KRAMER MADELYNN

A Comprehensive Handbook for Clinicians Thomas Dunne Books

Dear Reader, It is difficult for an author to choose a favorite from among her own books, especially when she has been lucky enough—as I have—to make a career out of doing what she loves. But some stories are memorable because they mark an important milestone in an author's life, and for me, perhaps none is more special than *Island Flame*—my very first book. I was thrilled when it was published, and now, more than thirty years later, I am just as excited to share it again with you. *Island Flame* is a classic tale of romance on the high seas, featuring two extraordinary characters: the headstrong Lady Catherine Aldley and the legendary pirate Jonathan Hale. I don't have to tell you that their tumultuous escapade sizzles with passion (lots of passion!), but what I hope you will take away most from Cathy and Jonathan is that dreams do come true—in love and in life. Mine did, and I hope yours will too. I look forward to sharing many more adventures together in the future. Enjoy! Karen Robards

Discover Aly Raisman's inspiring story of dedication, perseverance, and learning to think positive even in the toughest times on her path to gold

medal success in two Olympic Games—and beyond. Aly Raisman first stepped onto a gymnastics mat as a toddler in a "mommy & me" gymnastics class. No one could have predicted then that sixteen years later, she'd be standing on an Olympic podium, having achieved her dreams. Aly's road to success was full of hard work, perseverance, and victories, but not without its hardships. Aly faced many obstacles, from naysayers who said she'd never make it in gymnastics to classmates who shamed her for her athletic body to a devastating betrayal of trust. Through it all, Aly surrounded herself with supportive family, friends, and teammates and found the inner strength to remain positive and believe in herself. Now, in her own words, Aly shows what it takes to be a champion on and off the floor, and takes readers on a behind-the-scenes journey before, during, and after her remarkable achievements in two Olympic Games—through her highest highs, lowest lows, and all the moments in between. Honest and heartfelt, frank and funny, Aly's story is enhanced with never-before-published photos, excerpts from the personal journals she's kept since childhood that chronicle memorable moments with her teammates, and hard-won advice for readers striving to rise above challenges, learn to love themselves, and make their own dreams come true.

Pastor Lorraina "Rain" McCall is anointed, righteous, and a pillar in her community. She preaches the Word of God every Sunday and Tuesday at her family's longtime ministry and has made a lucrative career out of speaking on women empowerment. But behind closed doors, there's a monster beneath the warm smiles, low-sitting hats, and purposeful sermons. On her off days, Rain succumbs helplessly to a sex addiction by sleeping with men who step through her church corridors. Riddled with temptation, she ventures down a road that grows too treacherous to bear, and soon, her reputation and ministry is put on the line. Can she accept help by the very God she preaches about, or are her sexual desires far too great? Will another man fall victim to her seduction? One of Las Vegas' most eligible bachelors, Jhalil Harrison, wasn't necessarily looking for love when he ran into Lorraina, but fate said otherwise. He fights to save Lorraina from her demons, not knowing that the damage is much too late. He realizes that only God can save her, and for the sake of obedience, he bids a goodbye to his one true love. Soul ties are real; once the door to intimacy is opened, two souls are joined forever.

It explores a diversity of perspectives on the origins of language, including a fine description of vocal communication in animals, mainly in monkeys and apes, but also in birds, the study of vocal tract anatomy and cortical control of the vocal productions in monkeys and apes, the description of combinatorial structures and their social and communicative value, and the exploration of the cognitive environment in which language may have emerged from nonhuman primate vocal or gestural communication.

How do we thrive in our behaviors and experiences? Positive neuroscience research illuminates the brain mechanisms that enable human flourishing. Supported by the John Templeton Foundation's Positive Neuroscience Project, which Martin E. P. Seligman established in 2008, Positive Neuroscience provides an intersection between neuroscience and positive psychology. In this edited volume, leading researchers describe the neuroscience of social bonding, altruism, and the capacities for resilience and creativity. Part I (Social Bonds) describes the mechanisms that enable humans to connect with one another. Part II (Altruism) focuses on the neural mechanisms underlying the human ability and willingness to confer costly benefits on others. Part III (Resilience and Creativity) examines the mechanisms by which human brains overcome adversity, create, and discover. Specific topics include: a newly discovered nerve type that appears to be specialized for emotional communication; the effects of parenting on the male brain; how human altruism differs from that of other primates; the neural features of extraordinary altruists who have donated kidneys to strangers; and distinctive patterns of brain wiring that endow some people with exceptional musical abilities. Accessible to a broad academic audience, from advanced undergraduates to senior scholars, these subjects have generated a fascinating and highly convergent set of ideas and results, shaping our understanding of human nature.

The Art of Running in Heels Cambridge University Press

How to Raise Kids Who Aren't Assholes is a clear, actionable, sometimes humorous (but always science-based) guide for parents on how to shape their kids into honest, kind, generous, confident, independent, and resilient people...who just might save the world one day. As an award-winning science journalist, Melinda Wenner Moyer was regularly asked to investigate and address all kinds of parenting questions: how to potty train, when and whether to get vaccines, and how to help kids sleep through the night. But as Melinda's children grew, she found that one huge area was ignored in the realm of parenting advice: how do we make sure our kids don't grow up to be assholes? On social media, in the news, and from the highest levels of government, kids are increasingly getting the message that being selfish, obnoxious and cruel is okay. Hate crimes among children and teens are rising, while compassion among teens has been dropping. We know, of course, that young people have the capacity for great empathy, resilience, and action, and we all want to bring up kids who will help build a better tomorrow. But how do we actually do this? How do we raise children who are kind, considerate, and ethical inside and outside the home, who will grow into adults committed to making the world a better place? How to Raise Kids Who Aren't Assholes is a deeply researched, evidence-based primer that provides a fresh, often surprising perspective on parenting

issues, from toddlerhood through the teenage years. First, Melinda outlines the traits we want our children to possess—including honesty, generosity, and antiracism—and then she provides scientifically-based strategies that will help parents instill those characteristics in their kids. Learn how to raise the kind of kids you actually want to hang out with—and who just might save the world.

Island Flame University of Illinois Press

In clear, impassioned prose, Enrico Manicardi analyzes the evils of our age from their genesis. This or that economic, technological or cultural model is not to blame for our current crisis; the blame lies with economics, technology and culture as such. It is the ideology of fear that makes us afraid. It is the mentality of domination that jeopardizes all of our relationships. In short, the problem is civilization. Through its oppressive classes, values and processes that pervade everyone's life, civilization domesticates us, weakens our perceptiveness and distances us from the living world. We must radically change our way of thinking, feeling and behaving before it's too late—we must dam the flood of devitalization that is washing over us, and return to our wilder natures, both inside and outside ourselves. Manicardi's appeal is crystal clear: if we are to survive we must begin to search inside ourselves, not to celebrate the distant past as if it were a cult, but to return to ourselves, to grip life with our own two hands, and build upon that earlier ecocentric conscience which once held the place of the egocentric conscience now leading us astray. Enrico Manicardi was born in 1966 and is a member of La Scintilla, the Society for Libertarian Culture of Modena. A lawyer and founder of the antiauthoritarian media project "Infection," he has also played guitar and written music for an eponymous band since the 1980s. His lifelong wish has been to live in a free, radically off-kilter, ecologically sound world, one characterized by warm, spontaneous, non-hierarchical relationships rather than those consecrated by the cult of technology. Troubled by the way people have succumbed to a civilization that estranges, domesticates and regulates everything and everyone, he continues to protest against the modern world's project to enslave us. This book augurs the rise of an increasingly harmonious chorus loud enough to put an end to that project.

From the expert team behind IT'S PERFECTLY NORMAL and IT'S SO AMAZING! comes a book for younger children about their bodies — a resource that parents, teachers, librarians, health care providers, and clergy can use with ease and confidence. Young children are curious about almost everything, especially their bodies. And young children are not afraid to ask questions. What makes me a girl? What makes me a boy? Why are some parts of girls' and boys' bodies the same and why are some parts different? How was I made? Where do babies come from? Is it true that a stork brings babies to mommies and daddies? IT'S NOT THE STORK! helps answer these endless and perfectly normal questions that preschool, kindergarten, and early elementary school children ask about how they began. Through lively, comfortable language and sensitive, engaging artwork, Robie H. Harris and Michael Emberley address readers in a reassuring way, mindful of a child's healthy desire for straightforward information. Two irresistible cartoon characters, a curious bird and a squeamish bee, provide comic relief and give voice to the full range of emotions and reactions children may experience while learning about their amazing bodies. Vetted and approved by science, health, and child development experts, the information is up-to-date, age-appropriate, and scientifically accurate, and always aimed at helping kids feel proud, knowledgeable, and comfortable about their own bodies, about how they were born, and about the family they are part of.
