem Konzept speziell in Deutschland große Skepsis entgegengebracht. Warum findet es in einem Land, das als Innovationsschmiede und Vorreiterin der Nachhaltigkeit gehandelt wird, so wenig Anklang? Inwieweit tragen das politisch-rechtliche Umfeld, die Kommunikationsstrukturen rund um den Cradle-to-Cradle-Ansatz oder die kulturellen Rahmenbedingungen zur deutschen Zurückhaltung bei der Implementierung bei? Welche Erkenntnisse und Empfehlungen lassen sich daraus für eine nachhaltige Entwicklung und das nach wie vor bestehende Umsetzungsdefizit von Nachhaltigkeitsinnovationen ableiten? Die Autorin führte neben einer intensiven Auseinandersetzung mit dem theoretischen Kontext Interviews mit zehn ausgewiesenen Experten aus der Praxis und kommt am Ende zu dem Schluss, dass es zur Umsetzung einer derart radikalen Innovation mehr bedarf als des Willens zu technischem Fortschritt.

Transformative und agile Innovationssysteme Simon and Schuster

Creating decent living conditions for all people while decoupling economic growth from the increasing use of virgin resources and environmental impacts is the major challenge of this millennium. There are many approaches suggested for solving these problems, including changing consumption behavior from material products to services, finding technological solutions to create more closed loops for materials, and using fewer virgin resources and energy obtained from clean renewable sources. A main issue to address is sludge formation during wastewater treatment. As such, this book, over seven chapters divided into two sections, investigates the application of biosolids or sewage sludge together with possible resources for sustainable development. It also presents information on resource efficiency from a more complex perspective, looking at several resources and the causal links between them in order to point out new pathways towards a more sustainable use of resources.

Catch and Cradle BoD – Books on Demand

How to tackle environmental damage from the throwaway society is one of the defining questions of the twenty-first century. By establishing a circular economy, we can encourage and support sustainable production and consumption. These essays by an international group of leading scholars from a range of disciplines analyse policies and legal instruments and challenge mainstream assumptions, from the choice of a policy mix to the actual effect of imposing standards on the market, and from corporate objectives and priorities to the use of precaution in assessing particularly harmful substances. Each chapter contributes to a better understanding of the current policy and regulatory framework in Europe and identifies the challenges and opportunities ahead. The book breaks new ground by examining how product policies can contribute to important objectives and visions, such as the aims of the circular economy. It is a must-read for researchers as well as for policymakers and practitioners.

The Green Building Materials Manual Routledge

This book is a uniquely pedagogical while still comprehensive state-of-the-art description of LCA-methodology and its broad range of applications. The five parts of the book conveniently provide: I) the history and context of Life Cycle Assessment (LCA) with its central role as quantitative and scientifically-based tool supporting society's transitioning towards a sustainable

economy; II) all there is to know about LCA methodology illustrated by a red-thread example which evolves as the reader advances; III) a wealth of information on a broad range of LCA applications with dedicated chapters on policy development, prospective LCA, life cycle management, waste, energy, construction and building, nanotechnology, agrifood, transport, and LCA-related concepts such as footprinting, ecolabelling, design for environment, and cradle to cradle. IV) A cookbook giving the reader recipes for all the concrete actions needed to perform an LCA. V) An appendix with an LCA report template, a full example LCA report serving as inspiration for students who write their first LCA report, and a more detailed overview of existing LCIA methods and their similarities and differences.

Sundaland Emerald Group Publishing

The current methods of dealing with medical waste, agricultural waste, industrial trash, and municipal garbage are causing serious damage to the environment. The primary aim of this book is to preserve natural resources by the near-complete exploitation of all waste kinds through the application of cradle-to-grave principles and the methodology of Industrial Ecology, supported by examples of its application. Establishing the concept of industrial ecology is crucial for achieving sustainable development and environmental preservation. The book will go through the most important resources for building Industrial Ecology and sustainable growth. The term "industrial ecology" refers to the practice of managing and operating industrial systems in a manner that mimics that of natural ecosystems, intending to minimize their negative effects on the natural world. This book promotes eco-friendly practices such as reducing human impact on the planet as we develop sustainably and preserve our natural resources. It addresses the wide variety of trash produced by modern society and recommends methods for repurposing that garbage by cradle-to-cradle principles, thereby reducing the need for landfills, incinerators, and other forms of waste treatment.

Hemicelluloses and Lignin in Biorefineries Campus Verlag

»Das ›1984‹ fürs Internetzeitalter« Zeit online Leben in der schönen neuen Welt des total transparenten Internets: Mit Der Circle hat Dave Eggers einen hellsichtigen, hochspannenden Roman über die Abgründe des gegenwärtigen Vernetzungswahns geschrieben. Ein beklemmender Pageturner, der weltweit Aufsehen erregt. Huxleys Schöne neue Welt reloaded: Die 24-jährige Mae Holland ist überglücklich. Sie hat einen Job ergattert in der hippsten Firma der Welt, beim »Circle«, einem freundlichen Internetkonzern mit Sitz in Kalifornien, der die Geschäftsfelder von Google, Apple, Facebook und Twitter geschluckt hat, indem er alle Kunden mit einer einzigen Internetidentität ausstattet, über die einfach alles abgewickelt werden kann. Mit dem Wegfall der Anonymität im Netz – so ein Ziel der »drei Weisen«, die den Konzern leiten – wird es keinen Schmutz mehr geben im Internet und auch keine Kriminalität. Mae stürzt sich voller Begeisterung in diese schöne neue Welt mit ihren lichtdurchfluteten Büros und High-Class-Restaurants, wo Sterneköche kostenlose Mahlzeiten für die Mitarbeiter kreieren, wo internationale Popstars Gratis-Konzerte geben und fast jeden Abend coole Partys gefeiert werden. Sie wird zur Vorzeigemitarbeiterin und treibt den Wahn, alles müsse transparent sein, auf die Spitze. Doch eine Begegnung mit einem mysteriösen Kollegen ändert alles ...Mit seinem neuen Roman Der Circle hat Dave Eggers ein packendes Buch über eine bestürzend nahe Zukunft geschrieben, einen Thriller, der uns ganz neu über die Bedeutung von Privatsphäre, Demokratie und Öffentlichkeit nachdenken und den Wunsch aufkommen lässt, die Welt und das Netz mögen uns bitte manchmal vergessen.

Cradle to Cradle Independently Published

Hemicelluloses and Lignin in Biorefineries provides an understanding of lignocellulosic biomass, which is mainly composed of cellulose, hemicelluloses, and lignin. It promotes the valorization of these molecules in the context of the bioeconomy and presents hemicelluloses and lignin, which are generated in lignocellulosic biorefineries, as the molecules of the future. The viability of these molecules lies in their renewability and potential. This book covers all aspects of hemicelluloses and lignin including structure, biosynthesis, extraction, biodegradation, and conversion. The book also looks ahead to the socioeconomic and environmental value of biobased industry and emphasizes an understanding of the potential of lignocellulosic biomass.

From Handwriting to Footprinting IGI Global

This book addresses the importance of human factors in the design of artifacts and systems that serves contemporary individual and societal needs. It reports on cutting-edge, multidisciplinary design research and practices fostering creativity, interaction and co-creation, sustainability, digital development, mobility, as well as science and education. Gathering contributions to the first edition of the AHFE 2021 Affiliated Conference on Human Dynamics for the Development

of Contemporary Societies, held virtually on July 25-29, 2021, from USA, this book, which brings together experts with different design and human factors engineering as well as user interface and user experience backgrounds, offers a timely perspective on the role of human factors and design in the developments of modern society and is expected to foster new approaches and interdisciplinary collaboration.

Cat's Cradle AG PUBLISHING HOUSE (AGPH Books)

"A free-wheeling vehicle . . . an unforgettable ride!"—The New York Times
 Cat's Cradle is Kurt Vonnegut's satirical commentary on modern man and his madness. An apocalyptic tale of this planet's ultimate fate, it features a midget as the protagonist, a complete, original theology created by a calypso singer, and a vision of the future that is at once blackly fatalistic and hilariously funny. A book that left an indelible mark on an entire generation of readers, Cat's Cradle is one of the twentieth century's most important works—and Vonnegut at his very best. "[Vonnegut is] an unimitative and inimitable social satirist."—Harper's Magazine
 "Our finest black-humorist . . . We laugh in self-defense."—Atlantic Monthly
