For centuries, readers have turned to the Bhagavad Gita for inspiration and guidance as they chart their own spiritual paths. As profound and powerful as this classic text has been for generations of seekers, integrating its lessons into the ordinary patterns of our lives can ultimately seem beyond our reach. Now, in a fascinating series of reflections, anecdotes, stories, and exercises, Ram Dass gives us a unique and accessible road map for experiencing divinity in everyday life. In the

engaging, conversational style that has made his teachings so popular for decades, Ram Dass traces our journey of consciousness as it is reflected in one of Hinduism's most sacred texts. The Gita teaches a system of yogas, or "paths for coming to union with God." In Paths to God, Ram Dass brings the heart of that system to light for a Western audience and translates the Gita's principles into the manual for living the yoga of contemporary life. While being a guide to the wisdom of the Bhagavad Gita, Paths to God is also a template for expanding our definition of ourselves and allowing us to appreciate a new level of meaning in our lives.

Winning the War, Losing the Peace Simon and Schuster

Told in a wry, understated voice, the novel satirizes the travails of Leopold Plotkin, a failing kosher butcher with a pathological aversion to conflict. After Plotkin commits an act that ignites a crisis in his Republic, he is propelled into conflicts with every branch of government. When he refuses the government's demands to undo what he did, he is indicted by a Secret Blind Jury, arrested by the National Constabulary, and consigned to the notorious Purgatory House of Detention, where he languishes next to a defrocked insane lawyer whose nocturnal machinations threaten to drive him

crazy. After months of languishing in prison, Plotkin is prosecuted by the Republic's ethically-challenged Prosecutor General, tried before a congenitally pro-prosecution judge, and defended by a reclusive lawyer who has never been in a courtroom. The butcher's only witness in the highly anticipated trial is an unhinged resident of the Warehouse for the Purportedly Insane. Everybody, including Plotkin and his small circle of supporters, expects a conviction and imposition of the longest sentence allowed by law, if not longer. Among other things, the novel lampoons prosecutors, public defenders, judges, juries, expert witnesses, high courts, low courts, trials, and potential perjurers.

A Story of Resilient Hope Vegas and the Mob

Involved for over thirty years in the politics of Iraq, Ali A. Allawi was a long-time opposition leader against the Baathist regime. In the post-Saddam years he has held important government positions and participated in crucial national decisions and events. In this book, the former Minister of Defense and Finance draws on his unique personal experience, extensive relationships with members of the main political groups and parties in Iraq, and deep understanding of the history

and society of his country to answer the baffling questions that persist about its current crises. What really led the United States to invade Iraq, and why have events failed to unfold as planned? The Occupation of Iraq examines what the United States did and didn't know at the time of the invasion, the reasons for the confused and contradictory policies that were enacted, and the emergence of the Iraqi political class during the difficult transition process. The book tracks the growth of the insurgency and illuminates the complex relationships among Sunnis, Shias, and Kurds. Bringing the discussion forward to the reconfiguration of political forces in 2006, Allawi provides in these pages the clearest view to date of the modern history of Iraq and the invasion that changed its course in unpredicted ways.

Heutagogy, or self-determined learning, redefines how we understand learning and provides some exciting opportunities for educators. It is a novel approach to educational practice, drawing on familiar concepts such as constructivism, capability, andragogy and complexity theory. Heutagogy is also supported by a substantial and growing body of neuroscience research. Self-Determined Learning explores how heutagogy was derived, and what this approach to learning involves, drawing on recent research and practical applications. The editors draw together contributions from educators and practitioners in different fields, illustrating how the approach can be used and the benefits its use has produced. The subjects discussed include: the nature of learning, heutagogy in the classroom, flexible curriculum, assessment, e-learning, reflective learning, action learning and research, and heutagogy in professional practice settings.

In the silence of the night, there is a sudden tapping at the side window of Eric Payson's grandmother's house. To a young boy, this would be the chilling earliest recollection of the last few moments of his father's life. A haunting whisper echoes throughout the rest of his existence and challenges the steel of his character. The consequences of that tragic moment that night will set the course for Eric's eternal reminder. Rebellion and conflict find him a worthy opponent. The choices Eric makes may take him away from those who love him most. He struggles to find solace in a world whereby his very own hand creates strife and discord amongst everything it touches. Raw and undisciplined, his natural talents cannot temper the restlessness in his spirit. Even a mother's heart, which seeks to protect her child from the world, finds it a daunting task when she cannot protect him from his own quandary.

Carl David is the third generation of a four-generation family art business in Philadelphia. He is the author of *Collecting & Care of Fine Art* published by Crown in 1981. His article about Martha Walter, an American Impressionist painter (1875-1976), was published in the *American Art Review* in May 1978. Mr. David's new book, *Bader Field*, embodies the emotional story of a son's loving relationship with his father a legendary art dealer whose life is suddenly taken by a massive coronary at the young age of fifty-eight years. His death plunges the twenty-four-year-old man onto the front lines of the family art business, which he had entered a mere three years prior. Battling with his own grief while trying to help his adoring but fragile mother survive, David forges forward with all of the elemental tools his father imparted to him. His journey proves a difficult one, not having yet recovered from the horrific loss of his brother to suicide just eight years earlier when he was found dead on the fourth floor of the Rittenhouse Square townhouse, which was home to the prestigious David David Gallery. His self-imposed obligation is to successfully take the family art business to the next generation and to give his own children every bit of love, kindness, and wisdom bestowed upon him by the unique man whom they will never know other than the mark he left on everyone who knew him. *Bader Field* adds significant insight into the mysterious workings and dealings of the art world. David speaks from experience of having been immersed in it all of his life and having lived it from the inside out. There will be a tremendous crossover interest in this book as it combines the elements of an American family, its goodness and its tragedy interfaced with the multifaceted aspects of the art business and flying small airplanes.

Michael Savage attacks big government and liberal media bias. The son of immigrants, Savage shows how traditional American freedoms are being destroyed from the outside and undermined from within—not just our own government, but also from alien forces within our own society. Savage argues that if the price of liberty is eternal vigilance, then only a more "savage nation" will enjoy these liberties. Savage's high ratings and the rapid growth of his program prove he is in touch with the concerns of the average American.

Las Vegas was the Mob's greatest venture and most spectacular success, and through 40 years of frenzy, murder, deceit, scams, and skimming, the FBI listened on phone taps and did virtually nothing to stop the fun. This is the truth about the Mob's control of the casinos in Vegas like you've never heard it before, from start to finish. Two of the nation's most powerful crime family bosses went to prison in the 1930's: Al Capone and Lucky Luciano. Frank Nitti took over the Chicago Outfit, while Frank Costello ran things for the Luciano Family. Both men were influenced by their bosses from prison, and both sent enough gangsters into the streets to influence loan sharking, extortion, union control, and drug sales. Bugsy Siegel worked for both groups, handling a string of murders and opening up gaming on the west coast, and that included Las Vegas, an oasis of sin in the middle of the desert - and it was legal. Most of it. The FBI watched as the Mob took control of casino after casino, killed off the competition, and stole enough money to bribe their way to respectability back home. By the 1950's, nearly every major crime family had a stake in a Las Vegas casino. Some did better than others. Casino owners watched-over their profits while competing crime families eyed each other's success like jealous lovers. Murder often followed.
