Print Fuzzy Algebra
Fuzzy
Subgroups, Fuzzy
Subrings and Fuzzy
Ideals
Smarandache Fuzzy
Algebra
The author studies the
Smarandache Fuzzy
Algebra, which, like its
predecessor Fuzzy

Algebra, arose from the
need to define structures
that were more
compatible with the real
world where the grey
areas mattered, not only
black or white. In any
human field, a
Smarandache n -structure
on a set S means a weak
structure $\{w(0)\}$ on S
such that there exists a
chain of proper subsets
 $P(n-1)$ in $P(n-2)$ in $P(2)$
in $P(1)$ in S whose

corresponding structures verify the chain $\{w(n-1)\}$ includes $\{w(n-2)\}$ includes? includes $\{w(2)\}$ includes $\{w(1)\}$ includes $\{w(0)\}$, where 'includes' signifies 'strictly stronger' (i.e., structure satisfying more axioms). This book is referring to a Smarandache 2-algebraic structure (two levels only of structures in algebra) on a set S , i.e. a weak structure $\{w(0)\}$ on S such that there exists a proper subset P of S , which is embedded with a stronger structure $\{w(1)\}$. Properties of

Smarandache fuzzy semigroups, groupoids, loops, bigroupoids, biloops, non-associative rings, birings, vector spaces, semirings, semivector spaces, non-associative semirings, bisemirings, near-rings, non-associative near-ring, and binear-rings are presented in the second part of this book together with examples, solved and unsolved problems, and theorems. Also, applications of Smarandache groupoids, near-rings, and semirings in automaton theory, in

error correcting codes, and in the construction of S -sub-biautomaton can be found in the last chapter.

Fuzzy Algebra Infinite Study

This book publishes select papers presented at the 4th International Conference on Frontiers in Industrial and Applied Mathematics (FIAM-2021), held at the Sant Longowal Institute of Engineering and Technology, Longowal, Punjab, India, from 21-22 December 2021. Most of the papers deal with mathematical theory embedded with its

applications to engineering and sciences. This book illustrates numerical simulation of scientific problems and the state-of-the-art research in industrial and applied mathematics, including various computational and modeling techniques with case studies and concrete examples. Graduate students and researchers, who are interested in real applications of mathematics in the areas of computational and theoretical fluid dynamics, solid mechanics,

optimization and operations research, numerical analysis, bio-mathematics, fuzzy, control and systems theory, dynamical systems and nonlinear analysis, algebra and approximation theory, will find the book useful. . *Boletim da Sociedade Paranaense de Matemática* O'Reilly Germany Die moderne Hochspannungstechnik ist nicht nur eine Schlüsseltechnologie für die sichere, wirtschaftliche und

umweltfreundliche Energieversorgung, sondern ihr Anwendungsspektrum umfaßt nahezu alle Bereiche der Technik. Das Buch gibt einen praxisorientierten, geschlossenen Überblick über die theoretischen Grundlagen, die modernen Technologien und die praktischen Anwendungen der Hochspannungstechnik. *Hochspannungstechnik* Springer Contributors to current issue (listed in papers' order): Ibrahim Yasser,

 ISKE2009 is the fourth in a series of conferences on Intelligent Systems and Knowledge Engineering. The ISKE2009 proceedings covers state-of-the-art research and development in various areas of Intelligent Systems and Knowledge Engineering, particularly of Intelligent Decision Making Systems.
SCIENTIA MAGNA: An international journal, Vol. 13, No. 1, 2018 Springer Nature
 This book is an

introduction to GIS (Generalized Interval Systems) theory that includes the major results of pitch-class theory. It provides mathematicians with applications of group theory to music and music theorists with the essential connections between GIS theory and pitch-class theory. Many of the results in pitch-class theory are not addressed by David Lewin (such as power functions or the Common Tone Theorem for inversions). The book states those results and generalizes

them to conform with GIS theory. Finally, it addresses recent criticisms leveled at pitch-class theory and suggests how they can be addressed in GIS theory.

Handbook of Research on Technologies and Systems

*for E-Collaboration During
Global Crises Infinite
Study*

Recently, the internet of things (IoT) has brought the vision of a smarter world into reality with a massive amount of data and numerous services. With the outbreak of the COVID-19 pandemic, artificial intelligence (AI) has gained significant attention by utilizing its machine learning algorithms for quality patient care. The integration of IoT with AI may open new possibilities for both

technologies and can play a big part in smart healthcare by providing improved insight into healthcare data and allowing for more inexpensive personalized care. The Handbook of Research on Advancements in AI and IoT Convergence Technologies considers recent advancements in AI and IoT convergence technologies with a focus on state-of-the-art approaches, methodologies, and systems for the design, development,

deployment, and innovative use of those convergence technologies. It also provides insight into how to develop AI and IoT convergence techniques to meet industrial demands and covers the emerging research topics that are going to define the future of AI and IoT convergence technology development. Covering key topics such as diseases, smart healthcare, social distance monitoring, and security, this major reference work is ideal for

industry professionals, nurses, healthcare workers, computer scientists, policymakers, researchers, scholars, practitioners, instructors, and students.

Distributionen und Hilbertraumoperatoren
Springer-Verlag

This book constitutes the refereed proceedings of the 4th International Symposium on Advances in Signal Processing and Intelligent Recognition Systems, SIRS 2018, held in Bangalore, India, in September 2018. The 28 revised full papers and 11

revised short papers presented were carefully reviewed and selected from 92 submissions. The papers cover wide research fields including information retrieval, human-computer interaction (HCI), information extraction, speech recognition.

Indian Journal of Mathematics Springer

Currently, spatial analysis is becoming more important than ever because enormous volumes of spatial data are available from different sources, such as

GPS, Remote Sensing, and others. This book deals with spatial analysis and modelling. It provides a comprehensive discussion of spatial analysis, methods, and approaches related to human settlements and associated environment. Key contributions with empirical case studies from Iran, Philippines, Vietnam, Thailand, Nepal, and Japan that apply spatial analysis including autocorrelation, fuzzy, voronoi, cellular automata, analytic hierarchy process,

artificial neural network, spatial metrics, spatial statistics, regression, and remote sensing mapping techniques are compiled comprehensively. The core value of this book is a wide variety of results with state of the art discussion including empirical case studies. It provides a milestone reference to students, researchers, planners, and other practitioners dealing the spatial problems on urban and regional issues. We are pleased to announce that this book has been

presented with the 2011 publishing award from the GIS Association of Japan. We would like to congratulate the authors!

Power Algebras over Semirings Infinite Study

This monograph is a continuation of several themes presented in my previous books [146, 149]. In those volumes, I was concerned primarily

with the properties of semirings. Here, the objects of investigation are sets of the form RA , where R is a semiring and A is a set having a certain structure. The problem is one of translating that structure to RA in some "natural" way. As such, it tries to find a unified way of dealing with diverse topics in mathematics and theoretical computer science as formal language theory, the theory of fuzzy algebraic structures, models of optimal control, and many others. Another special

case is the creation of "idempotent analysis" and similar work in optimization theory. Unlike the case of the previous work, which rested on a fairly established mathematical foundation, the approach here is much more tentative and docimastic. This is an introduction to, not a definitive presentation of, an area of mathematics still very much in the making. The basic philosophical problem lurking in the background is one stated succinctly by Hahle and Sostak

[185]: ". . . to what extent basic fields of mathematics like algebra and topology are dependent on the underlying set theory?" The conflicting definitions proposed by various researchers in search of a resolution to this conundrum show just how difficult this problem is to see in a proper light. **Kochi Journal of Mathematics** CRC Press This unique volume presents the scientific achievements, significant discoveries and pioneering contributions

of various academicians, industrialist and research scholars. The book is an essential source of reference and provides a comprehensive overview of the author's work in the field of mathematics, statistics and computer science. Contents: Databased Intrinsic Weights of Indicators of Multi-Indicator Systems and Performance Measures of Multivariate Rankings of Systemic Objects (G P Patil & S W Joshi) Statistical Aspects of SuDoKu-Based

Experimental Designs (Jyotirmoy Sarkar & Bikas K Sinha) Multi Criteria Decision Making Model for Optimal Selection of Recovery Facility Location and Collection Routes for a Sustainable Reverse Logistics Network under Fuzzy Environment (J D Darbari, V Agarwal & P C Jha) Optimal allocation of SKU and Safety Stock in Supply Chain System Network (K Gandhi, K Goyal, A Jha & J D Darbari) Bi-Objective Optimization Model for Fault-Tolerant Embedded Systems Under Build-Or-

Buy Strategy Incorporating Recovery Block Scheme (R Kaur, S Arora, P C Jha & S Madan) Study of a Problem of Annular Cylinder Under Two-Temperature Thermoelasticity with Thermal Relaxation Parameters (Santwana Mukhopadhyay & Roushan Kumar) Multi-Criteria Advertisement Allocation Model of Multiple Advertisers on a Television Network (G Kaur, S Aggarwal & P C Jha) Computation of Maximum Likelihood Estimates in Three

Parameter Weibull for Censored Data (Sanjeeva Kumar Jha) On Statistical Quality Control Techniques Based on Ranked Set Sampling (Md Sarwar Alamand, Arun Kumar Sinha & Rahbar Ali) Approximate Solution for Nonlinear Oscillator with Cubic and Quintic Nonlinearities (Jitendra Singh) Fuzzy DEA Cross-Efficiency Model for Ranking and Performance Evaluation Using Ideal and Anti-Ideal Decision Making Units (Seema Gupta, K N Rajeshwari & P C Jha) Poverty Analysis Using

<p>Scan Statistic Methods (Arun Kumar Sinha & Mukesh Kumar)Joint Performance Evaluation Data Envelopment Analysis Problem: An Interactive Approach (Riju Chaudhary, Pankaj Kumar Garg & P C Jha)Stochastic Modeling of a Repairable System Under Different Weather Conditions (S C Malik)Estimation of Risk Surfaces and Identification of District Boundaries for Tuberculosis in North-Eastern Indian States (Sanjeeva Kumar Jha & Ningthoukhongjam</p>	<p>Vikimchandra Singh)Optimal Advertisement Allocation for Product Promotion on Television Channels (A Kaul, S Aggarwal, P C Jha & A Gupta)Fitting Linear Regressions: Development and Scope (Pranesh Kumar & J N Singh)The Impact of Family Planning on Fertility in Jharkhand State (Dilip Kumar)Spatial Analysis of AFP Surveillance Strategy for Polio Eradication in India (Pankaj Srivastava & Arun Kumar Sinha)On the Stochastic Modeling and</p>	<p>Analysis of Bloom Caster System of Continuous Casting Shop Area of an Integrated Steel Plant (S K Singh)A Generalized Exponential-Lindley Distribution (A Mishra & Binod Kumar Sah)On Estimating the Urban Populations Using Minimum Information (Arun Kumar Sinha, Vijay Kumar & Ravi B P Verma)Fitting of Some Statistical Distributions of Daily Precipitation Data on North West India (NWI) Regions (Ranjan Kumar Sahoo)On Systematic Sampling Strategies for a</p>

 Wie viele Präsentationen haben Sie in Ihrem Berufsleben bereits

verfolgt? Und Hand aufs Herz: Wie viele davon haben einen bleibenden Eindruck bei Ihnen hinterlassen? Wirklich gute Präsentationen sind noch immer die Ausnahme, denn nur selten werden die Möglichkeiten dieses Mediums optimal genutzt. Wer sein Publikum nachhaltig überzeugen möchte, muss seine Ideen verdichten und in stimmige Bilder umsetzen. slide:ology setzt hier an und führt Sie in die Kunst des visuellen Erzählens ein. Die Autorin

Nancy Duarte weiß, wovon sie spricht: Sie leitet Duarte Design, das Unternehmen, das unter anderem die Slide-Show in Al Gores Oscar-prämiertem Film Eine unbequeme Wahrheit entwickelt hat. In slide:ology gewährt sie tiefe Einblicke in ihr

umfangreiches Wissen als Designerin. Anhand von Fallstudien bringt sie Ihnen darüber hinaus die Visualisierungsstrategien einiger der erfolgreichsten Unternehmen der Welt nahe. slide:ology zeigt Ihnen unter anderem, wie Sie: - Ihr Publikum gezielt ansprechen - Ihre Ideen

auf den Punkt bringen und ein stimmiges Design entwickeln - Ihre Aussagen mit Farben, Bildern und prägnantem Text unterstützen - Grafiken erstellen, die Ihren Zuhörern das Verständnis erleichtern - Präsentationstechnologien optimal nutzen
