DIV In 1963, Martin Luther King, Jr. delivered his famous 'I Have a Dream' speech. Thirty years later his son registered the words 'I Have a Dream' as

a trademark and successfully blocked attempts to reproduce these four words. Unlike the Gettysburg Address and other famous speeches, 'I Have a Dream' is now private property, even though some the speech is comprised of words written by Thomas Jefferson, a man who very much believed that the corporate land grab of knowledge was at odds with the development of civil society. Exploring the complex intersection between creativity and commerce, Hyde raises the question of how our shared store of art and knowledge might be made compatible with our desire to copyright everything, and questions whether the fruits of creative labour can - or should - be privately owned, especially in the digital age. 'In what sense,' he writes, 'can someone own, and therefore control other people's access to, a work of fiction or a public speech or the ideas behind a drug?' Moving deftly between literary analysis, history and biography (from Benjamin Franklin's reluctance to patent his inventions to Bob Dylan's admission that his early method of songwriting was largely comprised of 'rearranging verses to old blues ballads, adding an original line here or there... slapping a title on it'), Common As Air is a stirring call-to-arms about how we might concretely legislate for a cultural commons that would simultaneously allow for financial reward and protection from monopoly. Rigorous, informative and riveting, this is a book for anyone who is interested in the creative process. /div

Some things are better left unsaid. Besides, I don't need to act on every wild thought that flits through my imagination, not when my fiancé and I have the kind of life I've always longed for -- passionate, intimate and oh so real. I can't risk losing him, so I focus on building our life together as a couple, expanding my career as a sports reporter, and prepping for our wedding. But the more insistent my thoughts become, the closer I get to

telling him what I want most...The question though is what will happen to our unbreakable bond when I do.

The power of the commons as a free, fair system of provisioning and governance beyond capitalism, socialism, and other -isms. From co-housing and agroecology to fisheries and open-source everything, people around the world are increasingly turning to 'commoning' to emancipate themselves from a predatory market-state system. *Free, Fair, and Alive* presents a foundational re-thinking of the commons — the self-organized social system that humans have used for millennia to meet their needs. It offers a compelling vision of a future beyond the dead-end binary of capitalism versus socialism that has almost brought the world to its knees. Written by two leading commons activists of our time, this guide is a penetrating cultural critique, table-pounding political treatise, and practical playbook. Highly readable and full of colorful stories, coverage includes: Internal dynamics of commoning How the commons worldview opens up new possibilities for change Role of language in reorienting our perceptions and political strategies Seeing the potential of commoning everywhere. *Free, Fair, and Alive* provides a fresh, non-academic synthesis of contemporary commons written for a popular, activist-minded audience. It presents a compelling narrative: that we can be free and creative people, govern ourselves through fair and accountable institutions, and experience the aliveness of authentic human presence.

The anthropologist Marcel Mauss, in his famous exploration of the gift in "primitive" and archaic societies, showed that the essential aspect of the exchange of presents involved the establishment of a social tie that bound the parties together above and beyond any material value of the objects exchanged. He argued that these intangible mutual "debts" constituted the social fabric. Godbout and Caillé show that, contrary to the modern assumption that societies function on the basis of market exchange and the pursuit of self-interest, the gift still constitutes the foundation of our social fabric. The authors describe the gift not as an object but as a social connection, perhaps the most important social connection because it creates a sense of obligation to respond in kind. They examine the gift in a broad range of cases such as blood and organ donation; volunteer work; the bonds between friends, couples, and family; Santa Claus; the interaction between performers and their audience; and the relation of the artist to

society. Written in an engaging manner, *The World of the Gift* will appeal to anyone who is interested in how the world really operates.

*When Two's Not Enough* The GiftImagination and the Erotic Life of PropertyStarting with the premise that the work of art is a gift and not a commodity, this revolutionary book ranges across anthropology, literature, economics, and psychology to show how the 'commerce of the creative spirit' functions in the lives of artists and in culture as a whole.The GiftImagination and the Erotic Life of Property : [excerpts]The GiftCreativity and the Artist in the Modern World

In *Trickster Makes This World*, Lewis Hyde brings to life the playful and disruptive side of human imagination as it is embodied in trickster mythology.

He first visits the old stories—Hermes in Greece, Eshu in West Africa, Krishna in India, Coyote in North America, among others—and then holds them up against the lives and work of more recent creators: Picasso, Duchamp, Ginsberg, John Cage, and Frederick Douglass. Twelve years after its first publication, *Trickster Makes This World*—authoritative in its scholarship, loose-limbed in its style—has taken its place among the great works of modern cultural criticism. This new edition includes an introduction by Michael Chabon.

*Erotic Cartographies* uses subjective mapping, a participatory data collection technique, to demonstrate how Trinidadian same-sex-loving women use their gender performance, erotic autonomy, and space-making practices to reinforce and resist colonial ascriptions on subject bodies. The women strategically embody their sexual identities to challenge imposed subject categories and to contest their invisibility and exclusion from discourses of belonging. *Erotic Cartographies* refers to the processes of mapping territories of self-knowing and self-expression, both cognitively in the imagination and on paper during the mapping exercise, exploring how meaning is given to space, and how it is transformed. Using the women's quotes and maps, the book focuses on the false binary of public-private, the practices of home and family, and religious nationalism and spiritual self-seeking, to demonstrate the women's challenges to the structural, symbolic, and interpersonal violence of colonial discourses and practices related to gender, knowledge, and power in Trinidadian society.

"Once adjunct teaching was considered a temporary solution to faculty shortages in institutions of higher education. Now it a permanent and indispensable feature of such institutions, not just in the U.S. but worldwide. This book takes stock of this new development, concentrating primarily on the situation in the humanities. It looks at its impact on the lives of the highly-educated scholars and teachers from many parts of the world; scholars waking up to the sobering fact that higher education presents them with a two-tiered labour market in which they themselves are permanently barred from moving up to the higher tier. To them, being an adjunct teacher means experiencing frustration and humiliation. All essays in this book offer personal accounts of adjuncts' experiences together with critical reflections on institutional conditions and suggestions for their improvement. In turn defiant, poignant, analytical, exasperated, and sardonic, these essays are always incisive and revealing. Their inside view - a view from below - shows higher education as a world different from how it appears to tenured professors and university administrators, different from that presented in most college brochures. For all those who care about the current state and the future of higher education - no matter if they are teachers, scholars, students, parents, or administrators - this book will offer valuable insights into the working world of academic teaching."--BOOK JACKET.

*Common as Air* offers a stirring defense of our cultural commons, that vast store of art and ideas we have inherited from the past that continues to enrich our present. Suspicious of the current idea that all creative work is "intellectual property," Lewis Hyde turns to America's founding fathers—men like John Adams, James Madison, and Thomas Jefferson—in search of other ways to value the fruits of human wit and imagination. What he discovers is a rich tradition in which knowledge was assumed to be a commonwealth, not a private preserve. For the founding fathers, democratic self-governance itself demanded open and easy access to ideas. So did the growth of creative communities, such as that of eighteenth-century science. And so did the flourishing of public persons, the very actors whose "civic virtue" brought the nation into being. In this lively, carefully argued, and well-documented book, Hyde brings the past to bear on present matters, shedding fresh light on everything from the Human Genome Project to Bob Dylan's musical roots. *Common as Air* allows us to stand on the shoulders of America's revolutionary giants and to see beyond today's narrow debates over cultural ownership. What it reveals is nothing less than an inspiring vision of how to reclaim the commonwealth of art and ideas that we were meant to inherit.

One of Vanity Fair's Great Quarantine Reads: Step into Jenny Slate's wild imagination in this "magical" (Mindy Kaling), "delicious" (Amy Sedaris), and "poignant" (John Mulaney) New York Times bestseller about love, heartbreak, and being alive -- "this book is something new and wonderful" (George Saunders). You may "know" Jenny Slate from her Netflix special, *Stage Fright*, as the creator of Marcel the Shell, or as the star of "Obvious Child." But you don't really know Jenny Slate until you get bonked on the head by her absolutely singular writing style. To see the world through Jenny's eyes is to see it as though for the first time, shimmering with strangeness and possibility. As she will remind you, we live on an ancient ball that rotates around a bigger ball made up of lights and gasses that are science gasses, not farts (don't be immature). Heartbreak, confusion, and misogyny stalk this blue-green sphere, yes, but it is also a place of wild delight and unconstrained vitality, a place where we can start living as soon as we are born, and

we can be born at any time. In her dazzling, impossible-to-categorize debut, Jenny channels the pain and beauty of life in writing so fresh, so new, and so burstingly alive, we catch her vision like a fever and bring it back out into the bright day with us, where everything has changed.

"One of our true superstars of nonfiction" (David Foster Wallace), Lewis Hyde offers a playful and inspiring defense of forgetfulness by exploring the healing effect it can have on the human psyche. We live in a culture that prizes memory—how much we can store, the quality of what's preserved, how we might better document and retain the moments of our life while fighting off the nightmare of losing all that we have experienced. But what if forgetfulness were seen not as something to fear—be it in the form of illness or simple absentmindedness—but rather as a blessing, a balm, a path to peace and rebirth? *A Primer for Forgetting* is a remarkable experiment in scholarship, autobiography, and social criticism by the author of the classics *The Gift* and *Trickster Makes This World*. It forges a new vision of forgetfulness by assembling fragments of art and writing from the ancient world to the modern, weighing the potential boons forgetfulness might offer the present moment as a creative and political force. It also turns inward, using the author's own life and memory as a canvas upon which to extol the virtues of a concept too long taken as an evil. Drawing material from Hesiod to

Jorge Luis Borges to Elizabeth Bishop to Archbishop Desmond Tutu, from myths and legends to very real and recent traumas both personal and historical, *A Primer for Forgetting* is a unique and remarkable synthesis that only Lewis Hyde could have produced.
