In this award-winning novel, Tharoor has masterfully recast the two-thousand-year-old epic, *The Mahabharata*, with fictional but highly recognizable events and characters from twentieth-century Indian politics. Nothing is sacred in this deliciously irreverent, witty, and deeply intelligent retelling of modern Indian history and the ancient Indian epic *The Mahabharata*. Alternately outrageous and instructive, hilarious and moving, it is a dazzling tapestry of prose and verse that satirically, but also poignantly, chronicles the struggle for Indian freedom and independence.

**Kala Azar in South Asia**

Little, Brown Books for

Young Readers

In Simon Gikandi's view, Caribbean literature and postcolonial literature more generally negotiate an uneasy relationship with the concepts of modernism and modernity—a relationship in which the Caribbean writer, unable to escape a history encoded by Europe, accepts the challenge of rewriting it.

Drawing on contemporary deconstructionist theory, Gikandi looks at how such Caribbean writers as George Lamming, Samuel Selvon, Alejo Carpentier, C. L. R. James, Paule Marshall, Merle Hodge, Zee Edgell, and Michelle Cliff have attempted to confront European modernism.

Modern Slavery Niyogi Books

It was hot at Padachina even for a summer day. In this village were many houses, but not a soul could be seen anywhere. The bazaar was full of shops and the lanes were lined with houses built either of brick or of mud. Every house was quiet. The shops were closed, and no one knew where the shopkeepers had gone. Even the street beggars were absent. The weavers wove no more. The merchants had no business. Philanthropic persons had nothing to give. Teachers closed their schools. Things had come to such a pass that children were even afraid to cry. The streets were empty. There were no bathers in the river. There were no human beings about the houses, no birds in the trees, no cattle in the pastures. Jackals and dogs morosely prowled in the graveyards

and in the cremation grounds. One great house stood in this village. Its colossal pillars could be seen from a distance. But its doors were closed so tight that it was almost impossible for even a breath of air to enter. Within the house a man and his wife sat deeply absorbed in thought. Mahendra Singh and his wife were face to face with famine. The year before the harvests had been below normal. So rice was expensive this year and people began to suffer. Then during the rainy season it rained plentifully. The villagers at first looked upon this as a special mercy of God. Cowherds sang in joy, and the wives of the peasants began to pester their husbands for silver ornaments. All of a sudden, God frowned again. Not a drop of rain fell during the remaining months of the season. The rice fields dried into heaps of straw. Here and there a few fields yielded poor crops, but government agents bought these up for the army. So people began to starve again. At first they lived on one meal a day. Soon, even that became scarce, and they began to go without any food at all. The crop was too scanty, but the

government revenue collector sought to advance his personal prestige by increasing the land revenue by ten per cent. And in dire misery Bengal shed bitter tears. Beggars increased in such numbers that charity soon became the most difficult thing to practise. Then disease began to spread. Farmers sold their cattle and their ploughs and ate up the seed grain. Then they sold their homes and farms. For lack of food they soon took to eating leaves of trees, then grass and when the grass was gone they ate weeds. People of certain castes began to eat cats, dogs and rats.

Essays in Analysis

Penguin UK

From Jessica Khoury, author of the *Corpus Trilogy*, comes a gripping story of royalty and rebellion, coursing across a far-away star system like a trail of jewels.

Rethinking Existentialism

Minotaur Books

An instant New York Times bestseller!

"Internment sets itself apart...terrifying, thrilling and urgent."--

Entertainment Weekly  
Rebellions are built on hope. Set in a horrifying near-future United States, seventeen-year-old Layla Amin and her parents are

forced into an internment camp for Muslim American citizens. With the help of newly made friends also trapped within the internment camp, her boyfriend on the outside, and an unexpected alliance, Layla begins a journey to fight for freedom, leading a revolution against the camp's Director and his guards. Heart-racing and emotional, *Internment* challenges readers to fight complicit silence that exists in our society today.

*A Global Perspective On*

Books International

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume.

On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

**Drawdown** Hillcrest Publishing Group

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased

determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls

in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

#### **The River Between** MDPI

What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of *Ignited Minds* is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam’s vision document of aspiration and hope

motivates us to unleash the dormant energy within India and guide the country to greatness.

[The Jungle Book](#) ANU E Press

Visceral leishmaniasis (VL), (also known as black fever or Kala-azar) is a life-threatening disease first reported from the Indian subcontinent. VL ranks as the world’s second largest parasitic disease killer and is a neglected tropical disease. Most of those infected by this life-threatening disease are uneducated daily wagers working to support their families, and vectors easily disseminate the disease to their neighbors. Owing to recent involvement of stakeholders, the number of patients is decreasing, but eradication remains a distant goal. This second edition presents latest reports of visceral Leishmaniasis by specialists working at the forefront of the endemic areas in Indian subcontinent. It also introduces vaccine development and inhibitors to Trypanosomatidae; some of them describing feasibility studies in visceral Leishmaniasis for the first time. Recent progress of the Science

and Technology Research Partnership for Sustainable Development (SATREPS) is also reviewed and the contents share this collaborative research from the forefront of endemic sites in Bangladesh. Widely covering basic, clinical, epidemiological and entomological aspects, this volume will be of great interest to dedicated researchers interested in Leishmaniasis and to experts of NTDs in global health. There is a tide in the affairs of men. Which, taken at the flood, leads on to fortune; Omitted, all the voyage of disease control is bound in shallows and in miseries. ~modified from Shakespeare ~

Chalo Jahaji Springer

Siddharth Kara is a tireless chronicler of the human cost of slavery around the world. He has documented the dark realities of modern slavery in order to reveal the degrading and dehumanizing systems that strip people of their dignity for the sake of profit—and to link the suffering of the enslaved to the day-to-day lives of consumers in the West. In *Modern Slavery*, Kara draws on his many years

of expertise to demonstrate the astonishing scope of slavery and offer a concrete path toward its abolition. From labor trafficking in the U.S. agricultural sector to sex trafficking in Nigeria to debt bondage in the Southeast Asian construction sector to forced labor in the Thai seafood industry, Kara depicts the myriad faces and forms of slavery, providing a comprehensive grounding in the realities of modern-day servitude. Drawing on sixteen years of field research in more than fifty countries around the globe—including revelatory interviews with both the enslaved and their oppressors—Kara sets out the key manifestations of modern slavery and how it is embedded in global supply chains. Slavery offers immense profits at minimal risk through the exploitation of vulnerable subclasses whose brutalization is tacitly accepted by the current global economic order. Kara has developed a business and economic analysis of slavery based on metrics and data that attest to the enormous scale and functioning of these systems of

exploitation. Beyond this data-driven approach, *Modern Slavery* unflinchingly portrays the torments endured by the powerless. This searing exposé documents one of humanity's greatest wrongs and lays out the framework for a comprehensive plan to eradicate it.

Black Beauty Simon and Schuster

From her place in the store, Klara, an Artificial Friend with outstanding observational qualities, watches carefully the behaviour of those who come in to browse, and of those who pass in the street outside. She remains hopeful a customer will soon choose her, but when the possibility emerges that her circumstances may change for ever, Klara is warned not to invest too much in the promises of humans. In 'Klara and the Sun', Kazuo Ishiguro looks at our rapidly-changing modern world through the eyes of an unforgettable narrator to explore a fundamental question: what does it mean to love?

*A Few Nights and Days* Penguin

"Rome in Egypt's Eastern Desert collects Prof. Cuvigny's most important articles on Egypt's Eastern

desert during the Roman period. From the excavations of the forts that she has directed have come a wealth of material, including tens of thousands of texts written on potsherds (ostraca). Some of these are administrative texts, but many more are correspondence, both official and private, written by and to the people (mostly but not all men) who lived and worked for periods of time in these remote and harsh environments, supported by an elaborate network of defense, administration and supply that tied the entire region together. The contents have all been published earlier in peer-reviewed venues, but almost entirely in French. All contributions have been translated or checked by the editor and brought up to date with respect to bibliography and in some cases significantly rewritten by the author, in order to take account of the enormous amount of new material discovered in the intervening time and subsequent publications. A full index will make this body of work far more accessible than it now is. This book brings together thirty years of detailed study of this material,

bringing to life the geography, administration, military, quarry operations, life in the forts, and the religion and expressive language of the population who lived in them"--

**The Poor Christ of Bomba** CRC Press

"In this book, Andy Baxevanis and Francis Ouellette . . . have undertaken the difficult task of organizing the knowledge in this field in a logical progression and presenting it in a digestible form. And they have done an excellent job. This fine text will make a major impact on biological research and, in turn, on progress in biomedicine. We are all in their debt." —Eric Lander from the Foreword

Reviews from the First Edition "...provides a broad overview of the basic tools for sequence analysis ... For biologists approaching this subject for the first time, it will be a very useful handbook to keep on the shelf after the first reading, close to the computer." —Nature Structural Biology

"...should be in the personal library of any biologist who uses the Internet for the analysis of DNA and protein sequencedata." —Science

"...a wonderful primer designed to navigate the novice through the intricacies of in scripto analysis ... The accomplished gene researcher will also find this book a useful addition to their library ... an excellent reference to the principles of bioinformatics." —Trends in Biochemical Sciences

This new edition of the highly successful *Bioinformatics: A Practical Guide to the Analysis of Genes and Proteins* provides a sound foundation of basic concepts, with practical discussions and comparisons of both computational tools and databases relevant to biological research. Equipping biologists with the modern tools necessary to solve practical problems in sequence data analysis, the Second Edition covers the broad spectrum of topics in bioinformatics, ranging from Internet concepts to predictive algorithms used on sequence, structure, and expression data. With chapters written by experts in the field, this up-to-date reference thoroughly covers vital concepts and is appropriate for both the novice and the

experienced practitioner. Written in clear, simple language, the book is accessible to users without an advanced mathematical or computer science background. This new edition includes: All new end-of-chapter Web resources, bibliographies, and problem sets. Accompanying Web site containing the answers to the problems, as well as links to relevant Web resources. New coverage of comparative genomics, large-scale genome analysis, sequence assembly, and expressed sequence tags. A glossary of commonly used terms in bioinformatics and genomics. *Bioinformatics: A Practical Guide to the Analysis of Genes and Proteins*, Second Edition is essential reading for researchers, instructors, and students of all levels in molecular biology and bioinformatics, as well as for investigators involved in genomics, positional cloning, clinical research, and computational biology. *Anandamath: Dawn Over India* Waveland Press Inc. A book about an interracial relationship, hence deals with race

issues. *Bioinformatics* Oxford University Press. Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*. *Mission to Kala* Lulu Press, Inc. In *Rethinking Existentialism*, Jonathan Webber articulates an original interpretation of existentialism as the ethical theory that human freedom is the foundation of all other values. Offering an original analysis of classic literary and philosophical works published by Jean-Paul Sartre, Simone de Beauvoir, and Frantz Fanon up until 1952,

Webber's conception of existentialism is developed in critical contrast with central works by Albert Camus, Sigmund Freud, and Maurice Merleau-Ponty. Presenting his arguments in an accessible and engaging style, Webber contends that Beauvoir and Sartre initially disagreed over the structure of human freedom in 1943 but Sartre ultimately came to accept Beauvoir's view over the next decade. He develops the viewpoint that Beauvoir provides a more significant argument for authenticity than either Sartre or Fanon. He articulates in detail the existentialist theories of individual character and the social identities of gender and race, key concerns in current discourse. Webber concludes by sketching out the broader implications of his interpretation of existentialism for philosophy, psychology, and psychotherapy. *Ignited Minds* Scholastic Inc. *Safety and Reliability - Safe Societies in a Changing World* collects the papers presented at the 28th European Safety and Reliability Conference, ESREL 2018

in Trondheim, Norway, June 17-21, 2018. The contributions cover a wide range of methodologies and application areas for safety and reliability that contribute to safe societies in a changing world. These methodologies and applications include: - foundations of risk and reliability assessment and management - mathematical methods in reliability and safety - risk assessment - risk management - system reliability - uncertainty analysis - digitalization and big data - prognostics and system health management - occupational safety - accident and incident modeling - maintenance modeling and applications - simulation for safety and reliability analysis - dynamic risk and barrier management - organizational factors and safety culture - human factors and human reliability - resilience engineering - structural reliability - natural hazards - security - economic analysis in risk management Safety and Reliability – Safe Societies in a Changing World will be invaluable to academics and professionals working in a wide range of industrial

and governmental sectors: offshore oil and gas, nuclear engineering, aeronautics and aerospace, marine transport and engineering, railways, road transport, automotive engineering, civil engineering, critical infrastructures, electrical and electronic engineering, energy production and distribution, environmental engineering, information technology and telecommunications, insurance and finance, manufacturing, marine transport, mechanical engineering, security and protection, and policy making.

**The Psychosocial Implications of Disney Movies** Africa World Press

This novel of wisdom and charm tells the story of Tansa, a boy growing up in a Cameroonian village which has been split down the middle by the arrival of a missionary - the white man of God.

*Proceedings of ESREL 2018, June 17-21, 2018, Trondheim, Norway* Penguin UK

The Time Machine is a science fiction short story by H. G. Wells, published in 1895 and written as a landmark story. The work

is generally credited with popularizing the concept of time travel using a vehicle or device to consciously and selectively travel forward or backward through time. *Hiera kala* BRILL

“High-energy . . . Finlay expands the puzzle and ratchets up the action.” —New York Times "This debut is gripping from the first bone-chilling line until the final page."

—Newsweek One of the Most Anticipated Books of 2021: • Newsweek • CNN • E! Online • Goodreads • BuzzFeed • PopSugar • BookBub • Bibliofile • Mystery and Suspense A LibraryReads Selection — A Top Book Voted by Librarians for March 2021 An Indie Next Pick — A Top Book Voted by Independent Bookstores for March 2021 In one of the year’s most anticipated debut psychological thrillers, a family made infamous by a true crime documentary is found dead, leaving their surviving son to uncover the truth about their final days. “They found the bodies on a Tuesday.” So begins this twisty and breathtaking novel that traces the fate of the Pine family, a thriller that will both leave you on the edge of your seat and move you to

tears. After a late night of partying, NYU student Matt Pine returns to his dorm room to devastating news: nearly his entire family—his mom, his dad, his little brother and sister—have been found dead from an apparent gas leak while vacationing in Mexico. The local police claim it was an accident, but the FBI and State Department seem far less certain—and they won't tell Matt why. The tragedy makes headlines everywhere because this isn't the first time the Pine family has been thrust into the media spotlight. Matt's older brother, Danny—currently serving a life sentence for the

murder of his teenage girlfriend Charlotte—was the subject of a viral true crime documentary suggesting that Danny was wrongfully convicted. Though the country has rallied behind Danny, Matt holds a secret about his brother that he's never told anyone: the night Charlotte was killed Matt saw something that makes him believe his brother is guilty of the crime. When Matt returns to his small hometown to bury his parents and siblings, he's faced with a hostile community that was villainized by the documentary, a frenzied media, and memories

he'd hoped to leave behind forever. Now, as the deaths in Mexico appear increasingly suspicious and connected to Danny's case, Matt must unearth the truth behind the crime that sent his brother to prison—putting his own life in peril—and forcing him to confront his every last fear. Told through multiple points-of-view and alternating between past and present, Alex Finlay's *Every Last Fear* is not only a page-turning thriller, it's also a poignant story about a family managing heartbreak and tragedy, and living through a fame they never wanted.
