Urbanization is a system of power and

knowledge, and today's city functions through the expansive material infrastructures of the urban order. In *The Urban Apparatus*, Reinhold Martin analyzes urbanization and the contemporary city in aesthetic, socioeconomic, and mediapolitical terms. He argues that understanding the city as infrastructure reveals urbanization to be a way of imparting functional, aesthetic, and cognitive order to a contradictory, doubly bound neoliberal regime. Blending critical philosophy, political theory, and media theory, *The Urban Apparatus* explores how the aesthetics of cities and their political economies overlap. In a series of ten essays, with a detailed theoretical introduction, Martin explores questions related to urban life, drawn from a wide

range of global topics—from the fiscal crisis in Detroit to speculative development in Mumbai to the landscape of Mars, from discussions of race and the environment to housing and economic inequality. Each essay proposes a particular “mediator” (or a material complex) that is shaped by imaginative practices, each answering the question “What is a city, today?” *The Urban Apparatus* serves as an “urban” bookend to the architectural questions explored by Martin in his earlier book *Utopia's Ghost*, and ultimately offers readers a way to think politically about urbanization.

Integrating a decade-long program of empirical research with current cognitive

theory, this book demonstrates that psychological research has profound implications for current debates about what it means to be rational. The author brings new evidence to bear on these issues by demonstrating that patterns of individual differences--largely ignored in disputes about human rationality--have strong implications for explanations of the gap between normative and descriptive models of human behavior. Separate chapters show how patterns of individual differences have implications for all of the major critiques of purported demonstrations of human irrationality in the heuristics and biases literature. In these critiques, it has been posited that experimenters have observed performance errors rather than systematically irrational responses; the

tasks have required computational operations that exceed human cognitive capacity; experimenters have applied the wrong normative model to the task; and participants have misinterpreted the tasks. In a comprehensive set of studies, Stanovich demonstrates that gaps between normative and descriptive models of performance on some tasks can be accounted for by positing these alternative explanations, but that not all discrepancies from normative models can be so explained. Individual differences in rational thought can in part be predicted by psychological dispositions that are interpreted as characteristic biases in people's intentional-level psychologies. Presenting the most comprehensive examination of individual differences in

the heuristics and biases literature that has yet been published, experiments and theoretical insights in this volume contextualize the heuristics and biases literature exemplified in the work of various investigators.

**Discussions from Pre-Production to Mastering** Who Is Rational? Studies of individual Differences in Reasoning  
The first major biography of Glenn Gould

to stress the critical influence of the Canadian context on his life and art Glenn Gould was not, as has previously been suggested, an isolated and self-taught eccentric who burst out of nowhere onto the international musical scene in the mid-1950s. He was, says Kevin Bazzana in this fascinating new full-scale biography, very much a product of his time and place – and his entire life and diverse work reflect his Canadian heritage. Bazzana, editor of the international Glenn Gould magazine, throws fresh light on this and many other aspects of Gould's celebrated life as a pianist, writer, broadcaster, and composer. He portrays Gould's upbringing in Toronto's neighbourhood of The Beach in the 1930s, revealing the area's influence as a distinct social,

religious, and cultural milieu. He looks at the impact of Canadian radio on the young musician, his relations with the “new music” crowd in Toronto, and the ways in which his career was furthered by the extraordinary growth of Canada’s cultural institutions in the 1950s. He examines Gould’s place within the CBC “culture” of the 1960s and ‘70s, and his distinctly Canadian sense of humour. Bazanna also reveals new information on Gould’s famous eccentricities, his sometimes bizarre stage manner, his highly selective repertoire, his control mania, his private and sexual life, his hypochondria, his romanticism, and his abrupt retirement from concert performance to communicate solely through electronic and print media. And finally, he takes a detailed look at the

extraordinary phenomenon of the posthumous “life” that Gould and his work have enjoyed.
