Modern Plastics Encyclopedia Gardner's Chemical Synonyms and Trade Names

Through ten previous editions, Gardner's Chemical Synonyms and Trade Names has become one of the best known and most widely used sources of information on chemicals in commerce. This edition includes the results of the continuing research underlying this reference work and has seen a major expansion of the information provided for individual chemical compounds. The reference contains some 35,000 entries, many of which are new to this edition. Gardner's features a comprehensive selection of chemicals. The main criterion for inclusion in Gardner's is a material's importance as a commercially available chemical. Thus all bulk inorganic chemicals, major pesticides, dyestuffs, surfactants, metals and alloys are included. The 5,000 highest volume chemicals in the US, as defined by application of the

Toxic Substances Control Act, are all represented. Almost all records describing pure chemicals now carry the appropriate CAS Registry Number and the associated EINECS number. In addition, the Merck Index Number is provided for all chemicals which also appear in the Twelfth Edition of the Merck Index. Entries, wherever possible, contain detailed information on chemical composition, functions, applications and suppliers. A feature new to this edition is the inclusion of physical property data for pure chemicals. Data that has been provided, as available, includes the melting point, boiling point, density or specific gravity, refractive index, optical rotation, ultraviolet absorption, solubility and acute toxicity. Thousands of new synonyms have been included in Gardner's to make it one of the most comprehensive sources of chemical synonym information available. Overall, both the structure of Gardner's and the quality of the information it contains have been greatly improved in this edition. The result is a reference tool that no chemical professional should be without. *Praxis der thermischen Analyse von Kunststoffen* Carl Hanser Verlag GmbH Co KG

\*\*\*\* The standard reference in the field of chemicals for commerce, cited in BCL3 and Sheehy. This extensively revised edition includes some 40,000 trade names and chemicals, of which about 18,000 entries are completely new; 13,500 entries that now contain CAS or EINECS numbers; and nearly 3,000 manufacturers, more than twice the number in the ninth edition. Entries give definitions, classification, chemical formulas/descriptions, functions/applications, and manufacturers. Annotation copyright by Book News, Inc., Portland, OR

Modern Plastics Encyclopedia Gardner's Chemical Synonyms and Trade Names Gower Publishing Company, Limited

**Gardner's Chemical Synonyms and Trade Names** Gower Publishing Company, Limited

This unique book covers the wide spectrum of extrusion blow-

molded hollow bodies, which find application for instance in packaging, storage, and transport or channeling of liquids, gases, or bulk materials, as well as for toys, sporting goods, or technical applications in the automotive or household appliances sectors. The necessary information for fundamental understanding of extrusion blow molding technology is provided, making it easy to comprehend the interrelationships during processing and in applications. This practical knowledge is aimed at facilitating the reader's daily work and studies. In addition to various fields of application and manufacturing processes, aspects of product development and possibilities of blow molding simulation are presented. Further sections on peripheral equipment, downstream equipment, and recycling round off the book.
