Nursing Research:
Reading, Using, and
Creating Evidence

Routledge

Although the significance of '9/11' is subject to debate, it is symbolic of a general sentiment of

discontinuity whereby society is vulnerable to undefined and highly disruptive events. Recent catalysts of this sentiment are eye-catching developments such as the SARS (Severe Acute Respiratory Syndrome) and bird flu outbreaks, the Enron and Parmalat scandals, political assassinations in Sweden

and the Netherlands, regime changes in Iraq and Afghanistan, and terrorist attacks in Bali, Istanbul, Madrid, and various parts of the Middle East. However, recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before. Looking back

in history we see that disruptive processes are common. For example, 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent: the collapse of communism, Berlin as the capital of a reunited Germany, the wars in the former Yugoslavia, the single European currency, and the near doubling of the number of European Union member states. Changes elsewhere have been no less discontinuous and unforeseen: the fall of the

Asian tigers, the emergence of the Internet and mobile telecommunication, and the presidency of Nelson Mandela. Societal discontinuity is a relatively new area of concern in policy development. Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting, which tended to reason from continuous developments and linear processes. Rather than making forecasting the

future, it has become popular to use scenarios as a manner to consider several possible futures. Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past, present, and future developments, which can serve as a basis for action. Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited

number of outlooks. Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary. In theory, scenario development is a way to consider future discontinuity. However, there are indications that the theoretical promise is not reflected in scenario practice. Research has shown that scenarios do not consider the idea of discontinuity as a matter of course. In our research,

we found that a scenario study would benefit from efforts to create and foster a 'culture of curiosity' for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future. Only then can one read the writing on the wall of future developments.

Your resume and cover letter, as well as a digital portfolio, business card and mailers, will function as the first contact and impression you make. These items will work to get your "foot in the

door." Ultimately, however, it will be your portfolio book or online portfolio website that will land you the job. The creation of your own portfolio is a creative statement about the value you place on your work and craft. This book first uses a system to: * find your visual identity, who YOU are * use color, typography, and iconography to develop the look and feel of your portfolio package * create a layout and composition that you love * establish your online presence *

create content and design of your resume and cover letter * and construct your portfolio book. You will also learn bits of useful information along the way about print resolution, marketing ideas, and how to do all of this on a budget. By the end of this book, you will have an out-of-this world portfolio package that you will be able to use to establish and secure working relationships with potential employers and clients.

Controversies in Political Theology addresses the question of whether Christians should be struggling towards development or liberation. It explores the theologies of development and liberation, from their beginnings in the 1960s through their changes to the central arguments today. The contrasts are examined in the practice of faith-based aid agencies. The understanding of how to

practice justice differs widely for development theology and liberation theology. Whilst the theology of development remain focused on the economic realm, on trade and consumption, the theology of liberation expands the discussion beyond the economic realm to deal with politics, race, gender and culture more generally. These different concepts of justice lead to very different actions in communities around the world. This book provides students with access to an

in-depth view of these practices in a clear and concise context. The book looks not only at the theologies themselves but also how they came to emerge, and how they stand in contrast across the globe today.

The Grameen Bank of Bangladesh has been extending small loans to poor borrowers (primarily women) to promote self-employment and income generation since 1976. The apparent success of the Grameen Bank (that is, recruitment of clients,

investment of loans, recovery rates on invested loans and profit margins) has made microcredit a new model for poverty alleviation and sustainable development. Anthropological research results on Grameen Bank lending to women presented in this book, however, illuminates the link between the success of the bank and debt-cycling of borrowers. The priority of earning profits to insure institutional economic viability caused Bank employees at the grassroots level to

emphasize increasing the number of loans disbursed and loan recovery. By using the joint liability model of lending, the Bank workers and borrowing peers impose intense pressure on clients for timely repayment. Many borrowers maintain their regular payment schedules, but do so through a process of loan recycling (that is, pay off previous loans with new ones) that considerably increases borrower debt liability. The debt burdens on individual households

in turn increase tension and anxiety among household members and produce unintended consequences for many clients. This book examines women borrowers' involvement with the microcredit program of the Grameen Bank, and the grassroots lending structure of the bank; it illustrates the implications of Grameen lending for the borrowers, their household members and bank workers. The focus of the study is on the processes of village-level microcredit

operation; it addresses the realities of the day-to-day lives of women borrowers and bank workers and explains informant strategies for involving themselves in this microcredit scheme. The study is on the power dynamics of everyday lives of informants as they affect women borrowers' relationships within the household and the loan centers, and bank worker relationships within the loan center and the bank. On few occasions in the

history of modern management have leadership skills been in such sharp focus as they are now. The ability to direct often very large and diverse organizations; to make sense of the complex and turbulent markets and environments in which you operate; and to adapt and learn seems at an all time premium. The premise behind the fifth edition of this influential Handbook is that leadership, management and organizational development are all parts

of the same process; enhancing the capacity of organizations, whatever their size, and the people within them to achieve their purpose. To this end, the editors have brought together a who's who of current writers on leadership and development and created the definitive single volume guide to the subject. The perspectives that the text provides to leadership, learning and development, embrace the formal and the informal, cultures and case examples from

organizations of all kinds; and offers readers a rigorous, readable and, where appropriate, ground-breaking book. In the 14 years since the fourth edition of this classic book, very much has changed. But the need for this Handbook is as strong as ever and the Fifth Edition of Gower Handbook of Leadership and Management Development is set to become a definitive read for senior managers and those who develop them and an essential reader for the management

students aspiring to become the next generation of leaders. **Adult Nursing at a Glance** UN-HABITAT Nursing Research fills the need for a research text that addresses both traditional content as well as focusing on nursing research as it is used in evidence-based practice, in systematic reviews, and in the development of clinical practice guidelines.
