Satellite Basics Satellite communications are radio transmissions in the Ku band of the electromagnetic spectrum. The Ku band is theSatellite Basics Idirect | unite005.targettelecoms.coThe Satellite Network Calculator is a network simulation tool which is hosted on the Dialog® hub. It can be accessed via an intuitive graphical user interface on your browser or via an API. It provides instant insight in performance and potential of your satellite network, represented in highly graphical and intuitive manner.Satellite Network Calculator - ST Engineering iDirectiDirect Evolution® Evolution® is an IP-based satellite communications system engineered to deliver the highest quality broadband connectivity wherever and whenever it's needed. It's a platform that is open, efficient and easily scalable, lowering the total cost of ownership.iDirect Evolution® - ST Engineering iDirectThe 5000 series is a satellite router designed for easy deployment, integrating a satellite modem, IP router, TCP acceleration and advanced QoS and prioritization capabilities. The iNFINITI 5000 uses the high performance TDM on the outbound and iDirect's patented, deterministic MF-TDMA on the inbound, delivering speeds up to 20 Mbps on the outbound and up to 7.7 Mbps on the inbound.

Satellite Communications Basics Goal: Through lecture, presentation and visual display each learner will be able to understand and explain how Satellite Communication operates overall and within an iDirect network. Objectives: 1. The learner will be able to identify basic terminology associated with any Satellite Communications operation scheme. 2.

Satellite communications are radio transmissions in the Ku band of the electromagnetic spectrum. The Ku band is the same band that police officers use for their radar detectors. Ku Band satellite dishes transmit between a frequency of 14000 to 14500 MHz. They receive a frequency range between 11700 to 12750 MHz.
