This book addresses major population and development issues: fertility and reproductive health, migrations, gender, education, poverty and inequalities. To that aim it revisits and considerably enlarges Kingsley Davis' 1963 theory of change and response, using interdisciplinary methodologies. On the basis of four decades of field research (1985-2015), it questions the rationality of the actors, how culture shapes socio-demographic behaviours, in a context of modernity and globalisation. More specifically, it casts new light on the interactions of individuals, families, networks and local communities with the State and its population policy.

[Deutsch im Blick](#) is an online, non-traditional language learning program for beginning and early

intermediate students of German ... The main premise of [Deutsch im Blick](#) is that learning a foreign language should focus on learning language in use. Thus, all activities are guided by real-life, plausible language situations: How would native and non-native speakers use the vocabulary, grammar and sociolinguistic rules in everyday contexts to make sense of what others tell them and to make meaning themselves?"--Page 8.
