Sparse and redundant representation s: from theory to applications in signal and image processing. M Elad. Springer Science & Business Media, 2010. 3222: 2010: Sparse Representations and the Basis Pursuit Algorithm It provides various tools for sparse solution of linear systems, least-squares with sparsity, various pursuit algorithms, and more. It also includes Matlab

simulations that reproduce the following papers that I coauthored): David Donoho and Michael Elad, On the Stability of the Basis Pursuit in the Presence of Noise.
